"The City of New York is committed to achieving excellence in the design and construction of its capital program, and building on the tradition of innovation in architecture and engineering that has contributed to the City's prestige as a global destination. The contracting opportunities for construction/construction services and construction-related services that appear in the individual agency listings below reflect that commitment to excellence."

HHS ACCELERATOR

To respond to human services Requests for Proposals (RFPs), in accordance with Section 3-16 of the Procurement Policy Board Rules of the City of New York ("PPB Rules"), vendors must first complete and submit an electronic prequalification application using the City's Health and Human Services (HHS) Accelerator system. The HHS Accelerator System is a web-based system

maintained by the City of New York for use by its human services Agencies to manage procurement. The process removes redundancy by capturing information about boards, filings, policies, and general service experience centrally. As a result, specific proposals for funding are more focused on program design, scope, and budget.

Important information about the new method

- Prequalification applications are required every three years.
- Documents related to annual corporate filings must be submitted on an annual basis to remain eligible to compete.
- Prequalification applications will be reviewed to validate compliance with corporate filings, organizational capacity, and relevant service experience.
- Approved organizations will be eligible to compete and would submit electronic proposals through the system.

The Client and Community Service Catalog, which lists all Prequalification service categories and the NYC Procurement Roadmap, which lists all RFPs to be managed by HHS Accelerator may be viewed at <http://www.nyc.gov/html/hhsaccelerator/html/roadmap/roadmap.shtml>. All current and prospective vendors should frequently review information listed on roadmap to take full advantage of upcoming opportunities for funding.

Participating NYC Agencies

HHS Accelerator, led by the Office of the Mayor, is governed by an Executive Steering Committee of Agency Heads who represent the following NYC Agencies:

Administration for Children's Services (ACS)
 Department for the Aging (DFTA)
 Department of Consumer Affairs (DCA)
 Department of Corrections (DOC)
 Department of Health and Mental Hygiene (DOHMH)

 Department of Probation (DOP)
 Department of Small Business Services (SBS)

This proposed rule was not included in the Commission's regulatory agenda for this Fiscal Year because the need for it was not contemplated when the Commission published the agenda.

Where can I find the Commission's rules? The Commission's rules are in title 35 of the Rules of the City of New York.

must meet the requirements of Section 1043 of the City Charter when creating or changing rules. This notice is made according to the requirements of Section 1043(b) of the City Charter.

STATEMENT OF BASIS AND PURPOSE OF RULES

The proposed rules amend the Taxi and Limousine Commission's (TLC) current rules regarding the Owner-Must-Drive (OMD) medallion requirement.

Background

The TLC's OMD rules include requirements that owners of independent taxicab medallions who purchased their medallions after January 6, 1990, personally drive their taxi cabs a minimum number of shifts each year. This requirement was intended to promote safety and quality customer service, on the belief that taxicab drivers who own a medallion would operate the medallion more responsibly than those who did not because of their financial stake in their medallion. Over time, the requirement has changed. In response to an industry petition in 2010, and discussions with industry groups in 2011, the TLC amended its OMD rules to provide flexibility to owners of OMD medallions while preserving the advantages of owner-driven taxicabs. These amendments included reducing the number of shifts the owner must drive and allowing an owner to designate another driver to meet the required number of shifts.

On February 18, 2014, Mayor de Blasio launched the Vision Zero action plan – an ambitious plan to reduce traffic fatalities in New York City. Vision Zero accepts no traffic fatality as inevitable, but views traffic crashes as the result of a series of actions that can be changed or prevented through enforcement, education and design. Under the Vision Zero plan, safe driving must be a priority for all taxi cab drivers, not only those that own and drive their medallion taxicabs. Passengers also expect the TLC to ensure that all taxicab drivers operate their vehicles safely, whether or not they own the medallion they operate. TLC's current Vision Zero driver safety initiatives, which include expanding and enhancing driver education as well as increasing penalties for unsafe driving, are intended to promote driving safety for all drivers.

Because the TLC recognizes the need for all taxi drivers to drive safely regardless of medallion or vehicle ownership, the TLC is relaxing the OMD requirements by changing OMD requirements from shifts driven to cumulative hours driven. OMD medallion owners should find it easier to meet this new requirement. The TLC is also reducing the penalties for violation. Because this new requirement does not affect the TLC's obligation to issue a minimum number of OMD medallions, as required by section 19-504 (i) of the Administrative Code, the City will retain the benefits of single-medallion ownership, including medallion affordability.

Rule Amendments

Specifically the proposed rules:

- Amend the definition of Independent Medallion Driver.
Amend and reduce the current "shift" driving requirements to "hours" on a yearly basis, including reducing the required driving time for an OMD medallion owner who is 62 years of age or older and has owned the medallion for a minimum of 10 years.
Reduce the penalty for not driving the vehicle the required number of hours.
Reduce the penalty for an OMD medallion owner who selects another driver, or multiple drivers, to fulfill the OMD requirement.
Increase the amount of time for which a Medical Waiver may be granted.

These rules are authorized by Section 2303 of the New York Charter and Section 19-503 of the Administrative Code.

What authorizes the Commission to make this rule? Sections 1043 and 2303 of the City Charter and section 19-503 of the City Administrative Code authorize the Commission to make this proposed rule. This proposed rule was not included in the Commission's regulatory agenda for this Fiscal Year because it was not contemplated when the Commission published the agenda.

Where can I find the Commission's rules? The Commission's rules are in title 35 of the Rules of the City of New York.

What rules govern the rulemaking process? The Commission must meet the requirements of Section 1043 of the City Charter when creating or changing rules. This notice is made according to the requirements of Section 1043(b) of the City Charter.

Statement of Basis and Purpose of Proposed Rule

TLC has been exploring options to establish regulations for E-Hail and E-Payment that will encourage innovation, provide desired services to taxi passengers, promote safety and consumer protection, and create income opportunities for drivers. This process has included ongoing dialog with drivers, owners, and app companies, along with app testing by TLC staff. Perhaps most importantly, to experience how E-Hail and E-Payment work in the field before proposing new regulations, TLC conducted an E-Hail Pilot that began on April 26, 2013 and is currently operating.

Data collected during the Pilot show that E-Hail Apps makes it easier for passengers and drivers to connect without reducing the availability of the hallmark New York City hand-hail for other passengers. Between June 2013 and May 2014, a pool of over 7,500 E-Hail using drivers was sent an average of about 7,000 E-Hail requests each day resulting in 652,590 total pick-ups. E-Hail was particularly helpful for matching drivers and passengers in areas of the City where hail service is not readily available. Sixty-six percent of all E-Hailed taxi trips were in Northern Manhattan or the outer boroughs, which account for only 6.4 percent of all taxi pickups. While E-Hail assisted many passengers to get rides and some drivers to get additional fares, the total number of daily E-Hail rides accounted for only 0.37 percent of all taxi trips.

TLC also evaluated the impact of E-Hail on safety and customer service. There was concern that E-Hailing might increase service refusals for hand-hailing passengers. The pilot data, however, does not support this concern: during the pilot service refusal complaints were at similar levels to those in the same prior-year period. Complaints regarding unsafe driving and cell phone use while driving did not increase during the pilot, but instead dropped 10.5 percent. Collision data revealed that 3.7 percent of taxi drivers who participated in the E-Hail pilot program were involved in reported collisions during the one-year period, compared to 5.2 percent of taxi drivers who did not participate, suggesting no decline in safety resulting from E-Hail. Based on the best evaluation methods and on the pilot data, there is no evidence to suggest that E-Hail results in either unsafe driving or increases in service refusals. The results of the pilot suggest that TLC should continue to allow E-Hails beyond the pilot period. To continue E-Hail and E-Payment services, TLC and the City must establish rules for E-Hails.

The proposed rules, which apply to medallion owners, application developers, taxicab drivers, and Street Hail Livery drivers who may accept E-Hails, will allow passengers to summon taxicabs and Street Hail Liveries in New York City by E-Hail and to make E-Payments, subject to certain restrictions.

The goal of these rules is to accommodate new technology into the taxi industry while taking into account the needs of E-Hail application developers, drivers, vehicle owners and passengers. The TLC will continue to monitor the performance of E-Hail technology and analyze its impact on the taxi industry, including how it affects the experience of drivers and passengers.

The proposed rules:

- Define terms relating to E-Hail.
- Modify requirements which must be met by drivers who want to use E-Hail Applications and E-Payment.
- Require drivers and owners to use only E-Hail Applications licensed and approved by TLC.
- Require that the taximeter be used to calculate time and distance charges for all E-Hail trips.
- Prohibit a driver from charging a passenger any fee above TLC-approved rates for an E-Hail trip.

- Require E-Hail Applications that also provide E-Payment to be integrated with TPEP or LPEP and Trip Record information to be collected by TPEP or LPEP for E-Hail trips.
- Require Taxicab Owners to pay Drivers in cash for all E-payments processed through the TPEP.
- Establish when and where a driver may use an E-Hail Application and set forth restrictions on the use of E-Hail Applications by a driver. This includes locations where E-Hail Applications may not be used. In addition to the DIM, a single driver may not use more than one electronic device with E-Hail Applications.
- Modify TPEP and LPEP requirements to specify the required integration between TPEP and LPEP and E-Hail Applications.
- Require that the driver's E-Hail device be mounted in the vehicle.

In addition, these proposed rules provide for the licensing of E-Hail application providers. The proposed rules also establish standards for usage, security and other features to ensure that application usage does not interfere with the ability of the TPEP or LPEP technology to collect and accurately record trip data. Specifically, these rules:

- Establish licensing standards and requirements for E-Hail application providers.
- Establish a three year license term.
- Require E-Hail applications that also provide E-Payment to integrate with TPEP and LPEP.
- Set forth technical requirements for E-Hail applications.
- Require that drivers be able to accept a trip using a single touch or voice activation.
- Set forth security standards for E-Hail applications that process payments.

The Commission's authority for these rules is found in section 2303 of the New York City Charter and sections 19-503 and 19-511 of the New York City Administrative Code.

- (ii) Insurance coverage in the minimum amounts required in this subdivision shall not relieve the E-Hail Application Provider Licensee of any liability for indemnification under this Chapter.
- (iii) The E-Hail Application Provider waives all rights against the City, including its officers and employees, for any damages or losses that are covered under any insurance required under this subdivision (whether or not such insurance is

- (o) Criminal Activity. The E-Hail App Provider must report all instances of suspected criminal activity to the Commission and the Agency Inspector General Office at the New York City Department of Investigation within twelve (12) hours of when the E-Hail App Provider knows of or should have known of such instances of suspected criminal activity.
- (p) Logging and Administration. All E-Hail Apps, Information System Components and any software contained therein provided by or for the E-Hail App Provider must enable appropriate logging and auditing capabilities.
- (q) Anti-Virus Security Policy.
- (1) Servers, desktops, and laptops must have current commercial anti-virus software installed, properly configured and running at all times.
- (2) Anti-virus software must be configured to automatically remove the virus.

- (3) Users must not disable automatic virus scanning on their local machines.
- (4) Server administrators must not disable anti-virus software on server machines.

- (5) The production environment must not be used for development or testing activities.
- (6) All security functionality must be operational during formal acceptance and operational testing.
- (7) Prior to production release of any new application, testing must be done to ensure the new application will not adversely affect any existing systems.
- (8) Each application must have a defined back out plan in the unlikely event that its migration to the production environment causes service degradation.
- (9) Each new application must create a business continuity and disaster recovery program in accordance with the business significance of the application.
- (s) *Digital Media Re-use and Disposal Policy.*
- (1) Rendering Information Permanently Unreadable. Where any equipment containing digital media is to be discarded, donated, sold or otherwise transferred to an external person, organization or vendor (e.g. at the end of a lease or as an RMA (returned merchandise)), the E-Hail App Provider must use one of the following approved methods appropriate for rendering all information on the media permanently unreadable:
- (i) A data wiping program that will securely delete all data by methods that irreversibly wipe the physical area of storage (rather than simply removing the disk-directory reference to that information). The program must overwrite all addressable locations with a character, its complement, then a random character;
- (ii) Any full disk encryption method which is compliant with the DOITT Standards and in which it can be reasonably expected that no unauthorized person has the ability to decrypt the data; or
- (iii) Degaussing and/or physical media shredding technology which meets NIST standard 800-88 (or its successor). See http://csrc.nist.gov/publications/nistpubs/800-88/NISTSP800-88_rev1.pdf
- (2) Transfer of Asset for Disposal. An asset can be securely transferred for disposal to a vendor who has contractually committed to following one or more of the above methods.
- (t) *Encryption Policy.*
- (1) Only approved cryptographic algorithms and supporting processes as described in the DOITT Standards found at <http://www.nyc.gov/html/doitt/html/business/security.shtml> must be used to protect business critical information.
- (2) Where technology permits, private or confidential data at rest must be protected by encryption. The use of password protection instead of encryption is not an acceptable alternative to protecting sensitive information.
- (3) Data categorized as private or confidential must not be transitioned to removable media without Commission approval.
- (4) Removable media including CDs, backup tapes, and USB memory drives that contain private or confidential data must be encrypted and stored in a secure location.
- (5) When transferring removable media, the receiver must be identified to ensure the person requesting the data is a valid recipient.
- (6) All emails containing data classified as private or confidential must be encrypted.
- (7) Unencrypted transmission of private or confidential data in any way (e.g. through the use of web applications or File Transfer Protocol) is not allowed.
- (8) Wireless networks must be encrypted in accordance with DOITT Standards.
- (9) Private or confidential data may only be stored on portable devices such as laptops, smart phones and personal digital assistants (PDAs) when encrypted.
- (10) Portable devices must not be used for long-term storage of private or confidential data.
- (11) Where it is technologically feasible, portable devices must have the capability to be remotely wiped in the event of theft or accidental loss.
- (12) Portable devices must have proper protections in place.
- (13) Approved encryption algorithms must be a minimum key length of 128 bits.
- (14) Private keys must be kept confidential.
- (15) Key lifecycle management must be implemented.
- (16) Keys in storage and transit must be encrypted.
- (17) Keys must be chosen randomly from the entire key space, and weak keys must never be used.
- (18) Encryption keys must allow for retrieval for administrative or forensic use.
- (u) *Password Policy.*
- (1) Passwords and PINs:
- (i) Must never be shared or displayed on screen;
- (ii) Must be classified; and
- (iii) Must be changed when there is any indication of system or password compromise.

- (i) Must be encrypted when transmitted electronically with a protocol which complies with the DOITT Standards; and
- (ii) Must be encrypted or hashed when held in storage. When embedded in configuration files, source code or scripts, passwords and PINs must be either encrypted or secured with compensating controls which provide a comparable level of protection.
- (3) Change Password. A user wishing to change his or her password/PIN must be positively identified by demonstrating knowledge of the current password/PIN or by other comparable methods. Passwords must be changed every ninety (90) days. Passwords cannot be changed more than once a day.
- (4) Password Delivery. Passwords must be delivered securely to the recipient (authorized user) with an approved transmission method. Although passwords and PINS must never be shared, initial passwords may be delivered to the recipient's manager. In all cases, the recipient or manager must be positively identified before the password is delivered.
- (5) Use of PINS. PINs may only be used where a numeric method for authentication is required, such as a telephone keypad. In all other cases, passwords or pass-phrases must be used for authentication.

A user's credentials must be classified as restricted information. Individual passwords must never be shared.
 - (4) Confidentiality of Data Remotely Accessed. Users must protect the confidentiality and integrity of data that is accessed remotely. This includes, but is not limited to ensuring that E-Hail App Data, TPEP Data, and LPEP Data is either erased from the remote device after use or appropriately protected based on the level of sensitivity of the information.
- (w) User Responsibilities Policy.
 - (1) The E-Hail App Provider is responsible and accountable for safeguarding E-Hail App Data, TPEP Data, and LPEP Data from unauthorized modification, disclosure, and destruction.
 - (2) Critical data and removable data services (USB drives, CDs, external drives, etc.) must be protected by appropriate physical means from modification, theft, or unauthorized access.

§19. Section 82-26 of Title 35 of the Rules of the City of New York is amended by adding a new subdivision (j) to read as follows:

- (j) E-Payments.
 - (1) The payment for the fare for any trip paid for using an E-Payment must not exceed Commission-approved rates.
 - (2) The fare must be calculated as required by these rules and the Taximeter must be used for all trips, including trips paid for by E-Payment. Any fare paid for by E-Payment must be calculated by the Taximeter and not by any other method.
