Notes:

1) Rate definitions: rates are calculated by dividing the program counts by the total population of children citywide and in specific boroughs/community districts, multiplied by 1,000. The population of children under 18 years old is used for children in indicated investigations, prevention and foster care. The population of youth 12-18 is used for detention. The program counts are defined as follows: children in indicated investigations are unique children in investigations with a preponderance of evidence of abuse and/or neglect; children receiving prevention are unique children in child welfare prevention cases during the year; foster care placements are unique children placed in foster care during the year excluding those placed in Close to Home; and detention admissions are unique youth admitted to detention during the year.
