women-owned businesses to compete, connect and grow their business with the City. With NYC Construction Loan, Technical Assistance, NYC Construction Mentorship, Bond Readiness, and NYC Teaming services, the City will be able to help even more small businesses than before.

● Win More Contracts at nyc.gov/competetowin

“The City of New York is committed to achieving excellence in the design and construction of its capital program, and building on the tradition of innovation in architecture and engineering that has contributed to the City’s prestige as a global destination. The contracting opportunities for construction/construction services and construction-related services that appear in the individual agency listings below reflect that commitment to excellence.”

HHS ACCELERATOR

To respond to human services Requests for Proposals (RFPs), in accordance with Section 3-16 of the Procurement Policy Board Rules of the City of New York (“PPB Rules”), vendors must first complete and submit an electronic prequalification application using the City’s Health and Human Services (HHS) Accelerator System. The HHS Accelerator System is a web-based system maintained by the City of New York for use by its human services Agencies to manage procurement. The process removes redundancy by capturing information about boards, filings, policies, and general service experience centrally. As a result, specific proposals for funding are more focused on program design, scope, and budget.

Important information about the new method

- Prequalification applications are required every three years.
● Documents related to annual corporate filings must be submitted on an annual basis to remain eligible to compete.
● Prequalification applications will be reviewed to validate compliance with corporate filings, organizational capacity, and relevant service experience.
● Approved organizations will be eligible to compete and would submit electronic proposals through the system.

The Client and Community Service Catalog, which lists all Prequalification service categories and the NYC Procurement Roadmap, which lists all RFPs to be managed by HHS Accelerator may be viewed at http://www.nyc.gov/html/hhsaccelerator/html/roadmap/roadmap.shtml. All current and prospective vendors should frequently review information listed on roadmap to take full advantage of upcoming opportunities for funding.

Participating NYC Agencies

HHS Accelerator, led by the Office of the Mayor, is governed by an Executive Steering Committee of Agency Heads who represent the following NYC Agencies:

- Administration for Children’s Services (ACS)
Department for the Aging (DFTA)
Department of Consumer Affairs (DCA)
Department of Corrections (DOC)
Department of Health and Mental Hygiene (DOHMH)
Department of Homeless Services (DHS)
Department of Probation (DOP)
Department of Small Business Services (SBS)
Department of Youth and Community Development (DYCD)

AGENCY RULES

ENVIRONMENTAL PROTECTION

NOTICE

NOTICE OF ADOPTION OF FINAL RULE

NOTICE IS HEREBY GIVEN PURSUANT TO THE AUTHORITY VESTED IN THE COMMISSIONER OF THE DEPARTMENT OF ENVIRONMENTAL PROTECTION by Section 1043 (b) of the New York City Charter and Sections 24-105, 24-109(c)(2)(i), and 24-125(a)(1) of the New York City Administrative Code, that the Department of Environmental Protection has amended its rules to establish requirements for stack tests and smoke tests to measure smoke emissions from generators with an output of 40 kilowatts or more. These amendments were proposed and published in the City Record on October 13, 2016 and three comments were received. A public hearing was held on November 16, 2016. No testimony was given at this hearing. The prior hearing was held on August 10, 2016.

Statement of Basis and Purpose of Rule

This rule defines the method that must be used in performing a smoke test or stack test for generators with an output of 40 kilowatts or more.

Local Law Number 38 for the year 2015 amends Title 24 of the Administrative Code of the City of New York. It defines required procedures that a professional engineer (P.E.) or registered architect (R.A.) must follow in order to certify that any generator with an output of 40 kilowatts or more has passed a stack test. This rule only sets forth the test method that a P.E. or R.A. shall follow if a Method 9, "Visual determination of the opacity of emissions from stationary sources" test is not used to meet the requirements set forth in Section 24-109(c)(2)(i).

Section 24-109(c)(2)(i) specifically requires the Department to establish by rule a method for the stack test that generators must pass before registration of the generator that may be used instead of conducting a Method 9 test. This rule also meets the requirement set forth in section 24-125(a) that requires the Department to issue a rule that establishes criteria that must be met prior to a work permit being granted for any equipment, including a generator.

DEP has clarified the requirements and standards required in this rule based on comments received at the hearing and in writing. Comments that were submitted that pertained to Code requirements,

including but not limited to what types of generators need to obtain a registration or work permit and certificate of operation, are not addressed by this rule as these requirements have already been affirmatively provided for in the Air Pollution Control Code.

The Rule is authorized by Section 1043 of the Charter and Section 24-105 24-109(c)(2)(i), and 24-125(a)(1) of the Administrative Code.

The text of the Rule is as follows.

Section 1. Section 1. Title 15 of the Rules of the City of New York is amended by adding a new Chapter 44, to read as follows:

New material is underlined.
[Deleted material is in brackets.]

“Shall” and “must” denote mandatory requirements and may be used interchangeably in the rules of this department, unless otherwise specified or unless the context clearly indicates otherwise.

Chapter 44

Standard Test Procedures to Determine Smoke Emissions from Generators with an Output of 40 kw or More

44-01 Definitions

“Generator” means any internal combustion engine that operates as a mechanical or electrical power source.

“Kilowatt” means a unit of electrical power equal to one thousand watts.

44-02 Test Procedures

(a) Exemptions

The following generators are not subject to this rule’s testing requirements: Generators that are (1) certified Tier IV as set forth in table one of Section 1039.101 of Title 40 of the code of Federal regulations or any subsequent United States environmental protection agency, and (2) newly installed and being registered for the first time.

(b) Test Procedures

All generators that are subject to the test requirements of this rule must be tested in accordance with the procedures set forth in Paragraph (1) or (2) below.

(1) Stack Test Procedure

- (a) Generators must meet equivalent Tier IV particulate matter (PM) emissions standards established by the United States Environmental Protection Agency (EPA) as set forth in table one of Section 1039.101 of Title 40 of the code of Federal regulations or any subsequent United States EPA emissions standard for such generator that is at least as stringent.
- (b) In order to demonstrate that the PM emissions from the stack of a generator meet the Tier IV PM emissions standard, testing must be performed by the equipment owner following EPA Method 5, Titled “Determination of particulate matter emissions from stationary sources” (Appendix A-3 to Part 60 of Title 40 of the code of Federal regulations). The P.E. or R.A. must certify the stack test results.

(2) Smoke Test Procedure

A smoke test on a generator shall be performed in accordance with the procedures set forth in EPA Method 9, Titled “Visual determination of the opacity of emissions from stationary sources” (Appendix A-4 to Part 60 of Title 40 of the code of Federal regulations). The test results shall indicate less than 20 percent opacity for any two consecutive minutes in any 60-minute period. The smoke test must be performed and certified by a qualified visible emissions evaluator.

(c) Recordkeeping

- (1) For generators that require a registration under Section 24-109 of the administrative code (those stationary generators with an output from 40 kw to less than 450 kw and all emergency and portable generators with an output of 40 KW or greater), proof that the generator passed either a stack test using EPA Method 5 or a smoke test using EPA Method 9 must be submitted to the department upon request.
- (2) For generators that require a certificate of operation under Section 24-122 of the administrative code (those with an output of 450 kw or more), proof that the generator passed either a stack test using EPA Method 5 or a smoke test using EPA Method 9 must be submitted to the department with the application for an original inspection request to obtain the Certificate of Operation.
- (3) Records of tests required by this rule shall be maintained by the equipment owner for five years.
