NEW CAPABILITY PROJECT/DIGITAL EXPERIENCE PLATFORM - Request for Qualifications - PIN# 23-000XXRJT - Due 11-18-22 at 2:00 P.M.

The New York City School Construction Authority ("SCA"), has approximately 1300 staff, and 3,000 + external partners accessing our systems. The SCA is seeking a qualified developer/designer ("Consultant") to redesign the SCA's existing Digital Experience Platform (https://www.nycsca.org). The Digital Experience Platform must be designed and organized in a manner that follows modern web standards in design, security, ADA WCAG 2.0 AA, and functionality with a focus on providing information and services to the SCA's client users. The Digital Experience Platform must also have a user-friendly backend that can be easily operated by employees with non-technical backgrounds. The SCA aims to implement best practices and

technologies, revise the information architecture, and improve content strategy and visual design.

This RFQEI seeks responses from consultants and associated products which would serve the needs of the SCA. We believe that there are many consultants that can satisfy our needs in regard to a platform. The ideal respondent has a proven track record on creating Business to Business and Government to Consultant websites.

The Consultant must have experience creating client-driven information architecture and graphic design that facilitates the SCA's engagement with its audience. The SCA website should be designed to meet the needs of companies seeking to do business with the SCA, vendors currently engaged with SCA contracts, and the general public. The Consultant must provide all labor, equipment, and expertise to efficiently review, evaluate, and produce multiple website designs for evaluation. The Consultant must have experience designing and/or redesigning websites, with special consideration for Consultants who have done so for public organizations or construction related firms.

The SCA also requires self-service portals for external users such as design firms, contractors, and the general public. The Consultant will guide the SCA through a needs/requirements analysis to identify and evaluate all possible design options and elements. Functional elements of the Digital Experience Platform must include:

- 1. Promotion of communication tools such as web posts, event calendars, and links to SCA social media (Twitter, Instagram, YouTube etc...) through robust integration.
2. Analytics integration that provides information on traffic analysis reporting capabilities and available metrics for user/system response times such as number of visitors, page views, and frequently visited pages
3. Security features to prevent website hacking or defacement
4. Third party integration

Other features that the Digital Experience Platform may require are listed in the Appendix at the end of the document.

Below are examples of the types of interactions customers currently have with our website. It is not comprehensive, and Consultants should explain how they would expand upon the user stories below to ensure our website serves all of our potential customers.

- 1. A design consultant, Construction Company, or other vendor is interested in potentially working with the SCA. The website should explain how to work with us, how to get prequalified, how to bid on our work, and what the benefits are to working with us.
2. A vendor has been awarded a contract and wants to know about the specifications and requirements to working with us and how to get paid.
3. A member of the public or elected official is interested in finding out about the work going on in their school district.
4. A member of the public is interested in becoming an SCA employee.
5. A member of the Minority-Owned Business, Women-Owned Business, or Locally Based Enterprise community wants to find out the benefits of being certified by the SCA and what special programs we run for them. The SCA has a variety of bespoke systems and COTS applications that will need to integrate with this solution. MS Active Directory integration - is our user access management tool, Vendor Access System, and APIs.

Submission: Please provide a written proposal with the following sections:

- 1. A letter of your interest in working with the School Construction Authority to provide a solution.
2. The firm's contact information
3. Please fill out the embedded spreadsheet with your answers to the queries.
4. All services, functions, and features the firm offers related to website design/redesign.
5. The firm's qualifications for the project including key personnel
6. A summary of firm's recent experience with similar projects including timeline, payment method (hourly rates, lump sum, etc.) and total cost
7. Examples of existing designs/redesigns e.g., web links, before and after shots, etc.
8. If awarded, please explain how this project will be integrated into the firm's present workload
9. Describe a government client engagement if any

10. Describe your experience partnering with Minority owned, Women owned or local New York City enterprises to deliver your product or services.

11. Described how your product and services are licensed

The SCA is implementing a two-step procurement process. Our initial step is asking prospective consultants to demonstrate certain qualifications in response to this RFQEI. Thereafter the SCA will evaluate procurement methods available and move towards consultant selection. The SCA may choose to short list respondents to this RFQEI to provide a live demonstration of your solution. Although proposing firms need not be pre-qualified by the SCA at the time of bid, each firm must be pre-qualified prior to contract award.

Interested firms should respond via email submitting their qualifications and expression of interest.

Use the following address unless otherwise specified in notice, to secure, examine or submit bid/proposal documents, vendor pre-qualification and other forms; specifications/blueprints; other information; and for opening and reading of bids at date and time specified above.

## CITYWIDE ADMINISTRATIVE SERVICES

### MEETING

Dawn M. Pinnock  
Commissioner

Roman Gofman  
Acting Deputy Commissioner  
Citywide Procurement

October 31, 2022

Dear Vendor,

We're excited to let you know that the DCAS annual Food Procurement Expo will occur on Thursday, January 12, 2023, from 10:00am to 3:00pm at 31 Chambers St, NY, NY 10007. You are invited to apply to showcase your products to City agencies.

In April, the City released updated NYC Food Standards and we would like to invite participation from vendors to showcase foods that meet these standards. The revised Foods Standards recognize the importance of promoting an environmentally sustainable food system that supports local and regional economies. As such, we are particularly interested in whole and minimally processed plant-based protein products and entrees. Additionally, we are eager to learn about your other products available that meet our added sugar and whole grain requirements. Products that feature New York state fruits, vegetables, grains, legumes, dairy and other agricultural products are always welcome.

The Food Procurement Expo will be held in-person. If selected, you must bring the proposed food items in your application for sampling. Please note that we will be expecting upwards to 200-300 people in attendance.

Question	Answer
What types of foods does the City procure?	Categories of food include bread and baking products, dairy products, fresh fruits and vegetables, meats and fish, processed fresh and frozen foods, shelf-stable foods, and specialty foods such as Halal and Kosher foods.
What are examples of food items agencies are interested in purchasing?	City agencies have expressed interest in products such as spices and seasonings, legumes that offer protein (e.g. beans, chickpeas and lentils), curries and stews, local fruits and vegetables, whole grain products (e.g. bread, rice, noodles and pasta), and frozen ready-made items.
Which City agencies purchase food?	Agencies that purchase food include - but limited to - Department of Education, Department of Corrections, Administration for Children Services, Human Resource Administration, New York Police Department, and Department for the Aging.
Since there are many cultures represented in NYC, are there taste or culinary considerations in City food procurement?	City agencies have expressed interest in looking for ideas from plant-based cuisines to serve their populations. Examples include Buddhist vegetarians, Rastafarian Ital cuisine, plant-based cuisines from the Indian subcontinent, rice and beans cultures (i.e. Mexico, Colombia), Mediterranean cuisines, Ethiopian vegetarian foods, etc.
Will I have access to water at the event?	There will be water access in the public bathroom but we strongly encourage vendors to be self-sufficient and not rely on this water source.
Who will be attending the event?	All food procurement staff across citywide agencies will be invited to attend the event.
Can I use gas stove burners at the event?	You cannot use gas stove burners. However, you may use sterno flames to keep food warm.
Will I have access to electricity at the event?	Yes but there will be a limited number of outlets available per vendor. Special high voltage electricity needs can be accommodated once the application has been accepted.

Food Standards

## Meals and Snacks Purchased and Served

This document outlines standards for food purchased and meals and snacks served by City agencies and their contractors, with the goal of improving the health of all New Yorkers. The New York City (NYC) Food Standards (Standards) aim to reduce the prevalence of chronic disease, such as obesity, diabetes and cardiovascular disease, by increasing access to healthy foods and improving dietary intake. The Standards help to combat some of the structural inequities that make healthy eating inaccessible for those with limited resources by ensuring that any New Yorker accessing meals or snacks from City agencies and their contractors will be served more nutritious foods. The Standards recognize the importance of promoting an economically and environmentally sustainable food system that supports local and regional economies while minimizing environmental impacts and the alignment of this effort with long-term public health goals. Thus, NYC has committed to adopting a Good Food Purchasing<sup>1,2</sup> framework to align and direct its food buying power in support of healthy and sustainable food practices. Requirements and recommendations related to these priorities are included throughout the Standards and reflect the interrelated nature of promoting individual, community and planetary health.

Agencies and their contractors are required to follow the standards described in each of the three sections:

### Section 1. Standards for Purchased Food

Addresses food items purchased and provides specific standards by food category.

### Section 2. Standards for Meals and Snacks Served

Addresses the overall nutrient requirements for meals and provides standards for snacks and special occasions.

### Section 3. Agency- and Population-Specific Standards and Exceptions

Addresses standards for specific populations (for example, children) and agencies. The additions and exceptions in this section supersede the first two sections. For example, children ages 12 months to 2 years may be served whole milk instead of 1% or nonfat milk as required in Section 1.

The first two sections overlap: All purchased food items must meet the standards in Section 1 and be incorporated into meals or snacks that meet the nutrient requirements in Section 2. The Standards for Purchased Food have been adopted to provide healthier options for those who only eat a few items of each meal. The Standards for Meals and Snacks Served have been adopted to provide those eating whole meals and snacks with a nutritious, balanced diet.

The Standards were developed based on each City agency's feedback, review and agreement. All food purchased and served by a City agency must meet the **required** standards that appear in bold. Agencies are expected to be in compliance with the revised Standards by July 1, 2023. Agency contractors are also required to comply with these Standards. This includes food service contractors, such as caterers, and programmatic contractors that serve food within the context

of the program. These Standards do not apply to concessions that provide food for sale through leases, licenses or contracts at City programs.

The Standards were first made effective by an Executive Order in 2008. Executive Order 8,<sup>2</sup> signed on February 10, 2022, continues the mandate for the Food Standards and requires that they are reviewed and revised every three years. The Standards were revised in March of 2022. Updates were previously made in 2011, 2014 and 2017. The Executive Order mandates that all City agencies follow the Standards for all foods that are purchased, prepared or served by the agency, agency contractors or both, as well as the NYC Standards for Food Vending Machines and the NYC Standards for Beverage Vending Machines.<sup>3</sup> The Executive Order also commits to the establishment of a Good Food Purchasing framework to provide transparency about how mayoral agencies' food procurements impact core values relating to local economies, environmental sustainability, valued workforce, animal welfare and nutrition.

5

**B. Meals Served**

**1. Nutrient Requirements**

**For sites serving three meals per day:**

- | **Require** three meals combined meet the following daily standards:<sup>13,14</sup>

Calories*	2,000 calories
Sodium	< 2,300 mg
Saturated Fat	< 10% of total calories

Added Sugar	< 10% of total calories

\***Require** daily calories are no more than 10% above or below the standard.

**For sites serving only one or two meals per day:**

- | **Require** each meal served meets appropriate range of calories, sodium and fiber:
  - | 25% to 30% for breakfast
  - | 30% to 35% for lunch

- | **Require** each meal served meets the percentage for saturated fat stated on the chart above.
- | **Require** total meals served daily meet the percentage for added sugar stated on the chart above.
- | Recommend each meal served meets the percentage for added sugar stated on the chart above.

**Note regarding added sugar meal standard:** If an agency or their contractors cannot assess their compliance with the added sugar standard due to limitations of vendors, contracts, data and/or software, agencies must submit an action plan that includes: 1) a strategy for data collection and assessment and expected timeline for assessment and 2) any available nutrition data on added sugar. This plan must be submitted to the Mayor’s Office of Food Policy and the New York City Department of Health and Mental Hygiene (NYC Health Department) on or before December 31, 2022. The NYC Health Department will work with agencies to develop reporting plans following the submission of the action plan.

<sup>13</sup> Standards are based on the United States Department of Agriculture (USDA) 2020-2025 Dietary Guidelines for Americans. Visit [dietaryguidelines.gov/sites/default/files/2021-03/Dietary\\_Guidelines\\_for\\_Americans-2020-2025.pdf](http://dietaryguidelines.gov/sites/default/files/2021-03/Dietary_Guidelines_for_Americans-2020-2025.pdf).

<sup>14</sup> Recommend the following daily nutrient standards: Protein: 10 to 35% of total calories; Carbohydrate: 45 to 65% of total calories; Potassium: 4,700 mg; Calcium: 1,000 mg; Iron: > 8 mg for males and 18 mg for females.

6

- | Program regularly serves fewer than 200 people per meal.

Section 3. Agency- and Population-Specific Standards and Exceptions

A. Children

Children have different nutritional needs than adults. This section provides specific nutrition standards and exceptions that apply to agencies that serve those age 18 years and younger.

1. Requirements for Purchased Foods

Agencies purchasing food for children (age 18 and younger) are required to follow the standards listed in Section 1 unless stated otherwise below:

All food and beverages

Require, for sites serving a majority of children age 18 and younger, food and beverages do not contain low-calorie or no-calorie sweeteners.

Beverages

- Require, for child care facilities regulated by Article 47 of the NYC Health Code, not serving 100% fruit juice to children age 2 and younger.
Require, for child care facilities regulated by Article 47 of the NYC Health Code, 100% fruit juice with no added sweeteners limited to ≤ 4 oz per serving.

Milk and milk substitutes

- Require, for child care facilities regulated by Article 47 of the NYC Health Code, only unsweetened milk.
Require, for children age 12 months to 2 years, only unsweetened whole milk.

24 The definition is available at govinfo.gov/content/pkg/CFR-2011-title7-vol4/pdf/CFR-2011-title7-vol4-part210-appB.pdf.

11

- Require, for children age 2 years and older, only unsweetened 1% or nonfat milk (unless milk with a higher fat content is medically required, as documented by a child's medical provider).
Require, for children age 4 to 18 years, flavored milk or flavored fluid milk substitutes be ≤ 130 calories per serving.
Recommend that agencies set a time line for phasing out flavored milk and flavored fluid milk substitutes.

2. Nutrient Requirements for Meals and Snacks Served25

Overall requirements

Recommend, for agencies serving a majority of participants age 18 years and younger, following the National Academies of Sciences, Engineering, and Medicine's Dietary Reference Intakes for appropriate age groups.26

Sodium

- Require, for sites serving a majority of children age 2 to 3 years, limiting sodium to ≤ 1,200 mg per day (breakfast: ≤ 360 mg; lunch: ≤ 420 mg; and dinner: ≤ 420 mg).
Require, for sites serving a majority of children age 4 to 8 years, limiting sodium to ≤ 1,500 mg per day (breakfast: ≤ 450 mg; lunch: ≤ 525 mg; and dinner: ≤ 525 mg).
Require, for sites serving a majority of children age 9 to 13 years, limiting sodium to ≤ 1,800 mg per day (breakfast: ≤ 540 mg; lunch: ≤ 630 mg; and dinner: ≤ 630 mg).

Fiber

- Require, for sites serving a majority of children age 2 to 3 years old, ≥ 14 g of fiber per day.
Require, for sites serving a majority of children age 4 to 8 years old, ≥ 19 g of fiber per day.
Require, for sites serving a majority of children age 9 to 13 years old, ≥ 24 g of fiber per day.

Calories

Participants of the School Breakfast Program and National School Lunch Program may adhere to the calorie requirements provided by this program.

B. Correctional Population

Agencies serving the adult correctional population have a majority of young, moderately active people who may require a higher than average caloric intake. Require ≤ 2,200 calories per day for females and ≤ 2,800 calories per day for males.27

25 See Page 7 for programs that are exempt from this standard.

26 The National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division. To view the Dietary Reference Intakes tables and application, visit nationalacademies.org/hmd/Activities/Nutrition/SummaryDRIs/DRI-Tables.aspx.

27 Calorie requirements are based on 2020-2025 Dietary Guidelines for Americans, which only offer information by sex assigned at birth.

12

C. Youth Detention Facilities

Agencies serving the youth detention population have a majority of young, moderately active people who may require a higher than average caloric intake. Require ≤ 2,500 calories per day for males.27,28

D. Adult Male Residents of the Shelter System

Require ≤ 2,600 calories per day for males residing in the shelter system (for example, single-adult male shelters, safe havens, drop-in centers, adult family shelters, and those for families with children).27,28

E. Child Care Services Providers

Home-based child care providers are not required to comply with these Standards.

F. Patients Under Therapeutic Care

Nutrition requirements consistent with established medical guidelines and diets for patients under therapeutic care supersede general nutrition criteria described here. The Patient Bill of Rights allows patients under therapeutic care to request specific food items. These items are considered part of the therapeutic diet and do not need to meet the nutrition criteria.

Require plant-based meal and snack options be available to patients upon request, in compliance with New York State law.29

G. Populations With Religious or Special Dietary Food Needs

If an agency cannot meet the required purchased food standards in Section 1 due to a lack of availability of food items that meet specific needs of the population it serves (for example, packaged kosher foods), the agency is expected to seek suitable replacements in the marketplace as quickly as possible. The agency must identify and report these products to the Mayor's Office of Food Policy and the NYC Health Department.

H. Emergency Food

Agencies that purchase food to be distributed by a third party to emergency food providers, such as soup kitchens and food pantries, are required to follow the standards outlined in Section 1. This does not include food purchased for the intention of a disaster response outlined in this section (see Section 3.K: Foods for Disaster Response).

I. Federal Commodity Food Program

Food provided by the federal government to agencies or agency programs is not required to meet the standards outlined in Section 1. However, agencies and programs accepting these foods are required to meet the standards outlined in Section 2. Agencies and programs are expected to provide documentation upon request to verify which products were obtained through the commodity food program.

28 Based on agency-specific population data.
29 New York State regulations can be found at legislation.nysenate.gov/pdf/bills/2019/S1471A.

13

J. Donated Foods

Foods that are donated or provided at no cost to a program may be permitted to be served as a supplement to regularly scheduled food service.

Donated individual food items that contain Nutrition Facts labels, such as those listed in Section 1 (for example, canned and frozen vegetables, sliced sandwich bread) must adhere to the standards outlined in Section 1. These items are not required to meet standards in Section 2.

Donated ready-to-eat or prepared foods (for example, ready-to-eat sandwiches or meals) are not required to meet standards outlined in Sections 1 and 2. If supplementing food service with donations of prepared foods, programs should make an effort to serve these foods in small portions (for example, half-sized sandwiches).

Programs may not accept any donations of candy, desserts (for example, cakes, cookies and pastries), fried foods (for example, fried chicken, potato chips, French fries and doughnuts) or sugary drinks (for example, soda, fruit drinks and iced tea) for use in regular meal or snack service. If desserts are donated for a special occasion meal, it may be offered if a "healthy option" (for example, fresh fruit, leafy green salad and vegetable slices) is offered with it. These items may only be served in preplanned, special-occasion meals.

Programs should prioritize donations that are healthy, including minimally processed, whole and plant-based foods, such as fruit, vegetables, whole grains and low-sodium foods, when possible.

K. Foods for Disaster Response

Food purchased by agencies to serve solely for a disaster or crisis response are not restricted by these Standards, recognizing that foods stocked for such purposes intentionally include nutrient-dense products.

Recommend agencies develop a plan to address nutrition requirements for meals and snacks served during prolonged disaster (more than one month) and submit a plan to the NYC Health Department.

## DESIGN AND CONSTRUCTION

### ■ NOTICE

On behalf of all New York City agencies and entities subject to the New York City Procurement Policy Board (PPB) Rules, the New York City Department of Design and Construction (“DDC”) hereby requests approval to use the Innovative Procurement method, pursuant to PPB Rule § 3-12, to procure the design and construction services, including any services incidental thereto, through the project delivery method commonly known as design-build for public work projects authorized pursuant to New York State law.

On July 2, 2018, the then-acting Chief Procurement Officer (“CCPO”) approved DDC’s request to use PPB Rule § 3-12 to procure design and construction services using the design-build project delivery methodology for project authorized under New York State law. Since the approval, and as of the date of this request, DDC has registered eight (8) design-build agreements (“DBAs”) and is currently in the process of procuring approximately 11 more design-build projects.

For the reasons listed below, DDC is requesting a new approval for use of PPB Rule § 3-12 to procure design and construction services using the design-build project delivery methodology for additional projects, including any projects authorized under the expanded design-build authority granted by the New York City Public Works Investment Act. This innovative method expands upon the contract administration component of design-build.

#### 1. The Nature and Requirements of the Procurement and Contract Administration Method being proposed

The innovative procurement method to be used for a design-build contract varies in a number of respects from the procedure otherwise applicable pursuant to the PPB Rules. The proposed innovative procurement process involves multiple steps and may result in multiple awards, including one award to the design-builder and additional awards, in the form of stipends agreements, to short-listed proposers.

##### Step (1): Request for Qualifications

The contracting agency develops a short list of qualified design-build entities through the issuance of a publicly advertised Request for Qualifications (RFQ). The RFQ includes a general description of the public work, the maximum number of responding entities to be included on the list, the selection criteria to be used and the relative weight of each criteria in generating the shortlist. The contracting agency evaluates and rates all responses to generate the short list of entities that may propose as outlined in Step (2).

##### Step (2): Request for Proposals

Once the short list is established, the contracting agency releases a Request for Proposals (RFP). The contracting agency may, at its discretion, solicit feedback from the short-listed entities to help finalize the scope or other language of the RFP. Only the short-listed entities will be permitted to submit a proposal in response to the RFP. The contracting agency will select the proposal that represents the best value to the City and may incorporate a quantitative factor to be used in evaluating bids or offers of firms that are certified as Minority-or Women-Owned Business Enterprises (M/WBEs) pursuant to Section 1304 of the New York City charter or article 15-A of the executive law.

The RFP sets forth the scope of work, and other requirements, as determined by the contracting agency, including separate goals for design and construction work under the DBA to be performed by M/WBEs. The RFP must specify the criteria to be used to evaluate the proposals and the relative weight of each evaluation factor. All proposals submitted shall be scored according to the criteria listed in the RFP and such final scores will be published on the contracting agency’s website.

##### Award Phase

The RFP may result in multiple awards. There will be an award to the responsive and responsible design-builder that offers a proposal that is of the best value to the City for the design-build work. At the agency’s discretion, there may be awards to the remaining short-listed proposers that are responsive and responsible. The amount for these additional awards will be based on a pre-determined percentage or dollar value as outlined in the RFP and serves as an incentive to submit a proposal and enable the contracting agency to purchase the ownership of ideas and intellectual property set forth in the proposal(s).

##### Contract Administration Phase

The awarded DBAs will include contract administration processes other than the standard City procedures, including, but not limited to, time extensions and the dispute resolution process.

### Time Extensions

Time extensions under the DBAs are not subject to the Board of Time Extension approval as set forth in PPB Rule 4-03, but the DBA will provide that determinations with regard to time extensions are final and binding. The design-builders are entitled to time relief pursuant to specific relief events enumerated in the DBAs. There are specific events for which design-builder is only entitled to time extensions (Relief Events) and other events, referred to as Compensable Relief Events, where the design-builder may be entitled to compensation in addition to time. Subject to the requirements set forth in the DBA, the design-builder can seek a time extension due to a Relief Event and that request may be granted upon review by the agency of the design-builder’s time impact analysis, among other documentation, showing how the specific Relief Event has delayed the project’s critical path. The determination as to whether the design-builder is entitled to time relief is made by agency representative and must be approved by the ACCO. However, this decision is not subject to the Board of Time Extension. Furthermore, the decision as to whether the design-builder is entitled to an extension of time to the guaranteed substantial completion date, or another milestone date, can occur, at any time during the project duration, and not only at substantial completion, provided that the Relief Event that has caused the delay has ended.

### Resolution of Disputes Arising Out of Contract Administration

Disputes under the DBA are subject to a different dispute resolution procedure than what is currently provided for in Section 4-09 of the PPB Rules. Each design-build project has its own Disputes Review Board (“DRB”), which is created at the beginning of a project. Depending on the size of the project, the DRB may consist of one or three members. All disputes, unless they are ineligible disputes, must go through the DRB process.

The DBA sets out specific timelines for each step of the DRB process, resulting in a DRB recommendation being issued as early as 60 days after the submission of the notice of dispute by either the agency or design-builder, provided no extensions are requested and agreed to by both parties. The recommendation of the DRB is non-binding and both the agency and the design-builder must respond within 15 business days of the DRB determination by either accepting or rejecting the DRB’s recommendation. Except as noted below, if the agency and the design-builder cannot come to an agreement on a dispute following the DRB’s recommendation, the design-builder may commence a plenary action on such dispute.

If the agency determines that the design-builder is in default, such decision also is subject to the DRB process (except in cases of criminal or ethical defaults). However, following the DRB’s recommendation, the design-builder’s only recourse is a proceeding pursuant to Article 78 of the New York State Civil Practice Law and Rules. Additionally, the agency’s determination of design-builder defaults on ethical or criminal basis is not subject to the DRB process.

#### 1. Why this method serves the City’s interest better than the current Rules

The design-build project delivery method is an important tool for the City’s procurement process and has seen increasing widespread adoption throughout the United States. The design-build method combines into a single contract both the design and construction services. Design-build projects allow a single entity to be responsible for all phases of the project, including design and construction, with the goal of reducing costs and expediting project delivery while maintaining the required quality and compliance. This innovative method enables the City to award such contracts on the basis of best value and also provides the City with the option to make multiple additional awards to a short-list of proposers, increasing the competition and quality of proposers. The method operationalizes the authority granted to certain City agencies pursuant to New York State law. The current PPB rules do not contemplate the necessary multi-step process to procure both design and construction services, as described above.

#### 2. The time within which this method will be implemented and utilized

To date, DDC has awarded and registered eight (8) design-build contracts; however only one design-build project has been in the contract administration stage for more than a year; the NTPs for the remaining design-build projects have been issued in the last five to four months. So far, the design-build project delivery method has been successful for the City; however, due to the extensive and labor and time intensive procurement process, and the limited experience DDC has administering these contracts, DDC is requesting a new innovative procurement approval under PPB § 3-12 so that it can further examine and evaluate the design-build method before proposing rule changes to the PPB. In particular, the City needs more time to examine how design-build contracts are administered.

Finally, feedback from other City agencies, once they have their own experience in procuring, awarding, and administering design-build contracts should be taken into consideration before rule changes to the

PPB, which will impact all City agencies using the design-build method, are implemented.

The method will be in use until there are codified PPB rules addressing these procedures, the time period to utilize such innovative procurement method elapses, or the authority granted pursuant to New York State law elapses, whichever occurs first.

3. Description of services to be procured and approximate dollar value of contract(s)

This method will be utilized by agencies to procure design-build services, and any services incidental thereto, in connection with certain public works as authorized by State Law. The value of the projects procured under the New York City Public Works Investment Act must be either 1) not less than \$10 million, 2) not less than \$1.2 million if the project primarily consists of a) pedestrian ramps and similar infrastructure to improve access to sidewalks in the City to improve access for people with disabilities, b) renovation and construction of cultural institutions located on publicly owned real property and of public libraries in the City; or c) security infrastructure, including bollards, planters and other physical structures, designed to protect life and property from acts of terror or mass violence, or 3) not less than \$1.2 million if the project is a public work in connection with property within the jurisdiction of the New York City Department of Parks and Recreation or the New York City Housing Authority.

Based on the above, it is proposed that innovative method constitutes an appropriate procurement method under Section 3-12 of the Procurement Policy Board Rules.

NYC DDC would like to give this opportunity to accept comments and expressions of interest on this proposed method. Comments and expressions of interest may be emailed no later than November 30, 2022, to Michael Ransom, at Ransommi@ddc.nyc.gov.

The first planned procurement to the Design Build Project Delivery Method will be for Murphy Brother's Playground Comfort Station, EPIN: 8502310009.
