Gregory P. Anderson
Commissioner
NYC Department of
Sanitation

I. Letter from the Commissioner

Commercial Waste Zones represent a major transformation in how New York City regulates and manages commercial waste collection. Established through Local Law 199 of 2019 after years of planning, analysis, and stakeholder engagement, the Commercial Waste Zones Program is designed to create a safer, more efficient, and more accountable commercial waste system for businesses, workers, and communities across the City.

FY26 marked an important phase in the implementation of this historic reform. During the fiscal year, the Department of Sanitation continued the phased rollout of Commercial Waste Zones, expanding from just one initial zone to six fully operational zones. This approach allowed DSNY, commercial establishments, and authorized awardees to build operational readiness while maintaining safe, sustainable, and reliable waste collection service for New York City's businesses.

As implementation progressed, DSNY continued to strengthen the oversight framework that supports this program. This included monitoring awardee compliance, collecting and reviewing required operational data, conducting enforcement activities, supporting worker safety initiatives, and engaging businesses and stakeholders throughout each phase of implementation.

The Commercial Waste Zones program reflects DSNY's commitment to improving safety standards, enhancing accountability, reducing unnecessary truck travel, and creating a commercial waste collection system that better serves New York City businesses and neighborhoods. As we work toward full implementation of Commercial Waste Zones by the end of 2027, DSNY will continue to evaluate program performance and make refinements to ensure that we meet our goals.

We are pleased to submit the FY26 Annual Report for the Commercial Waste Zones Program, fulfilling the reporting requirements of Local Law 199.

Background and Timeline

The CWZ Program was created to:

- improve safety in the private carting industry by reducing unnecessary truck traffic and strengthening oversight of vehicles, workers, and operations;
- advance environmental goals by reducing emissions, increasing recycling, and expanding organics diversion;
- enhance customer service through greater transparency in pricing, written agreements, contract terms, and service standards; and
- strengthen accountability through enforceable award agreements, performance reporting, compliance monitoring, and targeted enforcement.

The Commercial Waste Zones (CWZ) Program is codified in Title 16-B of the New York City Administrative Code and was established by Local Law 199 of 2019 (LL199). LL199 directs the New York City Department of Sanitation (DSNY) to establish geographic zones for the collection, removal, and disposal of commercial waste and to designate awardees through a competitive procurement process.

Prior to LL199, New York City's commercial waste collection system was marked by inefficient and overlapping routes, unsafe practices, harmful environmental impacts, and limited transparency for commercial establishments. Multiple private carters could service the same block on the same night, contributing to excessive truck traffic, longer routes, noise, air pollution, and increased risks to workers and the public. Many businesses historically negotiated rates without standardized customer protections, and a significant portion of commercial waste agreements were estimated to be verbal rather than written or signed. Safety equipment, operating practices, and worker training also varied across the industry.

The Commercial Waste Zones Program divides New York City into 20 non-exclusive geographic zones. Zone boundaries are based on community district boundaries and do not cross borough lines. As of June 30, 2026, six of the 20 zones had reached final implementation.

Implemented as of June 30, 2026:

- Bronx East
- Bronx West
- Brooklyn South
- Lower Manhattan
- Queens Central
- Queens Northeast

DSNY: Commercial Waste Zones Management and Oversight

To carry out the authority granted under Local Law 199, the New York City Department of Sanitation established the Bureau of Commercial Waste as the lead office responsible for managing the Commercial Waste Zones Program.

The Bureau serves as the central point of coordination for zone implementation, award agreement administration, business engagement, compliance oversight, data management, and enforcement strategy. The Bureau also monitors awardee performance and coordinates corrective action when operational, customer service, safety, or reporting concerns arise.

Commercial Waste Zones remain a department-wide responsibility. The Bureau works in coordination with DSNY's Enforcement Division, Environmental Police Unit, Bureaus of Public Affairs, Legal Affairs, Management and Budget, Information Technology, and other operational and administrative offices whose expertise supports implementation and ongoing oversight.

During FY26, DSNY expanded the Commercial Waste Zone Program from one fully implemented zone to six. As the Program grew, the Department simultaneously managed the transition and launch of new zones and the ongoing oversight of zones already in operation.

Management and Oversight Tools

DSNY uses a combination of technology systems, reporting requirements, and public-facing resources to support implementation and oversight of the Commercial Waste Zones Program.

The Carter Portal serves as the Department's central repository for customer service agreements, customer registers, and other information submitted by awardees. DSNY uses this information to monitor contracting activity, support customer assignments, review compliance with maximum rates and service requirements, and identify incomplete or inconsistent records.

Commercial waste collection vehicles operating under the Program are required to collect and share telematics data. Telematics systems transmit vehicle location and operational information to DSNY, including vehicle miles traveled and certain safety-related events. This information supports oversight of route activity, authorized operations, and awardee compliance.

DSNY also maintains public-facing tools, including the Find Your Zone Lookup Tool, which allows commercial establishments to identify their zone, view the carters authorized to operate in that zone, and review the zone's rollout schedule; and the Maximum Rate Calculator, which allows commercial establishments to compare the maximum prices that carter awardees may charge in their zone.

Program Rules and Regulatory Framework

As the Commercial Waste Zones Program has progressed through implementation, DSNY has continued to refine the regulatory framework supporting Program operations. Through rulemaking, DSNY has clarified and refined requirements related to awardee obligations, customer protections, reporting, safety, vehicle operations, and other aspects of Program administration.

During FY26, DSNY adopted four rules related to the Commercial Waste Zones Program. These rules addressed implementation schedules and requirements related to awardee transactions, customer protections, contracts and invoicing, waste surveys, worker safety, reporting, enforcement, and other aspects of Program administration. Detailed information regarding FY26 Commercial Waste Zones rulemaking activity is provided in **Appendix J: Rules FY26**.

Carter Accountability

Commercial Waste Zone awardees operate under agreements with DSNY that establish enforceable requirements for pricing, customer service, safety, environmental performance, worker training, recordkeeping, reporting, and operations. Designated carters and subcontractors performing services under an awardee's agreement require DSNY approval and are subject to applicable Program requirements. Awardees remain responsible for their performance and for generating, collecting, and providing required records on their behalf.

During each transition phase, DSNY conducts mandatory implementation meetings with awardees to review Commercial Waste Zone requirements, operational expectations, safety obligations, and compliance responsibilities before zones enter operation.

DSNY monitors compliance through contract administration, audits, required reporting, customer and complaint information, and telematics. Awardees must maintain and submit information concerning customer agreements and rates, collection routes, vehicle activity, waste disposal, warnings and violations, workplace injuries and accidents, worker training, and other operational matters required by law, rule, or agreement.

When compliance concerns arise, DSNY may require corrective action, conduct additional reviews, issue Notices of Violation, assign a monitor when warranted, or pursue other available contractual and regulatory remedies.

DSNY also reviews proposed ownership changes, customer agreement assignments, and subcontracting arrangements where Department approval is required. During FY26, DSNY established and implemented a review process for proposed ownership changes affecting CWZ awardees to evaluate consistency with Program requirements and objectives.

Implementation Plan and Strategy

DSNY is implementing the Commercial Waste Zones Program through a phased rollout designed to protect service continuity while establishing a durable system of commercial waste collection. The strategy is guided by three priorities: ensuring the operational readiness of the business community, DSNY, and participating carters; avoiding service disruptions for businesses; and maintaining a competitive marketplace that provides meaningful customer choice.

Preserving Customer Choice

The CWZ Program uses a nonexclusive zone model. Three awardees are authorized to provide curbside commercial waste collection services within each zone, allowing businesses to compare available providers, services, and rates before entering into a written customer service agreement. In addition, a maximum of five awardees are authorized to provide containerized commercial waste collection services within each zone as it is implemented, and citywide when fully operational.

During each transition period, commercial establishments are provided an opportunity to review available service options and enter into agreements with authorized awardees prior to the final implementation date. Businesses that do not complete the contracting process before the final implementation date may be assigned to an awardee by

DSNY to ensure continuity of service. Assignment does not eliminate customer choice, as an assigned business may subsequently enter into an agreement with another awardee authorized to operate in the zone, subject to applicable Program requirements.

Phased Rollout

Each new phase includes a transition period that begins on the implementation start date and continues until the zone reaches final implementation. During this transition period, DSNY conducts business outreach, monitors contracting activity, validates customer information, evaluates awardee readiness, and prepares for full implementation. At the same time, businesses can meet with carter awardees, negotiate rates, select their preferred carter awardee, and sign their new contract. Once a zone reaches final implementation, only awardees and DSNY-approved designated carters may collect covered commercial waste within that zone.

Including Queens Central, which was implemented in FY25, there are six fully implemented zones as of June 30, 2026.

The phased approach allows DSNY to incorporate lessons from each transition and adapt its implementation methods to the distinct conditions of each zone.

Awardee Readiness

During each transition period, DSNY conducts mandatory training sessions for awardees serving the zones. These sessions review applicable rules, award agreement requirements, reporting obligations, customer service standards, safety requirements, and operational expectations. They also provide awardees with an opportunity to raise questions and clarify their obligations before final implementation.

DSNY also uses the transition period to confirm required preparations and address material questions or issues that may affect implementation. Awardees must satisfy applicable readiness requirements before beginning customer contracting activities in a zone.

During FY26, DSNY completed implementation of the following three phases that included five additional zones:

- **Phase 2:** Bronx East and Bronx West transitioned from October 1 through November 30, 2025.
- **Phase 3:** Queens Northeast and Brooklyn South transitioned from January 1 through February 28, 2026.
- **Phase 4:** Lower Manhattan transitioned from April 1 through May 31, 2026.

FY 2026 Annual Report Executive Summary

The New York City Department of Sanitation (DSNY) submits the FY 2026 Annual Report for the Commercial Waste Zones (CWZ) Program, covering the reporting period of July 1, 2025, through June 30, 2026, in accordance with Local Law 199 of 2019.

FY26 marked a significant transition point for the Commercial Waste Zones Program. During the reporting period, DSNY expanded from one operational zone to six fully implemented zones, completing three additional implementation phases covering Bronx East, Bronx West, Queens Northeast, Brooklyn South, and Lower Manhattan. As of June 30, 2026, six of the City's 20 Commercial Waste Zones had reached final implementation.

Because implementation occurred on a phased schedule, the amount of available reporting data varies by zone and by reporting category. Certain information reflects activity during transition or beginning on implementation start dates, while other operational information reflects activity following final implementation. Each section of this report identifies the applicable reporting period and provides additional detail in the appendices.

This report provides information required under Local Law 199 regarding:

- Business and Community Engagement
- Fees Collected by Carters
- Costs to Dispose of Material at Transfer Stations
- Vehicles Miles Traveled (VMTs)
- Collection Data by Waste Stream

The report also provides additional information regarding worker safety, enforcement, and other program oversight activities.

Data Availability and Considerations

FY26 is the first reporting period to include data from multiple implemented Commercial Waste Zones. Because each zone reached final implementation at a different point during the fiscal year, the length of the post-implementation reporting period varies by zone.

The applicable final implementation dates and reporting periods by zone are provided in **Appendix A: Reporting Framework and Reference**.

The information presented in this report becomes available at different stages of implementation. Outreach, education, feedback, and worker training may reflect activity occurring before or during a zone's transition period. Other operational data, including customer charges, dump-ticket and disposal information, and collection

tonnage, generally reflects activity following final implementation. Vehicle miles traveled reflects the applicable period during which telematics reporting is required for vehicles operating post-implementation. As a result, the period covered varies by dataset and by zone. Each data section identifies the applicable reporting period.

Queens Central is the only zone for which a full prior-year operational dataset is available. The FY25 Annual Report included six months of Queens Central operations. Comparisons between FY25 and FY26 are therefore limited to equivalent reporting periods where comparable data is available.

Detailed Commercial Waste Zones reporting data are available on DSNY's **Commercial Waste Zones Reports & Data** webpage.

Business and Community Engagement

This section describes DSNY's outreach and education efforts to commercial establishments and community stakeholders, as well as training reported for employees of Commercial Waste Zone awardees. Local Law 199 requires DSNY to conduct outreach and education concerning implementation of the Commercial Waste Zones Program and to report annually on outreach, education, trainings, participation, and materials provided.

Outreach, Education and Training

Business Outreach and Education

Business outreach is a central component of each Commercial Waste Zone transition. During each transition period, DSNY conducted targeted outreach in the zones moving through implementation to inform commercial establishments of implementation dates, authorized awardees, customer contracting requirements, available services, maximum rates, and other Program requirements.

During FY26, DSNY conducted and documented over 192,000 outreach activities across zones transitioning through implementation. These activities included mailed literature, telephone calls, establishment visits, and email outreach.

The largest volume of outreach activity corresponded with the phased implementation schedule, with significant outreach occurring during the Bronx East, Bronx West, Queens Northeast, Brooklyn South, and Lower Manhattan transitions.

Detailed outreach activity by zone and outreach method is provided in **Appendix B1**.

Community and Stakeholder Engagement

In addition to direct establishment outreach, DSNY conducted public information sessions, targeted briefings, business walkthroughs, workshops, tabling events, and other stakeholder engagements throughout FY26. These engagements included partnerships and coordination with business organizations, chambers of commerce, Business Improvement Districts, elected officials, other City agencies, and industry and community organizations.

DSNY conducted 47 engagement and educational events during FY26, including both general public sessions and engagements targeted to businesses, industries, organizations, or geographic areas. These events had 1,194 reported participants.

Detailed information regarding event type and attendance is provided in **Appendix B2**.

Carter Employee Training

Under the Commercial Waste Zones Program, awardees are required to provide safety training to employees involved in commercial waste operations. Drivers, laborers, and helpers must complete at least 40 hours of worker safety training, while other employees must complete at least eight hours. Annual refresher training is also required for all employees.

During FY26, awardees reported 2,581 individual employee trainings conducted under the Commercial Waste Zones Program. These trainings included operator training and administrative staff training. The total reflects individual training instances and does not represent a count of unique employees, as an employee may participate in more than one training during the fiscal year. Detailed training information is provided in **Appendix B.3**.

Feedback: Complaints and Program Inquiries

In addition to direct outreach and engagement, DSNY provides multiple channels for businesses and members of the public to ask questions, provide feedback, and submit complaints related to commercial waste. These channels include NYC 311, DSNY's public webform, email, telephone, executive correspondence, referrals, and field engagement. DSNY tracks these cases through its internal customer relationship management system.

During FY26, DSNY recorded 676 feedback, inquiry, and complaint cases associated with the six implemented Commercial Waste Zones. Of these, 517 were feedback or program inquiry cases and 159 were complaints.

Among feedback and program inquiries, the most frequently reported categories were Private Carter Selection, with 257 cases, and General Waste Management, with 228 cases, followed by Post-Implementation Identified Business with 32 cases. Among complaints, DSNY recorded 64 Business/Carter Dispute cases, 50 Commercial Disposal complaints, and 45 No Private Carter/Decal Not Posted complaints.

Detailed information regarding feedback categories, complaints, and program inquiries is provided in **Appendix C**.

////////////////////////////////////

During FY26,
**DSNY recorded 676
feedback, inquiry,
and complaint cases
associated with
Commercial Waste
Zone operations.**

Customer Charges Reported and Disposal Costs

The Commercial Waste Zones Program requires awardees to report information regarding customer charges for commercial waste collection services and costs associated with the disposal and processing of collected material. DSNY uses this awardee-reported information to provide the annual assessment required under Local Law 199 of 2019.

During FY26, six Commercial Waste Zones reached final implementation at different points in the fiscal year. Accordingly, reported customer charges and disposal costs reflect different periods of Program operations across zones. Queens Central represents the longest period of post-implementation activity, while the remaining implemented zones reflect shorter periods of operations.

Detailed monthly data by zone, awardee, and waste stream are provided in **Appendix D: Customer Charges Reported by Awardees** and **Appendix E: Disposal Costs**.

Customer Charges Reported by Awardees

Under the Commercial Waste Zones Program, customers negotiate rates with awardees subject to the maximum rates established in their agreements with DSNY. Customer charges vary based on service type and waste stream, including refuse, recycling, and organics collection.

During FY26, awardees reported \$94,478,117 in customer charges for commercial waste collection services. Refuse collection represented the largest share of reported charges, totaling \$79,127,584. Recycling accounted for \$13,121,181, while organics accounted for \$2,229,352.

//////////
During FY26, six Commercial Waste Zones reached final implementation at different points in the fiscal year.

Disposal Costs Reported by Awardees

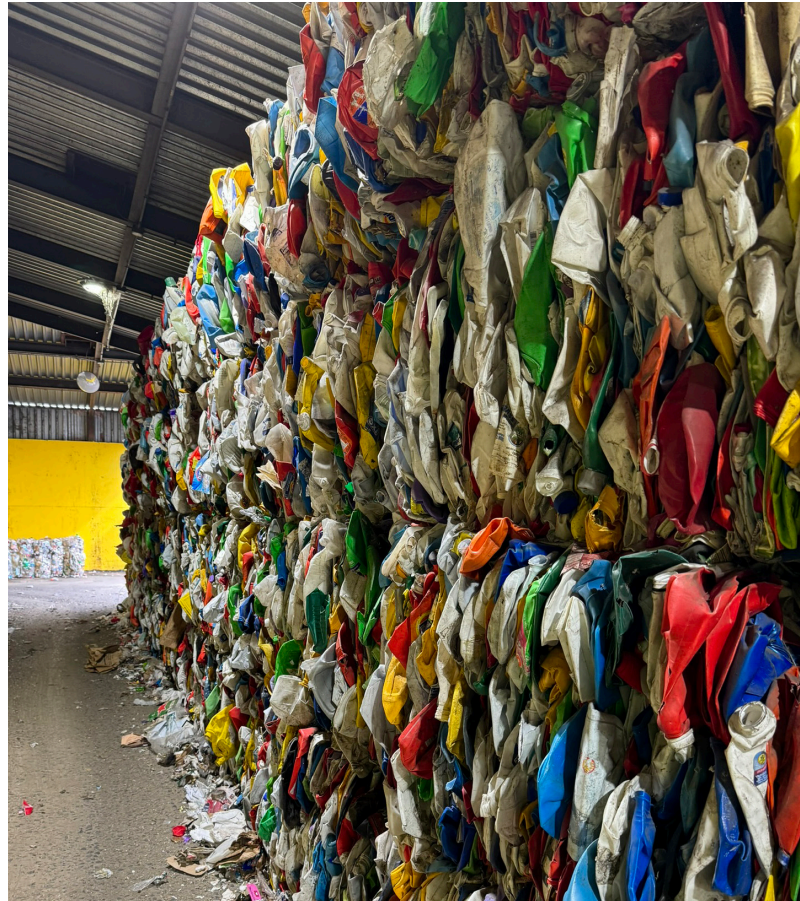

Awardees and their designated carters are required to ensure the proper disposal of commercial waste collected under the Commercial Waste Zones Program and to maintain records documenting the amount and type of material delivered to transfer stations, processing facilities, and other receiving locations. Awardees report disposal information to DSNY, including the costs associated with disposal and processing activities.

During FY26, awardees reported 309,922 tons of material disposed across refuse, recycling, and organics, including material reported under Citywide containerized service. Refuse represented the largest share of reported disposal tonnage at 245,118 tons, followed by recycling at 54,294 tons and organics at 10,510 tons.

During FY26, awardees reported \$28,287,056 in disposal and processing costs. Because zones reached final implementation at different points during FY26, reported disposal information reflects different periods of Program operations. In addition, Citywide containerized service is reported separately from individual zones because Citywide collection routes and associated disposal records may include material collected from customers located in multiple Commercial Waste Zones.

Detailed monthly disposal cost data by zone or Citywide award, awardee, and waste stream are provided in **Appendix E: Disposal Costs**. Detailed collection tonnage data are provided in **Appendix G: Collection Tonnage**.

Recycling disposal costs may include credits associated with the value of recovered materials and therefore should not be interpreted in the same manner as refuse or organics disposal costs.

////////////////////////////////////

During FY26,
awardees reported
\$28,287,056 in
 disposal and
 processing costs.

Zone Awardees Vehicle Miles Traveled (VMTs)

Local Law 199 requires DSNY to report annual vehicle miles traveled by each awardee within each Commercial Waste Zone. Awardees are required to provide DSNY with telematics data for vehicles operating under the Commercial Waste Zones Program. DSNY uses this information to calculate vehicle miles traveled associated with collection operations.

During FY26, awardees reported 1,378,523 vehicle miles traveled associated with Commercial Waste Zone operations in the six implemented zones. Because zones reached final implementation at different points during the fiscal year, reported VMT reflects different periods of post-implementation operations by zone.

Aggregate VMT totals should not be interpreted as direct measures of relative efficiency among zones or awardees. Reported mileage reflects differences in zone geography, customer density, route composition, service requirements, disposal locations, and length of operational period.

Summary VMT information by zone and reporting period is provided in **Appendix F: Total Miles Traveled (by Zone)**.

////////////////////////////////////

During FY26,
awardees reported
1,378,523 vehicle
miles traveled
associated with CWZ
operations in the six
implemented zones.

Collection Tonnage Data by Waste Streams

Awardees are required to report the tonnage and type of commercial waste and recyclable materials collected and disposed under the Commercial Waste Zones Program. DSNY uses this awardee-reported information to assess collection activity and waste streams under the Program.

During FY26, awardees reported 309,922 tons of material across refuse, recycling, and organics, including material reported under Citywide containerized service. Refuse represented the largest share of reported material at 245,118 tons, followed by recycling at 54,294 tons and organics at 10,510 tons.

In the six implemented zones, recycling and organics collection diverted approximately 21 percent of material during FY26 based on the reported tonnage totals. It should be noted that reporting periods differed by zone due to the Program's phased implementation, and diversion rates varied across individual carters, operating zones, and months. DSNY continues to promote increased diversion through existing Program features, such as lower collection rates for recyclable materials and organics, and new Program initiatives, such as expanded organics separation requirements. Through ongoing outreach and focus, DSNY supports efforts to increase diversion as implementation continues citywide.

Because zones reached final implementation at different points during FY26, reported tonnage reflects different periods of Program operations across zones.

Tonnage collected by Citywide containerized awardees is reported separately from individual zones because Citywide collection routes and corresponding disposal records may include material collected from customers located in multiple Commercial Waste Zones.

Detailed monthly collection tonnage data by zone or Citywide award, awardee, and waste stream are provided in **Appendix G: Collection Tonnage**.

////////////////////

During FY26, awardees reported 309,922 tons of material across refuse, recycling, and organics.

Feasibility Assessment of City-Owned Marine Transfer Stations

During FY26, City-owned marine transfer stations received no commercial waste under the Commercial Waste Zones Program.

DSNY continues to assess whether City-owned marine transfer stations could safely and effectively accommodate commercial waste while maintaining existing residential waste operations. The assessment considers available capacity under current operating and permit conditions, potential demand from commercial carters, facility staffing and operating-hour requirements, compatibility with existing rail and barge export arrangements, and the potential financial implications for both commercial carters and the City.

The feasibility of commercial access may vary by facility and cannot be determined solely by unused permitted capacity. Any future use would also require consideration of operational scheduling, waste acceptance procedures, contractual requirements, regulatory approvals, and the effect on existing DSNY operations.

DSNY will continue evaluating these factors as the Commercial Waste Zones Program expands and additional information becomes available regarding commercial waste volumes, geographic distribution, disposal patterns, and carter interest. Any future decision to accept commercial waste at City-owned facilities would depend on the outcome of this evaluation and consideration of operational, financial, contractual, and regulatory factors.

Enforcement

Enforcement is a core component of the Commercial Waste Zones Program and complements DSNY's contractual and administrative oversight of awardees. Commercial Waste Zone awardees are responsible for ensuring that their drivers, vehicles, and operations comply with applicable federal, state, and local requirements.

DSNY enforcement officers conduct vehicle stops and inspections and may issue New York State Vehicle and Traffic Law summonses for violations involving driver behavior and vehicle or equipment conditions. Officers may also issue summonses for violations of applicable New York City Sanitation Rules. These actions may address conduct such as unsafe vehicle operation, defective equipment, unsecured loads, spillage, or street obstruction.

In implemented zones, DSNY may also take enforcement action against awardees for violations of Title 16-B of the New York City Administrative Code and Chapter 20 of Title 16 of the Rules of the City of New York. CWZ-specific enforcement addresses requirements applicable to awardees and their designated carters, including safety, operations, customer service, reporting, and other Program obligations. Applicable penalties may increase for repeated violations or where statutory thresholds are exceeded.

Beyond enforcement activity, DSNY continued to strengthen safety coordination through interagency partnerships and stakeholder engagement. During FY26, DSNY joined the Vision Zero Task Force and continued leading the CWZ Safety Task Force, which brings together representatives from DSNY, the Business Integrity Commission, the Department of Transportation, labor organizations, and safety advocates to discuss Program implementation, safety standards, industry trends, and opportunities to improve safety for workers and the public.

Commercial Waste Zone awardees are responsible for ensuring that their drivers, vehicles, and operations comply with applicable federal, state, and local requirements.

During FY26, DSNY issued 159 summonses and CWZ-specific violations associated with Commercial Waste Zone operations and Bureau of Commercial Waste administrative enforcement. These included 118 Vehicle and Traffic Law summonses, 28 summonses for violations of Sanitation Code and Rules, and 13 CWZ-specific violations issued to carters. Of the 159 summonses and violations, 146 were issued to drivers and 13 were issued to carters.

DSNY also conducted mandatory implementation meetings with awardees during each transition phase to review CWZ requirements, safety expectations, and compliance obligations. These efforts complement DSNY's enforcement activities by helping ensure that awardees understand Program requirements and are prepared to meet their operational and safety obligations.

DSNY's field enforcement authority is not limited to authorized zone carters. Officers may address violations committed by other commercial vehicles encountered during field operations, while maintaining a focus on compliance by awardees and their designated carters.

The summons and violation totals reflect activity during the applicable operating period for each zone. Because the zones had different implementation dates, the totals should not be interpreted as relative compliance rates among zones or awardees.

Detailed monthly enforcement data by zone, carter type, and violation type are provided in **Appendix H: Enforcement**.

//

During FY26, DSNY issued 159 summonses and CWZ-specific violations associated with Commercial Waste Zone operations and Bureau of Commercial Waste administrative enforcement.

CWZ Program Recommendations

FY26 represented an important period of continued implementation and operational refinement for the Commercial Waste Zones Program. As DSNY gained experience overseeing multiple implemented zones, the Department identified opportunities to further advance program goals and evaluate future policy considerations. The following recommendation reflects an area where continued refinement may support the effective operation and long-term success of the Commercial Waste Zones Program.

Expand Commercial Organics Requirements

Pursuant to Local Law 146 of 2013, the requirement to separate organic waste currently applies to certain commercial businesses based on factors including business type, size, and operational characteristics. Participation among commercial establishments remains limited.

To encourage greater participation, the Commercial Waste Zones Program provides a framework to support expanded commercial organics collection. Awardees are required to provide organics collection services and to offer those services at a discounted rate compared with refuse collection. Through the Program, DSNY also established reporting requirements that provide the Department with additional data on collected commercial waste streams, allowing DSNY to gain greater visibility into commercial organics service availability and customer participation. This data has also helped DSNY evaluate the feasibility and understand the potential impact of further expanding commercial organics requirements.

As the Department continued to roll out the Commercial Waste Zones Program, DSNY supported City Council legislation to expand organics separation requirements to additional commercial businesses, with the goal of increasing participation among commercial establishments and further supporting the City's waste diversion and sustainability goals.

On June 30, 2026, the City Council passed legislation subsequently enacted as Local Law 118 of 2026. The law expanded DSNY's authority to require commercial establishments that generate food waste or significant amounts of other organic waste to separate their organic waste. The law requires DSNY to designate additional covered establishments by December 1, 2026. Newly designated establishments will be required to comply beginning June 1, 2027, or on the final implementation date of the Commercial Waste Zone in which the establishment is located, whichever is later. Local Law 118 also requires Commercial Waste Zone awardees providing organics collection services to provide establishments with information regarding the donation of excess edible food.

DSNY is now implementing this legislation, including drafting rules to designate additional covered commercial establishments and evaluating processing capacity for such an expansion.

Appendix: Detailed FY26 Data Tables

Appendix A. Reporting Framework

To effectively review the FY26 Commercial Waste Zones data, it is important to understand the framework of the timeframe and content of the reporting data. The FY26 reporting period covers July 1, 2025 through June 30, 2026. Because zones reached final implementation at different points before or during the fiscal year, the amount of data represented, and the time period of data included, varies by zone and by the applicable reporting requirement. DSNY's rollout schedule establishes the implementation and final implementation dates for each zone as shown below.

Supporting FY26 Commercial Waste Zones datasets are available at nyc.gov/CWZReports.

A.1 FY26 Implementation and Reporting Periods

Phase	Zone	Implementation Start Date	Final Implementation Date	Post-Implementation Period Represented in FY26	# of months active in FY26
1	Queens Central	September 3, 2024	January 2, 2025	July 2025 - June 2026	12
2	Bronx East	October 1, 2025	November 30, 2025	December 2025 - June 2026	7
2	Bronx West	October 1, 2025	November 30, 2025	December 2025 - June 2026	7
3	Queens Northeast	January 1, 2026	February 28, 2026	March 2026 - June 2026	4
3	Brooklyn South	January 1, 2026	February 28, 2026	March 2026 - June 2026	4
4	Lower Manhattan	April 1, 2026	May 31, 2026	June 2026	1

A.2 Zone Awardees as of June 30, 2026

Local Law 199 authorizes DSNY to enter into agreements with up to three awardees in each Commercial Waste Zone and up to five additional awardees for citywide containerized commercial waste collection.

A.3 Table Conventions

Throughout the report, the following conventions will be used.

Value	Description
0	The reporting requirement was applicable, but no activity was reported for the period.
-	The reporting requirement was not applicable to the zone during the period shown.
N/R	The information was not reported for the applicable record.

Unless otherwise noted, totals reflect information reported or maintained for the applicable FY26 reporting period. Table-specific definitions, qualifications, or methodological notes are provided with the relevant appendix table where needed.

Appendix B: Business and Community Engagement

B.1 Transition Outreach by Zone

This section includes the total counts by zone during FY26 for phone calls, individual informational emails, in-person establishment visits, literature distributed.

B.1a Call Campaign

Zone	2025						2026						Totals
	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun	
Queens Central	0	0	0	0	0	2	4	1	0	1	0	0	8
Bronx East	-	-	-	9,377	3,056	590	0	0	0	0	0	0	13,023

C.2 Complaints / Feedback & Inquiries Definitions

Complaint Explanations	
Business / Carter Disputes	Complaints involving a dispute between a commercial establishment and its private carter that required DSNY review and resolution.
Commercial Waste Disposal	Service requests received through the NYC 311 system concerning commercial waste disposal.
No Private Carter / Decal not posted	Complaints concerning a commercial establishment that did not have a private carter or did not display the required Commercial Waste Zone decal in an implemented zone.
Feedback or Program Inquiry Explanations	
Post-Implementation Identified Business	Communications with a business identified in zones already implemented.
Private Carter Selection	Inquiries or feedback received through the webform, executive correspondence, or email concerning the selection of a private carter or a business's existing private carter service.
General Waste Management	Inquiries or feedback received through the webform concerning general waste management issues affecting commercial establishments.
Sources of Complaints / Feedback or Program Inquiries	
Webform / Referral	DSNY's Contact Us webform is available at nyc.gov/assets/dsny/forms/commercial-waste . Referrals are received from emails and telephone inquiries.
311-SR (Service Request)	Service requests received through the NYC 311 system.
311-EC (Executive Correspondence)	Agency correspondence received through the public agency contact form or forwarded through the NYC 311 system.

Appendix D: Customer Charges Reported by Awardees

Note: The full dataset supporting this summary table is available at nyc.gov/CWZReports.

For Tables D.1—D.3 see pages 35-37.

Appendix E: Disposal Costs (Costs to Dump)

Note: The full dataset supporting this summary table is available at nyc.gov/CWZReports.

For Tables E.1—E.3 see pages 38-40.

H.2 Enforcement Definitions

Carter Type Definitions	
Authorized Zone Carter (AZC)	Enforcement activity within the zone for zone awardees, city-wide containerized awardees, and designated carters.
Non-CWZ	Enforcement activity in the zone for all waste carters and other commercial operators that do not currently have any CWZ awards.
Other CWZ	Enforcement activity in the zone for all zone awardees or designated carters who do not have awards in the zone but do have CWZ awards in other zone(s).
Violation Types
