The Applicant, River Street Partners LLC, is proposing a series of land use actions to facilitate the redevelopment of the Proposed Development Site with mixed-use buildings and waterfront public spaces in the Williamsburg neighborhood of Brooklyn Community District 1.

The Applicant’s Proposed Development consists of two mixed-use towers and waterfront public spaces located on a zoning lot to be comprised of Block 2355, Lots 1 and 20; Block 2361, Lots 1, 20, and 21; Block 2376, Lot 50; and portions of Metropolitan Avenue and North 1st Street (collectively known as the “Proposed Development Site”). The Project Area also includes two non-Applicant owned blocks, to the east of the Proposed Development Site (Blocks 2356 and 2362). The Project Area is located in an M3-1 district, mapped in 1961. There are no other prior land use actions affecting the Project Area.

The Applicant seeks the following discretionary approvals (collectively, the “Proposed Actions”):

- City Map Change to demap, discontinue, close and, as necessary, dispose of segments of Metropolitan Avenue and North 1st Street, to the West of River Street;
- Zoning Map Amendment to rezone the Project Area from an M3-1 district to C6-2 and M1-4 districts;
- Zoning Text Amendment to a) Appendix F of the Zoning Resolution (ZR) to establish the portion of the Project Area, to

the west of River Street as a Mandatory Inclusionary Housing (MIH) area; b) amend ZR Section 74-742 to allow a large scale general development ("LSGD") that does not meet the ownership requirements of ZR Section 74-742; and c) amend ZR Section 74-743 to permit, as part of the LSGD, the construction of new piers or platforms in the seaward portion of the LSGD that are accessible and enjoyable by the public, and allow such piers or platforms to generate floor area, provided that the total distribution of floor area is limited, to the floor area generated by existing land, piers and platforms seaward of the bulkhead line to be removed;

- Zoning Authorizations to a) modify requirements for location, area and minimum dimensions of waterfront public access areas, pursuant to ZR Section 62-822(a); b) modify requirements within waterfront public access areas, pursuant to ZR Section 62-822(b); and c) allow for phased development of waterfront public access areas, pursuant to ZR Section 62-822(c);
- Zoning Certification, pursuant to ZR Section 62-811 with respect to compliance with waterfront public access area and visual corridor requirements, as modified by the proposed waterfront Zoning Authorizations;
- Zoning Special Permit, pursuant to ZR Section 74-743(a)(2) and 74-743(a)(13), as modified under the proposed zoning text amendment, to allow the construction of new piers and platforms in the seaward portion of the LSGD that are accessible and enjoyable by the public; allow such piers or platforms to generate floor area, provided that the total distribution of floor area is limited, to the floor area generated by existing land, piers and platforms seaward of the bulkhead line to be removed; and to modify certain bulk regulations;
- Zoning Special Permit, pursuant to ZR Section 74-533 to reduce the minimum required accessory off-street parking spaces for market rate residential units in a Transit Zone from 40% to 20%; and
- Landfill action to add approximately 6,319 sf of landfill as part of the waterfront public open space plan.

With respect to each of the special permits and authorizations, the Applicant is also requesting an extension of term of such approvals to a period of ten years during which substantial construction of the phased project would be completed.

The project approvals would also include recordation of an (E) designation (E-636) and Restrictive Declaration to codify commitments made in the FEIS related, to the environmental review.

In addition, a Joint Permit Application from the NYS Department of Environmental Conservation (NYSDEC) and the US Army Corps of Engineers (USACE) is being sought in conjunction with the publicly accessible open space proposed along the waterfront. Also in conjunction with the Applicant's Proposed Development, the existing sewer infrastructure (combined sewers, intercepting sewer, regulator, and combined sewer overflow outfall) located between the East River and River Street in Metropolitan Avenue would be relocated, subject to review and approval by NYSDEC, USACE and the NYC Department of Environmental Protection (DEP), as applicable. The Applicant may also seek additional actions related to financing for the affordable housing component of the Proposed Development.

The Proposed Actions would facilitate the Applicant's Proposed Development, an approximately 1.336 million gross square foot (gsf) mixed-use development, comprised of approximately 1.12 million gsf of residential space (approximately 1,250 dwelling units, of which 313 units (25%) would be affordable pursuant, to the MIH program), 50,000 gsf of community facility space, 83,000 gsf of commercial space (including 60,000 gsf of office and 23,000 gsf of local retail), and approximately 83,000 gsf of below-grade parking (up to 250 accessory, attended parking spaces), as well as approximately 2.9 acres of new public open space (plus 2.32 acres of secondary contact accessible in-river space and 0.86 acres of intertidal area). Although plans are still in the preliminary stages, the Applicant, intends to house a community center within the community facility space. In addition, as part of the reasonable worst-case development scenario (RWCDs), a non-Applicant owned Projected Development Site, at 230 Kent Avenue (Block 2362, Lot 1) is expected to be improved with a three-story, approximately 20,223 gsf mixed-use light industrial, commercial and community facility building as a result of the proposed zoning change.

The FEIS assesses whether development resulting from the Proposed Actions could result in significant adverse environmental impacts. The FEIS identifies potential significant adverse impacts related to transportation (pedestrians and street user safety) and construction noise.

Transportation Impacts (Pedestrians) Impacts: Incremental demand from the Proposed Actions would result in significant adverse impacts,

at five crosswalks in one or more analyzed peak hours. There would be no significant adverse impacts to analyzed sidewalks or corner areas in any period. Widening the impacted crosswalks by one to 5.5 feet would fully mitigate all of the significant impacts. Implementation of the proposed mitigation measures would be subject to review and approval by DOT. In the absence of the application of these mitigation measures, the impacts would remain unmitigated. Identified mitigation measures will be codified in a Restrictive Declaration that would be executed upon approval of the Proposed Actions.

Transportation Impacts (Street User Safety) Impacts: Currently, the only crosswalk on River Street in proximity, to the Project Area is located, at North 3rd Street. Therefore, it is likely that some pedestrians traveling to and from the Proposed Development Site would choose to cross River Street, at a more proximate location where a crosswalk is not present, such as, at Metropolitan Avenue or North 1st Street. This would result in a significant pedestrian safety impact. The installation of a new traffic signal and pedestrian crossing on River Street, at Metropolitan Avenue would facilitate the safe and efficient movement of pedestrians crossing River Street and fully mitigate the impact. The proposed traffic signal and pedestrian crossing would be implemented by the Applicant in coordination with DOT, which has conditionally approved the installation. In the absence of the implementation of this mitigation measure, the impact would remain unmitigated. Identified mitigation measures will be codified in a Restrictive Declaration that would be executed upon approval of the Proposed Actions.

Construction Noise Impacts: The construction noise impact analysis identified potentially significant temporary adverse impacts in the following locations, as described below.

- **Grand Ferry Park.** The park is in close proximity to some of the marine structures work for the waterfront park. Construction noise levels would be 64 to 70 dBA (L_{eq}) and are anticipated to exceed CEQR thresholds (in this case, a 5 dBA or greater increment) for the duration of construction (45 months). The maximum total noise level, at the park during construction would be 70 dBA (L_{eq}) for a period of 10 months (which includes shoreline and marine structures pile driving with direct line-of-sight, to the park). However, it is important to note that for the majority of the construction (35 months), the total noise level would be less than 65 dBA (L_{eq}); these predicted noise levels are not, atypical for open space resources in New York City.
- **184 Kent Avenue.** This residential building with ground floor commercial use is located immediately north of the Development Site, across North 3rd Street. The maximum total exterior noise level would be approximately 81 dBA (L_{eq}). Interior noise levels are anticipated to exceed the CEQR guideline of 45 dBA (L_{10}) by approximately 4-6 dBA for the first 27 months of construction.
- **187 Kent Avenue.** This new residential building is located on the east side of Kent Avenue, between Metropolitan Avenue and North 3rd Street. The maximum total exterior noise level would be approximately 77 dBA (L_{eq}). Interior noise levels are anticipated to exceed the CEQR guideline of 45 dBA (L_{10}) by approximately 2 dBA for the first 39 months of construction.
- **221 Kent Avenue.** This new construction residential building is located on the east side of Kent Avenue between North 1st Street and North 3rd Street. The maximum total exterior noise level would be approximately 79 dBA (L_{eq}). Interior noise levels are anticipated to exceed the CEQR guideline of 45 dBA (L_{10}) by approximately 4 to 10 dBA for the first 21 months of.
- **223 Kent Avenue.** This residential building is located, at the southeast quadrant of the intersection of Kent Avenue and North 1st Street. The maximum total exterior noise level would be approximately 74 dBA (L_{eq}). Interior noise levels are anticipated to exceed the CEQR guideline of 45 dBA (L_{10}) by approximately 4 dBA for units with window AC and 19 dBA for units without window AC for the duration of construction.
- **68 North 3rd Street.** This residential building with ground floor commercial is located in the southwest quadrant of the intersection of Wythe Avenue and North 3rd Street. The maximum noise level during construction would be approximately 68 dBA (L_{eq}). The CEQR interior L_{10} noise guideline of 45 dBA would not be exceeded for units with window AC. However, a 13 dBA exceedance over CEQR interior L_{10} guideline is anticipated for units without window AC.
- **1 North 4th Place.** This residential tower is located along the waterfront, west of North 4th Street. The maximum total exterior noise level would be approximately 79 dBA (L_{eq}). Interior noise levels are anticipated to exceed the CEQR guideline of 45 dBA (L_{10}) by approximately 3 to 8 dBA for 45 consecutive months of construction.

- **200-206 Kent Avenue.** This new commercial and office building is located on the west side of Kent Avenue, at the intersection of Kent Avenue and North 3rd Street without any line of site obstruction from the project site. The maximum total exterior noise level would be approximately 83 dBA (L_{eq}). Interior noise levels are anticipated to exceed the CEQR guideline of 45 dBA (L₁₀) by approximately 8 dBA for 45 months of construction.
- **254 Kent Avenue/70 River Street.** This commercial building is located on the east side of River Street, at the intersection of River Street and Kent Avenue without any line of site obstruction from the project site. The maximum total exterior noise level would be approximately 80 dBA (L_{eq}). Interior noise levels are anticipated to exceed the CEQR guideline of 45 dBA (L₁₀) by approximately 5 dBA for 45 months of construction.

The Applicant has committed to feasible noise reduction measures in accordance with the New York City Noise Code. Furthermore, a construction noise mitigation plan would be required to be prepared and approved by NYCDEP prior to construction. Additional path controls (such as portable barriers or shrouds around specific equipment) would be considered during the development of the construction noise mitigation plan. The Applicant is also committing to providing noise monitoring, to ensure that violations of the NYC Noise Code do not occur, at adjacent receptors. Identified mitigation measures and commitments made in the FEIS related to construction noise will be codified in a Restrictive Declaration that would be executed upon approval of the Proposed Actions.

Six of the impacted sensitive receptors (four residential/mixed use, and two commercial use) already have double-paned windows and air conditioning/ alternative means of ventilation (PTAC or central HVAC); thus, there are no additional feasible and practicable receptor controls to further reduce noise levels. For two impacted sensitive receptors (residential buildings, at 68 North 3rd Street and 223 Kent Avenue), window air conditioning units would be made available by the Applicant to apartments that do not already have an alternate means of ventilation prior to the start of construction of the Proposed Development, which would partially mitigate the significant adverse noise impacts predicted to occur, at these locations during construction. Lastly, Grand Ferry Park is predicted to experience a significant adverse construction noise impact. No practical and feasible mitigation measures have been identified that could reduce the noise levels, at this location to below 55 dBA L₁₀(3) guideline and/or eliminate project-generated impacts during construction, at this location. It is important to note that for the majority of the construction period (35 months), the total noise level, at Grand Ferry Park would be less than 65 dBA (L_{eq}), which is not, atypical for open space resources in New York City.

While the incorporation of feasible and practicable mitigation measures would partially mitigate the significant adverse noise impacts predicted to occur, at two sensitive receptors, they are not expected to completely eliminate the significant adverse construction noise impact. Therefore, construction noise is considered a temporary unavoidable significant adverse impact.

The FEIS considers three alternatives – a No-Action Alternative, a No Unmitigated Significant Adverse Impact Alternative, and a new alternative known as the Potential City Planning Commission (CPC) Alternative. The No-Action Alternative examines future conditions within the Project Area but assumes the absence of the Proposed Actions (i.e., none of the discretionary approvals proposed as part of the Proposed Actions would be adopted). The No Unmitigated Significant Adverse Impacts Alternative examines a scenario in which the Proposed Project's potential unmitigated significant adverse impacts to transportation could be eliminated. The Potential City Planning Commission (CPC) Alternative considers a modification, to the Proposed Actions that would remove the ability to generate floor area from newly constructed piers seaward of the bulkhead line on the Applicant's Proposed Development Site.

CONSUMER AND WORKER PROTECTION

NOTICE

Notice of Pedicab Registration Plate Lottery

Pursuant to Section 20-251 of the New York City Administrative Code and Section 2-426a of the Rules of the City of New York, the Department of Consumer and Worker Protection (DCWP) has conducted an annual review of pedicab registrations and found that the number of registration plates issued has fallen below 840. As set forth below, DCWP will begin accepting applications for pedicab registration plates to fill any vacancies up to the legal limit of 850.

Application Period:

DCWP will accept applications for pedicab registration plates for 20 business days from the date of publication of this Notice, which is from November 15, 2021 to December 14, 2021.

Application Form Submission Guidelines:

- DCWP will only accept the DCWP-approved Application Form, which is available online at nyc.gov/BusinessToolbox.
All Application Forms must be completed and submitted by 11:59 P.M. on the 20th business day following the publication of this Notice, which is December 14, 2021.
Only one Application Form will be accepted from each applicant.
Application Forms will not be accepted from licensees already assigned the legal limit of 30 registration plates.

Selection Process:

- At the close of the Application Period, DCWP will assign each accepted application a "Priority Number" using a computer-generated random number selection program.
If the number of accepted Application Forms exceeds the number of available registration plates, registration plates will be issued in the order of the assigned Priority Numbers.

- If the number of available registration plates exceeds the number of accepted Application Forms, approved applicants may receive an offer to apply for more than one plate, up to a maximum of five. The exact number of plates DCWP may offer to a pedicab business will be based on the number of applicants and the number of available plates until all registration plates are issued.

- DCWP will notify all eligible applicants, in writing, of the opportunity to apply for a registration plate. Within 45 days of receiving that notice, an applicant must prove that its pedicab complies with all New York City laws and rules governing pedicab registration, including passing a pedicab inspection.
If an applicant fails to comply with all registration requirements within the allotted time, DCWP's offer to that applicant becomes void, the applicant is removed from the application pool, and an offer is made to the applicant with the next Priority Number.

Note: A Pedicab Business license is not required to submit an Application Form, but a valid Pedicab Business license is required before DCWP will issue a registration plate.

Application Forms may be obtained and submitted:

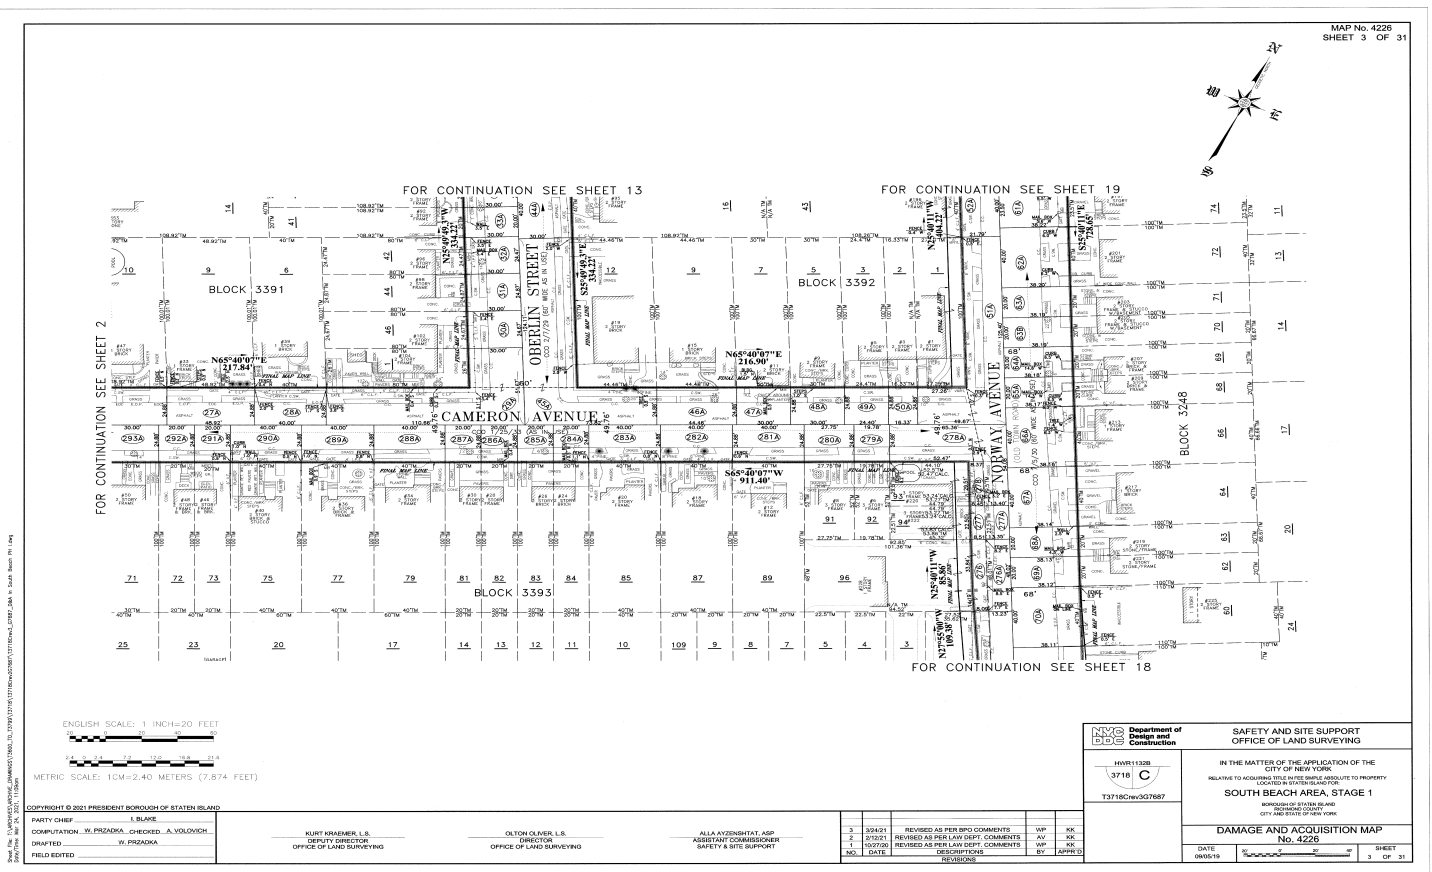

- Obtain online at: nyc.gov/BusinessToolbox
Submit online at: pedicabs@dca.nyc.gov
