

2012

REASONABLE SUSPICION STOPS:

*PRECINCT BASED COMPARISON BY
STOP AND SUSPECT DESCRIPTION*

Raymond W. Kelly
Police Commissioner

Reasonable Suspicion Stops: 2012

Introduction

The following pages present data on the residential population of police precincts, as reported by the 2010 U.S. Census, as well as the benchmark of crime suspect description in that precinct, by race, as compared to stop activity in that precinct, by race. These precinct pages also include an overview of other police activity in the precinct compared to reasonable suspicion stops. The first page illustrates this data on a Citywide basis.

Explanation of Data and Statistical Notes

Top Crime Suspected- The *crime suspected* (when initiating a stop) is entered by a police officer in a field of the Department Stop, Question and Frisk worksheet and information taken from that worksheet is entered into the NYPD Stop, Question and Frisk database. In this report, the percentages of the *Top Crime Suspected* are based on data publically released on the Department website from the NYPD Stop, Question and Frisk database. The percentage compares the number of stops reported for each specific crime suspected to the total number of stops reported in each precinct on a Stop, Question and Frisk report.

Residential Population^{*} - Residential figures are based on the 2010 census, broken down by race and police precinct. Data provided by New York City Department of City Planning-Population Division.

All Known Suspects/Violent Crime Suspects^{*} - In order to properly determine the “known arrested and un-arrested suspects” for crime complaints recorded in 2012 the following procedures were employed: all crime reports with a recorded occurrence date in 2012, as of January 27th, 2013, supplied information on un-arrested suspects and; the arrests effected in 2012, no more than 24 hours after the recording of complaints occurring in 2012, supplied the arrested suspect information.^{**} For the purpose of this report, violent crime includes murder, rape, robbery, and felony assault.

The process of determining the known arrested and un-arrested suspects made use of most of the complaints recorded in 2012 (497,323 of 503,780) but only a portion of the arrests recorded in 2012. One hundred ninety-five thousand eight hundred sixty arrests were used in the merge. The remaining arrests recorded in 2012 were excluded because they were made for complaints occurring prior to 2012, they were made for complaints occurring in 2012 but as a result of follow-up investigations after the 24 hour period, or they were arrests for instances in which a complaint report is not prepared.

^{*} Figures include Asian, Black, Hispanic, and White races only. Unknown and other races are not included in these figures.

^{**} The 24 hour rule was employed to avoid double counting suspects as both arrested and un-arrested, as follow-up investigations produced arrests of individuals who were originally recorded as un-arrested suspects.

Persons Stopped* - Percentages of race are based on supplied identification, self-identification or officer identification as reported on the Stop, Question and Frisk report and returned from the NYPD Stop, Question and Frisk database.

Radio Runs- Number of radio runs created in response to calls for service from the public. Number based on all requests for assistance that were transmitted over police radio and assigned a “job number,” including 911 calls, patrol encounters, and request for assistance from a person on the street.

Requests from a person walking into or calling a precinct directly and requests through the 311 system are not included unless the officer subsequently radios the request to the dispatcher. Self-initiated jobs not resulting from a citizen complaint or contact (i.e.: interior building patrol, directed park patrol, etc.) are not included.

Total Crime Complaints Reported- Number based on felony, misdemeanor, and violation complaint reports recorded in the specific precinct, occurring in 2012, as reported through the NYPD complaint reporting system as of January 27th, 2013. This does not include arrests where no complaint report was generated or complaint reports used to record an event of a non-criminal nature (e.g. lost property).

Arrests and Criminal Court Summonses Issued- Number based on all arrests made and all criminal court summonses issued in the specific precinct as reported in the 2012 year end Compstat Report. Parking summonses and moving violation summonses are excluded.

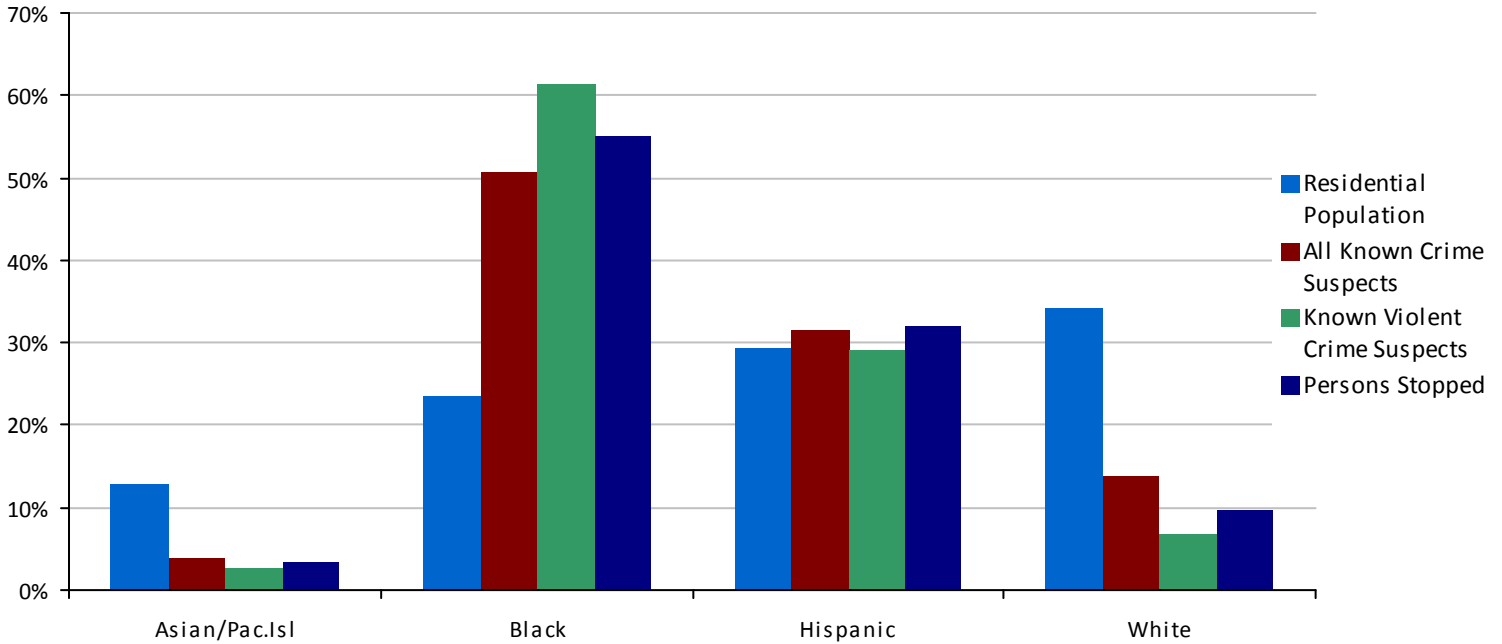

Reasonable Suspicion Stops- NYPD officers are required to record information regarding a reasonable suspicion stop on a Stop, Question and Frisk form. This information is entered in to an electronic database, the content of which is authorized under New York State Criminal Procedure Law section 140.50(4). The NYPD is required to report the number of stops within thirty days of the end of each calendar quarter to the New York City Council pursuant to 14-150(5) of the New York City Administrative Code. Following the end of each year, the Department compiles the database entries and produces and posts publically the information of the database on the NYPD website. The data in this report is based on that dataset. The data is available at: http://www.nyc.gov/html/nypd/html/analysis_and_planning/stop_question_and_frisk_report.shtml
