REPORT
OF THE
DEPARTMENT OF PARKS
FOR 1891.

DEPARTMENT OF PARKS,
Room 4, City Hall,
BROOKLYN, January 31st, 1893. }

To the Honorable the Common Council.

GENTLEMEN:—

The Commissioners of the Department of Parks hereby furnish your Honorable Body with a full report of their proceedings for the year 1891, embracing a detailed statement of their receipts and expenditures for that time.

The Commissioners of the Department of Parks would respectfully report that the Board of Estimate appropriated for the year 1891 \$389,810 for Public Parks and Parkways, and \$4,000 for Coney Island Concourse and Parade Ground. These amounts, together with \$141,018.79 for balances over from 1889 and 1890, made the amount available for Park purposes for 1891, \$534,828.79. Of this amount there has been expended during the year 1891, \$399,492.28, leaving a balance of \$135,336.51, against which there are some bills and balances of contracts outstanding.

Below please find a synopsis furnished by the Superin-

tendent of Parks of the work done by this Department during the year 1891.

MAINTENANCE.

The regular routine of maintenance consisted, as usual, in caring for drives, walks, bridle roads, lawns, trees and shrubs, propagating and caring for plants, flower beds, drainage of land and drives, the general repairs of buildings, rolling stock, fences, etc., etc.

PROPAGATING HOUSES AND FLOWER GARDENS.

Although the commencement of propagating was delayed until the first of February, owing to the extensions of the houses not being ready, all of the bedding plants needed for the Department, consisting of over two hundred thousand (200,000) plants, were propagated, together with the disposal of fifty-five thousand (55,000) bulbs, under the supervision of Mr. D. C. Thomson, Head Gardener, in charge of the greenhouses.

TREES AND SHRUBS.

The additions to the nurseries, the planting and transplanting of trees and shrubs to the different Parks and Parkways, the pruning of trees and shrubs, cutting down dead wood and the removal of superfluous undergrowth have been continued, with very satisfactory results.

PROSPECT PARK DRIVES.

The new drive from Breeze Hill and the new bridge, together with gutters, drains, basins, curbs and sidewalks, has been completed to the junction of the West Drive, between Gates 4 and 5. This and the centre drive from Gate 5 to the Music Stand have been laid with double screened Roa Hook gravel, and all of the drives kept in repair with the same material, as well as the bridle roads.

WALKS LAID WITH CHEMICAL TAR AND GRAVEL
COMPOSITION.

The following walks have been laid this year with chemical tar and gravel composition : Walk in Long Meadow, from crosswalk to Dairy around Croquet Shelter, and continued, with new drains and basins, to Endale Arch, near the Plaza entrance ; also the wide walk, through the centre of the Meadow from Esdale Bridge, opposite Farm House, to Endale Arch ; the whole of the walks around Concert Grove, lower end of Flower Garden, and continued to Breeze Hill and the new bridge, returning over Breeze Hill and joining the asphalt pavement blocks at the Flower Garden, near the Cleft Ridge Span ; from the Concert Grove along the lake around the Carriage Concourse to opposite the Promenade, and branches to the lake shelters, returning from the Promenade on the Franklin Avenue side of the drive to Gate 3.

A new walk was made and asphalted from the south end of the new bridge, along the new drive, to walks along the West Lake Drive, and a base laid to the new walk continuing from Lookout Hill under the bridge connecting with old walks leading to the Boat House.

OCEAN PARKWAY.

Independent of the gravel for repairing the lower section of the Parkway from the Department's gravel-pits, about nine thousand cubic yards of gravel have been laid from the Cemetery below the Tunnel to the crossroad below Howe's Hotel, and for general repairs of the upper section. Also, about 1,800 cubic yards of Hudson River gravel has been laid from the Concourse at Gate 4 to below Church Lane, to solidify the soft ground in that shady part of the drive. New drains and cesspools have been made, which have thoroughly drained off the accumulated water at Avenue E.

The culvert near Coney Island, 225 feet in length, has

been built entirely new, with basins to take off the Parkway water into the same.

The Shelter at Coney Island was relaid with new flooring and new stairs built to enter the same.

Two hundred and eighteen maples, elms and willows have been planted on the Parkway, making up for trees that have died.

EASTERN PARKWAY.

New base for gravel from side banks of the road has been put to near the east end of the Parkway, double screened Roa Hook gravel surfacing the same, and packed to above Brooklyn Avenue.

The regular maintenance of the road has been attended to, and the gutters of the side roads cleaned, with seventy-five trees planted to make up for deficiencies by dead trees.

New walks were also formed and asphalted in the Park at Third street and Ninth Avenue. The finishing of new curbs has been done from the Plaza to Third street.

MECHANICAL AND ARTIFICERS' WORK.

The general repairs of Rolling Stock required continual attention, comprising watering carts, trucks and carts, road scrapers, lawn mowers and implements and tools of every description. The following principal items only are enumerated:

A new shed for Rolling Stock, 280 feet long, was built in the yard at Seventh Street and Ninth Avenue. Columns repaired and new floors and beams built at the Litchfield Mansion. Laying new floors at the Lake House. Repairing the Shelters of all the City Parks, and at the Plaza Entrance. Repairing park fences on Ocean Avenue, Franklin Avenue and Coney Island Road. General repairs to all buildings and the erection of three new Rustic Arbors. Putting up new drinking fountains and hydrants, with new display fountains at the Pool, Pros-

pect Park and City Hall Park. Repairing old settees and making five hundred new settees at the Department Work shops.

The "Litchfield Mansion," Greenhouses, Stables, Barn and Railings at Farm House, railings of Tompkins and Carroll Parks, Gates at Fort Greene, Rolling Stock and Settees have all been painted, with numerous signs painted and lettered.

CITY PARK.

The remaining walks inside City Park not asphalted have been laid with Trinidad Asphalt, and the outside walks around the park have been laid with Rock Asphalt and the curbs and gutters repaired.

From the sum of five hundred thousand dollars that had heretofore been appropriated for permanent improvement of Prospect Park, by Act of the Legislature, \$134,145.85 was spent in the purchase of Winthrop Park in the 17th ward and \$105,308.25 for Bushwick Park in the 18th ward and a considerable amount for permanent improvements in Prospect Park, leaving a balance of \$61,123.75 at the beginning of the year, which in February was transferred to the Park Site Improvement Fund, which, with the balance already in that Fund, amounted to \$89,652.80 available for this special purpose. From this amount there has been expended during the year \$39,971.18, nearly all of which was used on and about Breeze Hill Bridge and extension of road along the Lake. The balance remaining in this Fund is \$49,681.62.

In April of this year the Legislature passed a law authorizing the sale of Bonds to the extent of nearly \$500,000, the proceeds to be applied to the purchase of lands for small parks (see chapter 246). Under the law, two requisitions have been made on the Comptroller during the year, one on July 30, 1891, for \$184,000, which was expended for a part of the land required for Park on Ridgewood Heights, and one on December 24, 1891, for \$165,000, of which \$164,603.65 was

expended for four blocks of land, bounded by Fifth and Seventh Avenues and 41st and 43d Streets (about 15 acres), to be known as Sunset Park.

The report for the year 1891 has been unavoidably delayed.

There were several circumstances contributed to retard it. The former Secretary, Robert Courtney, and the Chief Clerk and Paymaster, Charles F. Moore, were each taken ill, and after a long and painful sickness, both died. They being the principal clerical force, it was impossible for the Department to do more than the necessary daily work.

As soon as the new officers became acquainted with their respective duties, they have been engaged all their spare time in preparing the reports for 1891 and 1892.

Very Respectfully,

GEORGE V. BROWER,

President.

M. A. McNAMARA,

Captain.

To ANEURIN JONES,

General Superintendent.

REPORT
OF THE
DEPARTMENT OF PARKS
FOR 1892.

DEPARTMENT OF PARKS,
Room 4, City Hall,
BROOKLYN, January 31, 1893. }

To the Honorable the Common Council.

GENTLEMEN:—

I herewith furnish your Honorable Body with a full Report of my proceedings for the year 1892, embracing a detailed statement of receipts and expenditures for that time.

The Commissioner of the Department of Parks would respectfully report that the Board of Estimate appropriated for the year 1892, \$387,510 for Public Parks and Parkways and \$3,800 for the Parade Ground. These amounts, together with \$135,336.51, for balances over from 1891, made the amount available for Park purposes for 1892 \$526,646.51. Of this amount there have been expended during the year 1892, \$395,007.39, leaving a balance of \$131,639.12, against which there are sundry bills yet unsettled.

From the balance, \$49,681.62, remaining to the credit of Park Site Improvement Fund, for permanent improvements

in and around Prospect Park, at the beginning of the year, \$30,268 have been expended, mainly, in paying balances of contracts in construction of Breeze Hill Bridge and remodelling the concourse on Breeze Hill for a perennial garden.

During the year land for two small parks has been purchased, under the Laws of 1891 and amended in 1892, authorizing moneys to be raised for that purpose, to wit: On June 15th, the block bounded by Prospect and Park places and Brooklyn and Kingston Avenues in the 24th Ward was acquired at a cost of \$150,132.77, and will be known as "Bedford Park."

On Nov. 21st land in the 12th ward was purchased, consisting of nearly two full blocks lying between Richards, Dwight, William and Verona streets, and for which \$132,745 was paid. An additional block adjoining the above will be needed to complete the plot for this park and for which this Department now holds an option.

Herewith, please find a synopsis furnished by the Superintendent of Parks of the work done by this Department during the year 1892 :

MAINTENANCE.

The regular routine of maintenance has consisted, as usual, in caring for lawns, drives, bridle roads, trees and shrubs, flower gardens and beds in small parks, greenhouses, stables and work shops, with general repairs of buildings, shelters, rustic work, fences, rolling stock, machinery, etc.

The unusual drought during the latter part of the summer caused an increased amount of work for the sprinklers, both in Prospect Park and on the Parkways, requiring constant work from the entire force. The early snow storms and commencement of the skating season caused more than the usual labor on the Lake and in the care of walks and drives.

PROSPECT PARK DRIVES AND BRIDLE ROADS.

The Prospect Park drives have demanded constant care to maintain them at the required standard of excellence, and 2,577 cubic yards of Roa Hook gravel were used in their maintenance, besides large quantities of bank gravel obtained in excavating, which was also used on bridle roads and walks.

The circuit drive over Nethermead Arches and down to the Willink Entrance, and the East Lake Drive were nearly all re-constructed, and the whole length of the drives worked over and patched where the old gravel was gullied or wearing off.

Plaza Street, outside of the West Mound, has had an entire *new* coating of Roa Hook gravel from four to six inches thick.

WALKS LAID WITH CHEMICAL TAR AND GRAVEL.

Extensive work has been done in constructing new walks and repairing worn ones in Prospect Park. New ones have been built on the peninsula on the north side of the Lake, and running under the new bridge on both sides of the stream. The walk leading from near the new bridge to the top of Lookout Hill has been renewed, as well as the one from Cleft Ridge Span to the new bridge; also the one from the bridge to the Flower Garden along the lake shore and along the east shore of the lake from near the Flower Garden to the Ford Bridge.

The walk east of the East Lake Drive was re-surfaced from near the Willink Entrance, along the east and south sides of the Park, to the Ocean Parkway Entrance (Gate 4). From the other side of this entrance it was continued until it crosses the West Drive. A new walk was constructed from the Farm House over the hill to the Circuit Drive, and smaller portions at the Main Entrance and northeast of the Department Offices.

Defective places were repaired at the Willink Entrance

and at Gate 4, and numerous small defective places were removed and repaired in nearly all parts of Prospect Park. The entire new walks in Carroll Park were laid with the first coat and prepared for surfacing the coming season. 800 barrels of chemical tar and 2,830 cubic yards of gravel were used in the work, paving 226,043 square feet. The entire roadway outside of Willink Entrance and the semi-circle at Gate 3 have been paved in the best manner with asphalt road pavement.

GREENHOUSES AND FLOWER GARDEN.

The new propagating houses have demonstrated their usefulness by supplying all the bedding plants (upwards of two hundred and eighty thousand), that were required by the Department, excepting some new varieties that were purchased.

The new tank was successfully used to keep the tropical water lilies over winter, and when planted out again in the different ponds and fountain basins they renewed their luxuriance and afforded great satisfaction to many thousand visitors. The greenhouses are now filled with a valuable collection of plants obtained by purchase and the gifts of public-spirited citizens. Over seventy thousand (70,000) bulbs—tulips, hyacinths, narcissi, crocus, scyllas, lilies, etc.—have been planted in the different flower gardens and small parks for a display the coming season.

TREES AND SHRUBS.

In addition to the care of the nurseries, some two hundred and twenty trees of a permanent character have been planted upon the sidewalks and parkways, and preparation of the ground made to continue the work of replacing missing ones the coming spring.

The removal of dead wood and superfluous growth has been steadily continued and extensive pruning practised with most satisfactory results. One thousand rhododen-

drons and about twelve hundred deciduous shrubs were successfully planted in the spring, and preparations made for extensive additions the coming season. A hedge of privet has been planted on the 9th avenue side of Prospect Park, from Flatbush avenue to 3d street.

A collection of lilacs, numbering two hundred plants in nearly every known variety, has been planted in groups in the vicinity of the well, and will be increased the coming season.

IMPROVEMENTS ON BREEZE HILL AND VICINITY OF NEW BRIDGE.

The entire surface of the slopes around the new bridge and road leading from it to the West Lake drive has been graded, covered with soil and sown down to lawn. The adjacent shores of the lake have been strengthened with stones to prevent washing away, and the new ground enriched and prepared for planting. The old concourse on Breeze Hill, no longer useful for the purpose for which it was designed, has been laid out as a garden for herbaceous perennials, with drives directly among the flower beds, adding a new and distinct feature to the park.

The new road has been constructed with paved gutters and curbstones. The walks have been prepared for paving with asphalt blocks (now on the ground), and the entire surface of the beds covered with rich soil of an average depth of over two feet and many plants already planted in it.

MECHANICAL AND ARTIFICERS' WORK.

The general repairs of rolling stock—watering carts, trucks, rollers, wagons, lawn-mowers and road scrapers—have required continual attention, as well as the fifteen miles of water mains, extending around Prospect Park and down the Ocean Parkway to Coney Island, with all the hydrants, connections, washers, display and drinking fountains.

The Flower Garden shelter, Boat House and some of the shelters in the smaller parks have required extensive repairs as well as the rustic shelters and arbors, which have been put in order, also the railings, bridges and other rustic work.

New bottoms have been put in all of the benches in the hot houses and the entire structures painted and glazing put in order. A new boiler and course of hot water pipe have been added to the large house. The Lullwood bridge has been entirely rebuilt and the Ford bridge refloored.

A shelter for the attendant at the Horse Bowl has been built, and frames and hot beds to accommodate one hundred lights of sash have been constructed, as well as a cold pit 50 feet long, which was bricked and glazed. New timbers and floors have been put in the Carrousel, as well as ceiling and roof.

New timbers and floor have been put into the balcony at the "Litchfield Mansion," with repairs to the large fluted columns and minor repairs to many parts of the building. A rustic arbor was built near the Farm House. Three portable stands were built for parades, and seats for 15,000 people during the Sunday School anniversary. One thousand new settees were made and five hundred old ones repaired.

In addition to keeping all rolling stock in repair, there have been built three new road sprinklers, two road rollers, three road scrapers, two snow plows and two hundred iron tree boxes.

Over one thousand seven hundred feet of pipe fence was built on 9th Avenue. Six water closets and urinals, with new floors and timbers, were built at the barn, and six with floor and timbers at Boat House.

Also kept in repair those at Prospect and the outside parks, one hundred and twenty all told.

Five hundred feet of new four-inch water main, with four connections for hydrants, were laid on Breeze Hill. Forty-seven new catch basins and eighteen hundred feet of six-

inch drain pipe were put in the different parks. Forty basin heads were raised or lowered to suit the new grades of walks. Many of the stone steps around the Farm House and Flower Garden were reset, and the curb around the Irving bust was changed and improved. A new drinking fountain was put in on the walk opposite the Well, and the water main at Coney Island was lowered to connect with the new sewer.

The music stands at Prospect and Washington Parks were both painted. The additions at the Barn and fence around barnyard and the new fence on 9th Avenue were all painted. The various cast iron fountains and the iron fences around City, Tompkins, Underhill and Cumberland Parks, also the gates at Washington Park and small fence at main entrance to Prospect Park, and the Well House, inside and out, were painted during the season, also one thousand five hundred settees, three hundred tree boxes, nineteen sprinklers, two wagons, two rollers, three scrapers and two snow plows, the iron fence and vases at Flower Garden.

WINTHROP PARK.

The grading has been finished and the entire lawn surface sown down and put in good condition. The drainage system has been completed and connected with the city sewer, and thirty-eight new catch basins built at required points, connected by 1,600 feet of six-inch cement pipe. The ground has been prepared for replacing missing street trees and doing additional planting in the spring.

BUSHWICK PARK.

The ground here being in a state entirely unfit for park purposes, all the soil had to be carted in. Good progress has been made in grading and laying out the walks according to the accepted plan, and covering with soil as it can be obtained. About 1,200 feet of the walks have been graded

and filled in preparatory to covering with pavement, and 300 feet of sidewalk has been cut through to grade on Starr Street. About 2,600 cubic yards of soil have been moved.

OCEAN PARKWAY.

The gutters and drains along the entire length of this parkway have been dug out and kept in order, and the trees have been pruned. Two new catch basins and a drain pipe leading to the old gravel pit have greatly improved the drainage in that vicinity. 1525 cubic yards of Roa Hook gravel have been laid, from where it ended just below Church Lane, last season, to beyond the Hollow, and packed and rolled with the steam roller. 2000 cubic yards of bank gravel were put on between the Tunnel and Coney Island. The long and severe drought rendered the daily use of the road sprinklers necessary until late in the Fall, consequently adding to the necessary expense of maintenance.

EASTERN PARKWAY.

Besides the regular maintenance, cleaning, sprinkling, etc., the gutters have been dug out and kept clear on all the roads. The trees have been pruned and the smaller ones protected by iron tree boxes. The trees are cultivated and manured as other work permits. 673 cubic yards of Roa Hook gravel have been placed on the road.

CARROLL PARK.

Although work was decided upon late in the season and a new design adopted, the entire plan of the park has been changed and the whole place remodelled and improved. The old fence has been removed and a new one of lighter design put in its place. All the new walks have been laid with a first coat of chemical tar and gravel, and are ready for the surface finish in the spring. The ground has been graded and preparations made for sowing down the coming

season, and a fountain basin prepared for the small plaza in the centre of the park.

WORK IN OTHER PARKS.

The work in the other parks and small squares of the city has consisted of their regular care, cleaning, mowing, watering and caring for the trees, shrubs, flower beds and fountains.

By an act of the Legislature of 1892, the Department of Parks was made a single-headed Commission, and, by virtue of said act, Marvin Cross, Esq., a member of the former commission, was appointed by the Commissioner as his Deputy. This change in the management of the affairs of the Park will no doubt prove beneficial.

It has long been known by arboriculturists that our plantations in Prospect Park, which contained some of the finest specimens of trees from all parts of the world, were becoming overcrowded in many places, and in other portions were weak. Many of the finest trees were crowded out by inferior and rapidly growing trees, threatening extermination of the better kinds. These trees were originally planted close, so as to produce immediate effects, the designers intending to remove many from time to time as occasion demanded.

For a number of years they were neglected, and when the time came to remove them public clamor among the ignorant that "trees were being cut down and the Park destroyed" deterred some of my predecessors from removing them. This work, under careful supervision and with the advice of the best experts that can be obtained, has been proceeded with during the last two years, and with very little criticism, the public having begun to realize, as has the Department, that the work is necessary to the safety and beauty of our plantations, and in a few years these trees, that are ungainly, will be beautiful and sightly, and the finer specimens, which are of slow growth, will survive.

The confidence of the public in our work has been increased by the planting of new trees wherever the plantations are weak, and the caring for and nursing of trees throughout the Park and on the Boulevards.

Our forests, which are mostly on steep hillsides, have been injured by the continual wash of the heavy rains, and in many portions the roots have been left partially bare. To obviate this we have planted vines or low shrubbery that will grow in the shade, and also grass in the early spring. The shade, however, kills the grass before the summer is over, but the little fibrous roots assist materially in holding the soil together. It has been decided to cover all the places made bare with a good strong sod, taking a section of the Park every year until the work is accomplished. This will give nutrition to the trees, and restore in a great measure what has been washed away.

The horticultural department has been greatly enlarged. All plants and flowers used in our various Parks are raised in Prospect Park propagating houses, at a much less cost than buying them and of a superior quality. In addition the greenhouse is open to the public during the winter months, where a choice collection of ferns and other tropical plants and flowers are on exhibition, and in summer these same plants are used for filling of vases and other decorations in the Flower Garden.

The work of the Department is continually growing, owing to the increasing population that must be provided for, and the construction and maintaining of other parks located throughout the city.

The subject of preserving and maintaining the small parks is receiving a great deal of attention, and when these parks are put in order they should be well lighted and policed. They ought to be at all times of the day and night a comfort and pleasure to the citizens, and not, as has been and still is, in some of the Parks, a menace to all who have to pass through or use the same after nightfall.

It would seem to be very desirable that sufficient money

be obtained to complete the purchase or condemnation of the balance of the land between the City's reservoir property and the Evergreens Cemetery, it being adjacent to the property already purchased for Highland Park. It would prevent the encroachment of the Cemeteries up to the reservoir for our water supply, and also get rid of a nuisance that pollutes the atmosphere and at times the water of the reservoir.

The two blocks heretofore purchased in the Twelfth ward for a Park are wholly inadequate for the wants of such a densely populated neighborhood, and at least one more block should be procured. The Department has an option to purchase or condemn, but has not sufficient money to avail itself of the privilege.

Respectfully submitted,

GEO. V. BROWER,
Commissioner.

ANNUAL REPORT OF THE POLICE DEPARTMENT
OF THE DEPARTMENT OF PARKS,
FOR THE YEAR 1892.

ANNUAL REPORT OF POLICE FORCE, 1892.

1 Captain.
8 Sergeants.
79 Patrolmen.
Total force—88.

Distributed as follows :

PROSPECT PARK—7 sergeants, 60 patrolmen.
WASHINGTON PARK—1 sergeant, 6 patrolmen.
TOMPKINS PARK—3 patrolmen.
CARROLL PARK—3 patrolmen.
CITY PARK—2 patrolmen.
WINTHROP PARK—1 patrolman.
EASTERN PARKWAY—1 patrolman.
OCEAN PARKWAY—3 patrolmen.

GAIN DURING THE YEAR.

By Appointment.....19 Patrolmen.
By Promotion from Patrolmen to Sergeants.. 2

LOSS DURING THE YEAR.

By Death.....2 Patrolmen and 1 Sergeant.
By Resignation4 Patrolmen.

Net Gain..... 1 Sergeant.
Net Gain.....11 Patrolmen.

APPOINTED SPECIAL POLICEMEN.

REPORT
OF THE
DEPARTMENT OF PARKS
FOR 1891.

DEPARTMENT OF PARKS,
Room 4, City Hall,
BROOKLYN, January 31st, 1893. }

To the Honorable the Common Council.

GENTLEMEN:—

The Commissioners of the Department of Parks hereby furnish your Honorable Body with a full report of their proceedings for the year 1891, embracing a detailed statement of their receipts and expenditures for that time.

The Commissioners of the Department of Parks would respectfully report that the Board of Estimate appropriated for the year 1891 \$389,810 for Public Parks and Parkways, and \$4,000 for Coney Island Concourse and Parade Ground.

- These amounts, together with \$141,018.79 for balances over from 1889 and 1890, made the amount available for Park purposes for 1891, \$534,828.79. Of this amount there has been expended during the year 1891, \$399,492.28, leaving a balance of \$135,336.51, against which there are some bills and balances of contracts outstanding.

Below please find a synopsis furnished by the Superin-

tendent of Parks of the work done by this Department during the year 1891.

MAINTENANCE.

The regular routine of maintenance consisted, as usual, in caring for drives, walks, bridle roads, lawns, trees and shrubs, propagating and caring for plants, flower beds, drainage of land and drives, the general repairs of buildings, rolling stock, fences, etc., etc.

PROPAGATING HOUSES AND FLOWER GARDENS.

Although the commencement of propagating was delayed until the first of February, owing to the extensions of the houses not being ready, all of the bedding plants needed for the Department, consisting of over two hundred thousand (200,000) plants, were propagated, together with the disposal of fifty-five thousand (55,000) bulbs, under the supervision of Mr. D. C. Thomson, Head Gardener, in charge of the greenhouses.

TREES AND SHRUBS.

The additions to the nurseries, the planting and transplanting of trees and shrubs to the different Parks and Parkways, the pruning of trees and shrubs, cutting down dead wood and the removal of superfluous undergrowth have been continued, with very satisfactory results.

PROSPECT PARK DRIVES.

The new drive from Breeze Hill and the new bridge, together with gutters, drains, basins, curbs and sidewalks, has been completed to the junction of the West Drive, between Gates 4 and 5. This and the centre drive from Gate 5 to the Music Stand have been laid with double screened Roa Hook gravel, and all of the drives kept in repair with the same material, as well as the bridle roads.

WALKS LAID WITH CHEMICAL TAR AND GRAVEL
COMPOSITION.

The following walks have been laid this year with chemical tar and gravel composition : Walk in Long Meadow, from crosswalk to Dairy around Croquet Shelter, and continued, with new drains and basins, to Endale Arch, near the Plaza entrance ; also the wide walk, through the centre of the Meadow from Esdale Bridge, opposite Farm House, to Endale Arch ; the whole of the walks around Concert Grove, lower end of Flower Garden, and continued to Breeze Hill and the new bridge, returning over Breeze Hill and joining the asphalt pavement blocks at the Flower Garden, near the Cleft Ridge Span ; from the Concert Grove along the lake around the Carriage Concourse to opposite the Promenade, and branches to the lake shelters, returning from the Promenade on the Franklin Avenue side of the drive to Gate 3.

A new walk was made and asphalted from the south end of the new bridge, along the new drive, to walks along the West Lake Drive, and a base laid to the new walk continuing from Lookout Hill under the bridge connecting with old walks leading to the Boat House.

OCEAN PARKWAY.

Independent of the gravel for repairing the lower section of the Parkway from the Department's gravel-pits, about nine thousand cubic yards of gravel have been laid from the Cemetery below the Tunnel to the crossroad below Howe's Hotel, and for general repairs of the upper section. Also, about 1,800 cubic yards of Hudson River gravel has been laid from the Concourse at Gate 4 to below Church Lane, to solidify the soft ground in that shady part of the drive. New drains and cesspools have been made, which have thoroughly drained off the accumulated water at Avenue E.

The culvert near Coney Island, 225 feet in length, has

been built entirely new, with basins to take off the Parkway water into the same.

The Shelter at Coney Island was relaid with new flooring and new stairs built to enter the same.

Two hundred and eighteen maples, elms and willows have been planted on the Parkway, making up for trees that have died.

EASTERN PARKWAY.

New base for gravel from side banks of the road has been put to near the east end of the Parkway, double screened Roa Hook gravel surfacing the same, and packed to above Brooklyn Avenue.

The regular maintenance of the road has been attended to, and the gutters of the side roads cleaned, with seventy-five trees planted to make up for deficiencies by dead trees.

New walks were also formed and asphalted in the Park at Third street and Ninth Avenue. The finishing of new curbs has been done from the Plaza to Third street.

MECHANICAL AND ARTIFICERS' WORK.

The general repairs of Rolling Stock required continual attention, comprising watering carts, trucks and carts, road scrapers, lawn mowers and implements and tools of every description. The following principal items only are enumerated:

A new shed for Rolling Stock, 280 feet long, was built in the yard at Seventh Street and Ninth Avenue. Columns repaired and new floors and beams built at the Litchfield Mansion. Laying new floors at the Lake House. Repairing the Shelters of all the City Parks, and at the Plaza Entrance. Repairing park fences on Ocean Avenue, Franklin Avenue and Coney Island Road. General repairs to all buildings and the erection of three new Rustic Arbors. Putting up new drinking fountains and hydrants, with new display fountains at the Pool, Pros-

pect Park and City Hall Park. Repairing old settees and making five hundred new settees at the Department Work shops.

The "Litchfield Mansion," Greenhouses, Stables, Barn and Railings at Farm House, railings of Tompkins and Carroll Parks, Gates at Fort Greene, Rolling Stock and Settees have all been painted, with numerous signs painted and lettered.

CITY PARK.

The remaining walks inside City Park not asphalted have been laid with Trinidad Asphalt, and the outside walks around the park have been laid with Rock Asphalt and the curbs and gutters repaired.

From the sum of five hundred thousand dollars that had heretofore been appropriated for permanent improvement of Prospect Park, by Act of the Legislature, \$134,145.85 was spent in the purchase of Winthrop Park in the 17th ward and \$105,308.25 for Bushwick Park in the 18th ward and a considerable amount for permanent improvements in Prospect Park, leaving a balance of \$61,123.75 at the beginning of the year, which in February was transferred to the Park Site Improvement Fund, which, with the balance already in that Fund, amounted to \$89,652.80 available for this special purpose. From this amount there has been expended during the year \$39,971.18, nearly all of which was used on and about Breeze Hill Bridge and extension of road along the Lake. The balance remaining in this Fund is \$49,681.62.

In April of this year the Legislature passed a law authorizing the sale of Bonds to the extent of nearly \$500,000, the proceeds to be applied to the purchase of lands for small parks (see chapter 246). Under the law, two requisitions have been made on the Comptroller during the year, one on July 30, 1891, for \$184,000, which was expended for a part of the land required for Park on Ridgewood Heights, and one on December 24, 1891, for \$165,000, of which \$164,603.65 was

expended for four blocks of land, bounded by Fifth and Seventh Avenues and 41st and 43d Streets (about 15 acres), to be known as Sunset Park.

The report for the year 1891 has been unavoidably delayed.

There were several circumstances contributed to retard it. The former Secretary, Robert Courtney, and the Chief Clerk and Paymaster, Charles F. Moore, were each taken ill, and after a long and painful sickness, both died. They being the principal clerical force, it was impossible for the Department to do more than the necessary daily work.

As soon as the new officers became acquainted with their respective duties, they have been engaged all their spare time in preparing the reports for 1891 and 1892.

Very Respectfully,

GEORGE V. BROWER,

President.

M. A. McNAMARA,

To ANEURIN JONES,

Captain.

General Superintendent.

NYPHOTOBRAYURE.CO

EARLY AFTERNOON OCEAN BOULEVARD.

REPORT
OF THE
DEPARTMENT OF PARKS
FOR 1892.

DEPARTMENT OF PARKS,
Room 4, City Hall,
BROOKLYN, January 31, 1893. }

To the Honorable the Common Council.

GENTLEMEN:—

I herewith furnish your Honorable Body with a full Report of my proceedings for the year 1892, embracing a detailed statement of receipts and expenditures for that time.

The Commissioner of the Department of Parks would respectfully report that the Board of Estimate appropriated for the year 1892, \$387,510 for Public Parks and Parkways and \$3,800 for the Parade Ground. These amounts, together with \$135,336.51, for balances over from 1891, made the amount available for Park purposes for 1892 \$526,646.51. Of this amount there have been expended during the year 1892, \$395,007.39, leaving a balance of \$131,639.12, against which there are sundry bills yet unsettled.

From the balance, \$49,681.62, remaining to the credit of Park Site Improvement Fund, for permanent improvements

in and around Prospect Park, at the beginning of the year, \$30,268 have been expended, mainly, in paying balances of contracts in construction of Breeze Hill Bridge and remodelling the concourse on Breeze Hill for a perennial garden.

During the year land for two small parks has been purchased, under the Laws of 1891 and amended in 1892, authorizing moneys to be raised for that purpose, to wit: On June 15th, the block bounded by Prospect and Park places and Brooklyn and Kingston Avenues in the 24th Ward was acquired at a cost of \$150,132.77, and will be known as "Bedford Park."

On Nov. 21st land in the 12th ward was purchased, consisting of nearly two full blocks lying between Richards, Dwight, William and Verona streets, and for which \$132,745 was paid. An additional block adjoining the above will be needed to complete the plot for this park and for which this Department now holds an option.

Herewith, please find a synopsis furnished by the Superintendent of Parks of the work done by this Department during the year 1892 :

MAINTENANCE.

The regular routine of maintenance has consisted, as usual, in caring for lawns, drives, bridle roads, trees and shrubs, flower gardens and beds in small parks, greenhouses, stables and work shops, with general repairs of buildings, shelters, rustic work, fences, rolling stock, machinery, etc.

The unusual drought during the latter part of the summer caused an increased amount of work for the sprinklers, both in Prospect Park and on the Parkways, requiring constant work from the entire force. The early snow storms and commencement of the skating season caused more than the usual labor on the Lake and in the care of walks and drives.

PROSPECT PARK DRIVES AND BRIDLE ROADS.

The Prospect Park drives have demanded constant care to maintain them at the required standard of excellence, and 2,577 cubic yards of Roa Hook gravel were used in their maintenance, besides large quantities of bank gravel obtained in excavating, which was also used on bridle roads and walks.

The circuit drive over Nethermead Arches and down to the Willink Entrance, and the East Lake Drive were nearly all re-constructed, and the whole length of the drives worked over and patched where the old gravel was gullied or wearing off.

Plaza Street, outside of the West Mound, has had an entire *new* coating of Roa Hook gravel from four to six inches thick.

WALKS LAID WITH CHEMICAL TAR AND GRAVEL.

Extensive work has been done in constructing new walks and repairing worn ones in Prospect Park. New ones have been built on the peninsula on the north side of the Lake, and running under the new bridge on both sides of the stream. The walk leading from near the new bridge to the top of Lookout Hill has been renewed, as well as the one from Cleft Ridge Span to the new bridge; also the one from the bridge to the Flower Garden along the lake shore and along the east shore of the lake from near the Flower Garden to the Ford Bridge.

The walk east of the East Lake Drive was re-surfaced from near the Willink Entrance, along the east and south sides of the Park, to the Ocean Parkway Entrance (Gate 4). From the other side of this entrance it was continued until it crosses the West Drive. A new walk was constructed from the Farm House over the hill to the Circuit Drive, and smaller portions at the Main Entrance and northeast of the Department Offices.

Defective places were repaired at the Willink Entrance

and at Gate 4, and numerous small defective places were removed and repaired in nearly all parts of Prospect Park. The entire new walks in Carroll Park were laid with the first coat and prepared for surfacing the coming season. 800 barrels of chemical tar and 2,830 cubic yards of gravel were used in the work, paving 226,043 square feet. The entire roadway outside of Willink Entrance and the semi-circle at Gate 3 have been paved in the best manner with asphalt road pavement.

GREENHOUSES AND FLOWER GARDEN.

The new propagating houses have demonstrated their usefulness by supplying all the bedding plants (upwards of two hundred and eighty thousand), that were required by the Department, excepting some new varieties that were purchased.

The new tank was successfully used to keep the tropical water lilies over winter, and when planted out again in the different ponds and fountain basins they renewed their luxuriance and afforded great satisfaction to many thousand visitors. The greenhouses are now filled with a valuable collection of plants obtained by purchase and the gifts of public-spirited citizens. Over seventy thousand (70,000) bulbs—tulips, hyacinths, narcissi, crocus, scyllas, lilies, etc.—have been planted in the different flower gardens and small parks for a display the coming season.

TREES AND SHRUBS.

In addition to the care of the nurseries, some two hundred and twenty trees of a permanent character have been planted upon the sidewalks and parkways, and preparation of the ground made to continue the work of replacing missing ones the coming spring.

The removal of dead wood and superfluous growth has been steadily continued and extensive pruning practised with most satisfactory results. One thousand rhododen-

drons and about twelve hundred deciduous shrubs were successfully planted in the spring, and preparations made for extensive additions the coming season. A hedge of privet has been planted on the 9th avenue side of Prospect Park, from Flatbush avenue to 3d street.

A collection of lilacs, numbering two hundred plants in nearly every known variety, has been planted in groups in the vicinity of the well, and will be increased the coming season.

IMPROVEMENTS ON BREEZE HILL AND VICINITY OF NEW BRIDGE.

The entire surface of the slopes around the new bridge and road leading from it to the West Lake drive has been graded, covered with soil and sown down to lawn. The adjacent shores of the lake have been strengthened with stones to prevent washing away, and the new ground enriched and prepared for planting. The old concourse on Breeze Hill, no longer useful for the purpose for which it was designed, has been laid out as a garden for herbaceous perennials, with drives directly among the flower beds, adding a new and distinct feature to the park.

The new road has been constructed with paved gutters and curbstones. The walks have been prepared for paving with asphalt blocks (now on the ground), and the entire surface of the beds covered with rich soil of an average depth of over two feet and many plants already planted in it.

MECHANICAL AND ARTIFICERS' WORK.

The general repairs of rolling stock—watering carts, trucks, rollers, wagons, lawn-mowers and road scrapers—have required continual attention, as well as the fifteen miles of water mains, extending around Prospect Park and down the Ocean Parkway to Coney Island, with all the hydrants, connections, washers, display and drinking fountains.

The Flower Garden shelter, Boat House and some of the shelters in the smaller parks have required extensive repairs as well as the rustic shelters and arbors, which have been put in order, also the railings, bridges and other rustic work.

New bottoms have been put in all of the benches in the hot houses and the entire structures painted and glazing put in order. A new boiler and course of hot water pipe have been added to the large house. The Lullwood bridge has been entirely rebuilt and the Ford bridge re floored.

A shelter for the attendant at the Horse Bowl has been built, and frames and hot beds to accommodate one hundred lights of sash have been constructed, as well as a cold pit 50 feet long, which was bricked and glazed. New timbers and floors have been put in the Carrousel, as well as ceiling and roof.

New timbers and floor have been put into the balcony at the "Litchfield Mansion," with repairs to the large fluted columns and minor repairs to many parts of the building. A rustic arbor was built near the Farm House. Three portable stands were built for parades, and seats for 15,000 people during the Sunday School anniversary. One thousand new settees were made and five hundred old ones repaired.

In addition to keeping all rolling stock in repair, there have been built three new road sprinklers, two road rollers, three road scrapers, two snow plows and two hundred iron tree boxes.

Over one thousand seven hundred feet of pipe fence was built on 9th Avenue. Six water closets and urinals, with new floors and timbers, were built at the barn, and six with floor and timbers at Boat House.

Also kept in repair those at Prospect and the outside parks, one hundred and twenty all told.

Five hundred feet of new four-inch water main, with four connections for hydrants, were laid on Breeze Hill. Forty-seven new catch basins and eighteen hundred feet of six-

inch drain pipe were put in the different parks. Forty basin heads were raised or lowered to suit the new grades of walks. Many of the stone steps around the Farm House and Flower Garden were reset, and the curb around the Irving bust was changed and improved. A new drinking fountain was put in on the walk opposite the Well, and the water main at Coney Island was lowered to connect with the new sewer.

The music stands at Prospect and Washington Parks were both painted. The additions at the Barn and fence around barnyard and the new fence on 9th Avenue were all painted. The various cast iron fountains and the iron fences around City, Tompkins, Underhill and Cumberland Parks, also the gates at Washington Park and small fence at main entrance to Prospect Park, and the Well House, inside and out, were painted during the season, also one thousand five hundred settees, three hundred tree boxes, nineteen sprinklers, two wagons, two rollers, three scrapers and two snow plows, the iron fence and vases at Flower Garden.

WINTHROP PARK.

The grading has been finished and the entire lawn surface sown down and put in good condition. The drainage system has been completed and connected with the city sewer, and thirty-eight new catch basins built at required points, connected by 1,600 feet of six-inch cement pipe. The ground has been prepared for replacing missing street trees and doing additional planting in the spring.

BUSHWICK PARK.

The ground here being in a state entirely unfit for park purposes, all the soil had to be carted in. Good progress has been made in grading and laying out the walks according to the accepted plan, and covering with soil as it can be obtained. About 1,200 feet of the walks have been graded

and filled in preparatory to covering with pavement, and 300 feet of sidewalk has been cut through to grade on Starr Street. About 2,600 cubic yards of soil have been moved.

OCEAN PARKWAY.

The gutters and drains along the entire length of this parkway have been dug out and kept in order, and the trees have been pruned. Two new catch basins and a drain pipe leading to the old gravel pit have greatly improved the drainage in that vicinity. 1525 cubic yards of Roa Hook gravel have been laid, from where it ended just below Church Lane, last season, to beyond the Hollow, and packed and rolled with the steam roller. 2000 cubic yards of bank gravel were put on between the Tunnel and Coney Island. The long and severe drought rendered the daily use of the road sprinklers necessary until late in the Fall, consequently adding to the necessary expense of maintenance.

EASTERN PARKWAY.

Besides the regular maintenance, cleaning, sprinkling, etc., the gutters have been dug out and kept clear on all the roads. The trees have been pruned and the smaller ones protected by iron tree boxes. The trees are cultivated and manured as other work permits. 673 cubic yards of Roa Hook gravel have been placed on the road.

CARROLL PARK.

Although work was decided upon late in the season and a new design adopted, the entire plan of the park has been changed and the whole place remodelled and improved. The old fence has been removed and a new one of lighter design put in its place. All the new walks have been laid with a first coat of chemical tar and gravel, and are ready for the surface finish in the spring. The ground has been graded and preparations made for sowing down the coming

season, and a fountain basin prepared for the small plaza in the centre of the park.

WORK IN OTHER PARKS.

The work in the other parks and small squares of the city has consisted of their regular care; cleaning, mowing, watering and caring for the trees, shrubs, flower beds and fountains.

By an act of the Legislature of 1892, the Department of Parks was made a single-headed Commission, and, by virtue of said act, Marvin Cross, Esq., a member of the former commission, was appointed by the Commissioner as his Deputy. This change in the management of the affairs of the Park will no doubt prove beneficial.

It has long been known by arboriculturists that our plantations in Prospect Park, which contained some of the finest specimens of trees from all parts of the world, were becoming overcrowded in many places, and in other portions were weak. Many of the finest trees were crowded out by inferior and rapidly growing trees, threatening extermination of the better kinds. These trees were originally planted close, so as to produce immediate effects, the designers intending to remove many from time to time as occasion demanded.

For a number of years they were neglected, and when the time came to remove them public clamor among the ignorant that "trees were being cut down and the Park destroyed" deterred some of my predecessors from removing them. This work, under careful supervision and with the advice of the best experts that can be obtained, has been proceeded with during the last two years, and with very little criticism, the public having begun to realize, as has the Department, that the work is necessary to the safety and beauty of our plantations, and in a few years these trees, that are ungainly, will be beautiful and sightly, and the finer specimens, which are of slow growth, will survive.

The confidence of the public in our work has been increased by the planting of new trees wherever the plantations are weak, and the caring for and nursing of trees throughout the Park and on the Boulevards.

Our forests, which are mostly on steep hillsides, have been injured by the continual wash of the heavy rains, and in many portions the roots have been left partially bare. To obviate this we have planted vines or low shrubbery that will grow in the shade, and also grass in the early spring. The shade, however, kills the grass before the summer is over, but the little fibrous roots assist materially in holding the soil together. It has been decided to cover all the places made bare with a good strong sod, taking a section of the Park every year until the work is accomplished. This will give nutrition to the trees, and restore in a great measure what has been washed away.

The horticultural department has been greatly enlarged. All plants and flowers used in our various Parks are raised in Prospect Park propagating houses, at a much less cost than buying them and of a superior quality. In addition the greenhouse is open to the public during the winter months, where a choice collection of ferns and other tropical plants and flowers are on exhibition, and in summer these same plants are used for filling of vases and other decorations in the Flower Garden.

The work of the Department is continually growing, owing to the increasing population that must be provided for, and the construction and maintaining of other parks located throughout the city.

The subject of preserving and maintaining the small parks is receiving a great deal of attention, and when these parks are put in order they should be well lighted and policed. They ought to be at all times of the day and night a comfort and pleasure to the citizens, and not, as has been and still is, in some of the Parks, a menace to all who have to pass through or use the same after nightfall.

It would seem to be very desirable that sufficient money

be obtained to complete the purchase or condemnation of the balance of the land between the City's reservoir property and the Evergreens Cemetery, it being adjacent to the property already purchased for Highland Park. It would prevent the encroachment of the Cemeteries up to the reservoir for our water supply, and also get rid of a nuisance that pollutes the atmosphere and at times the water of the reservoir.

The two blocks heretofore purchased in the Twelfth ward for a Park are wholly inadequate for the wants of such a densely populated neighborhood, and at least one more block should be procured. The Department has an option to purchase or condemn, but has not sufficient money to avail itself of the privilege.

Respectfully submitted,

GEO. V. BROWER,
Commissioner.
