- *Win More Contracts at nyc.gov/competetowin*

"The City of New York is committed to achieving excellence in the design and construction of its capital program, and building on the tradition of innovation in architecture and engineering that has contributed to the City's prestige as a global destination. The contracting opportunities for construction/construction services and construction-related services that appear in the individual agency listings below reflect that commitment to excellence."

HHS ACCELERATOR

To respond to human services Requests for Proposals (RFPs), in accordance with Section 3-16 of the Procurement Policy Board Rules of the City of New York ("PPB Rules"), vendors must first complete and submit an electronic prequalification application using the City's Health and Human Services (HHS) Accelerator System. The HHS Accelerator System is a web-based system maintained by the City of New York for use by its human services Agencies to manage procurement. The process removes redundancy by capturing information about boards, filings, policies, and general service experience centrally. As a result, specific proposals for funding are more focused on program design, scope, and budget.

Important information about the new method

- Prequalification applications are required every three years.
- Documents related to annual corporate filings must be submitted on an annual basis to remain eligible to compete.
- Prequalification applications will be reviewed to validate compliance with corporate filings, organizational capacity, and relevant service experience.
- Approved organizations will be eligible to compete and would submit electronic proposals through the system.

The Client and Community Service Catalog, which lists all Prequalification service categories and the NYC Procurement Roadmap, which lists all RFPs to be managed by HHS Accelerator may be viewed at <http://www.nyc.gov/html/hhsaccelerator/html/roadmap/roadmap.shtml>. All current and prospective vendors should frequently review information listed on roadmap to take full advantage of upcoming opportunities for funding.

Participating NYC Agencies

HHS Accelerator, led by the Office of the Mayor, is governed by an Executive Steering Committee of Agency Heads who represent the following NYC Agencies:

Administration for Children's Services (ACS)
 Department for the Aging (DFTA)
 Department of Consumer Affairs (DCA)
 Department of Corrections (DOC)
 Department of Health and Mental Hygiene (DOHMH)
 Department of Homeless Services (DHS)
 Department of Probation (DOP)
 Department of Small Business Services (SBS)
 Department of Youth and Community Development (DYCD)
 Housing and Preservation Department (HPD)
 Human Resources Administration (HRA)
 Office of the Criminal Justice Coordinator (CJC)

DPR is seeking to evaluate and pre-qualify a list of general contractors (a"PQL") exclusively to conduct non-complex general construction site

work involving the construction and reconstruction of DPR parks and playgrounds projects not exceeding \$3 million per contract ("General Construction").

By establishing contractor's qualification and experience in advance, DPR will have a pool of competent contractors from which it can draw to promptly and effectively reconstruct and construction its parks, playgrounds, beaches, gardens and green-streets. DPR will select contractors from the General Construction PQL for non-complex general construction site work of up to \$3,000,000.00 per contract, through the use of a Competitive Sealed Bid solicited from the PQL generated from this RFQ.

The vendors selected for inclusion in the General Construction PQL will be invited to participate in the NYC Construction Mentorship. NYC Construction Mentorship focuses on increasing the use of small NYC contracts, and winning larger contracts with larger values. Firms participating in NYC Construction Mentorship will have the opportunity to take management classes and receive on-the-job training provided by a construction management firm.

DPR will only consider applications for this General Construction PQL from contractors who meet any one of the following criteria:

- 1) The submitting entity must be a Certified Minority/Woman Business enterprise (M/WBE)*;

STATEMENT OF BASIS AND PURPOSE OF RULES

This proposed rule amends a rule that the Taxi and Limousine Commission (TLC) adopted in July 2016 to address the risks of fatigued driving. The proposed rule incorporates feedback from the industry since the adoption of the initial rule. The proposed rule also adds new reporting requirements for the for-hire vehicle (FHV) sector that will support the regulation of fatigued driving and assist TLC with enforcement initiatives in other areas.

Background

Long hours driving on the road can lead to fatigue and reduced sleep, and compounded over time, may result in chronic fatigue. For drivers, this means slowed reaction times and a reduced ability to assess situations quickly, increasing the danger of driver errors and the risk of crashing. Additionally, research has shown that being awake for 18 hours results in impairment equal to driving while under the influence of alcohol (DUI), and that being awake for 24 hours results in impairment equal to 1.25 times the threshold for driving while intoxicated (DWI).

Although almost all TLC-licensed drivers do not drive an excessive number of hours, TLC recognized that a small number does and that some drivers may be tempted to work dangerously long hours. Therefore, in support of the City's Vision Zero initiative to reduce traffic fatalities, TLC adopted rules in July 2016 to address the risks of fatigued driving.

Before establishing in these rules the maximum number of hours that licensed taxi and FHV drivers may work in any day or week, TLC analyzed available trip data, including FHV trip data. TLC used pickup times as a proxy for hours worked because that was the only data that FHV bases were required to report.¹ This approach provided one uniform method for calculating driving hours across the taxi and FHV sectors. TLC counted a pickup as one hour that would be tallied against the limit, regardless of the trip duration.

Many stakeholders, including FHV bases, argued that it would be more accurate to use trip duration to calculate driving hours. TLC delayed implementation of the driver fatigue rules to explore this method for calculating driving hours as a means of establishing safe daily and weekly driving limits. In the fall of 2016, several FHV bases voluntarily produced trip records that included both pickup and drop-off times, allowing TLC to calculate trip durations. TLC then analyzed both FHV and taxi trip records and determined that a calculation based on trip duration provides a more accurate way to identify drivers

at risk of fatigue. This method also makes it easier for drivers and bases to track driving hours, which will help them comply with the limits established in this proposed rule.

Revised Fatigued Driving Rule

As a result of the above analysis, this proposed rule adopts the alternative method for calculating driving hours based on trip duration. Licensed drivers would still be subject to daily and weekly driving limits, as under the current driver fatigue rules. Moreover, like the current rule, the proposed rule also addresses acute and chronic fatigue, provides flexibility for different shift types, fights fatigue in both the taxi and FHV sectors, and accounts for drivers working in both the taxi and FHV sectors.

The existing rule accounts for total driving time – transporting of passengers plus time cruising while not transporting passengers – in the calculation of the daily and weekly limits. Since the proposed rule does not include cruising time, the daily and weekly limits would be reduced in the new rule from 12 hours to 10 hours and from 72 hours to 60 hours, respectively, to ensure that total driving time remains within acceptable limits. Even with these reduced daily and weekly limits, however, most drivers would not need to modify their driving hours in order to comply.

The proposed rule would reduce the safety risks of fatigued driving by:

- Prohibiting a driver of a taxi or for-hire vehicle from transporting passengers for hire for more than 10 hours in any 24-hour period;
- Prohibiting a driver of a taxi or for-hire vehicle from transporting passengers for hire for more than 60 hours in a calendar week (that is, Sunday through Saturday);
- Resetting the 10-hour clock for a driver after any period in which he or she has gone at least eight consecutive hours without transporting passengers (e.g., a driver who finishes a trip at 9:30 P.M., on Monday after transporting passengers for 10 hours must take at least an eight hour break before picking up the next passenger no sooner than Tuesday, at 5:30 A.M.); and
- Prohibiting a base from dispatching a driver to transport passengers for more than 10 hours in any 24-hour period (unless that base has stopped dispatching the driver to transport passengers for eight or more consecutive hours) and prohibiting a base from dispatching a driver to transport passengers for more than 60 hours in a calendar week.

To enforce the proposed rule, each month TLC will review trip records submitted by yellow and green taxis, as well as FHV bases, to calculate the number of hours in which a driver transported passengers in a day or week. Trips by a driver who accepts dispatches from multiple bases, or who operates both taxis and for-hire vehicles, will be combined to determine the total number of driving hours. Bases will only be responsible for trips that they dispatch, not dispatches that their affiliated drivers accept through other bases or street hails accepted by green taxis.²

Additional FHV Trip Data Reporting Requirements

As noted above, implementation of the proposed driver fatigue rule is based on calculation of trip times, which will require FHV bases to regularly transmit to TLC drop-off time and location, in addition to the pickup time and location currently required by TLC rule. In addition to requiring FHV bases to report trip times, TLC will also require them to indicate when trips are shared. With drop-off location information, TLC can confirm the accuracy of the FHV records by considering such factors as distances traveled during and between trips, routes, and traffic conditions. Accurate drop-off information will also ensure that these rules are applied consistently whether the driver works in the taxi or FHV sector, given the flexibility now available to drivers under the newly-instituted TLC Driver's License.

Drop-off data for FHV trips will also assist TLC in other enforcement actions. For example, it will facilitate investigating passenger complaints or complaints from a pedestrian or other motorist about unsafe driving, including for incidents alleged to have occurred during or between trips, by allowing TLC to determine the location of a vehicle at a particular time. The data is particularly important for investigations in the FHV sector, where, unlike yellow and green taxis, the vast and growing vehicle fleet does not have readily identifiable markers, such as a medallion or permit number on the roof light.

The data will also support street enforcement in major service areas. For example, the potential for illegal solicitations by FHV drivers is high at peak drop-off times at the airports when drivers have completed trips and observe a large number of potential passengers. By understanding when for-hire trips to and from the airports occur TLC can better target resources to ensure that passengers are picked up at the airport only by drivers authorized to do so.

1 TLC issued rules in 2014 requiring FHV bases to report the pickup time and location of each trip, in addition to the license numbers of the driver and vehicle performing the trip.

2 For example, if Base A dispatches a driver to perform trips for nine hours in a 24-hour period and Base B dispatches the same driver to perform trips for an additional six hours in the same 24-hour period, then only the driver is in violation of the daily limit, not either of the two bases.

Finally, as the number of FHV vehicles and trips continues to grow, so does the need for greater transparency and accountability. Since November 2014, when TLC first imposed trip reporting requirements on the FHV sector, the number of FHVs has grown by over 50 percent to nearly 78,000 vehicles, or four times the combined number of yellow and green taxis. Because of the 2014 trip reporting requirements, the mechanism is in place for bases to submit to TLC the additional trip data that they collect. Collection of this data is likely already taking place, particularly for FHV trips that are dispatched via technologically-sophisticated means or when bases provide a binding fare quote.

For all of the above reasons, the proposed rule would amend the current trip record rules to require that FHV bases collect and transmit to TLC:

- The drop-off time and location for each trip that they dispatch, and
- An indication that the dispatched trip was shared with another dispatched trip.

TLC will maintain the privacy and confidentiality of the additional data that it will be collecting because of these new reporting requirements, as it does with all data currently collected.

Implementation

To implement the driver fatigue rule, TLC will first work with FHV bases to help them meet the new trip data reporting requirements. After these reporting requirements are met, and before any summonses are issued, TLC will issue warnings for several months to drivers or bases that exceed the daily or weekly driving limits. During this implementation period, TLC will continue to provide its expanded driver education and training materials, which were introduced after the adoption of the driver fatigue rule in July 2016, and include strategies to combat fatigue and information on the benefits of breaks and the importance of getting adequate rest. By drawing on all of these tools, TLC seeks to ensure that drivers have enough time to rest prior to transporting passengers for hire and thus help move the City a step closer to achieving Vision Zero.

NOTE:

The National Oilheat Research Alliance (NORA) will resume full operations in 2015 with the fee expanding to #4 heating oil. This fee will apply to heating oil invoices only. The fee collections began January 1, 2015. All other terms and conditions of these awards remain the same. Please contact this office if you have any questions.

The Bio-Diesel Blender Tax Credit was reinstated for 2014. As of January 1, 2015, the Bio-Diesel Blender Tax Credit has been rescinded for \$1.00 per gallon on B100. Therefore, for deliveries after January 1, 2015, the contractor will be collecting additional fees which will be shown as a separate line item on the invoice. The additional fee for items will range from \$0.05 for B5 to \$0.20 for B20 per gallon, varying on the percentage of biodiesel to be used. Should the tax credit be extended, this additional fee will be discontinued and removed from the invoice.

Federal excise taxes are imposed on taxable fuels, (i.e., gasoline, kerosene, and diesel), when removed from a taxable fuel terminal. This fuel excise tax does not include Leaking Underground Storage Tank (LUST) tax. LUST tax applies to motor fuels for both diesel and gasoline invoices. Going forward, LUST Tax will appear as an additional fee at the rate of \$0.001 per gallon and will be shown as a separate line item on your invoice.

REMINDER FOR ALL AGENCIES:

Please send inspection copy of receiving report for all gasoline (E85, UL & PREM) delivered by tank wagon to OCP/Bureau of Quality Assurance (BQA), 1 Centre Street, 18th Floor, New York, NY 10007.
