“Affordable housing.” The phrase seems plain enough, but it doesn’t always mean what people think it does! It actually has a technical government definition that can determine what gets built and who lives there. Use the tools from this workshop to answer the all-important question: “affordable to whom?”

This workshop breaks down affordable housing policy into easy-to-understand visuals. Look at income demographics, rents, and proposed developments in your neighborhood. learn about affordable housing programs and who’s eligible for them.
