What are we proposing? The New York City Police Department ("NYPD") is proposing to update the Department's rule requiring electronic recordkeeping for purchases and second-hand sales of certain goods, and the uploading of such records to a web-based electronic data transfer service. When and where is the Hearing? The NYPD will hold a public hearing on the proposed rules online. The public hearing will take place at 10:00 am on June 16, 2023.

What authorizes the NYPD to amend these rules? Sections 389(b) and 1043 of the City Charter authorize the NYPD to amend these rules. Local Law 123 of 2022, codified at § 20-268.7 of the Administrative Code of the City of New York, requires dealers in second-hand articles to maintain electronic records of purchase for catalytic converters, and authorizes the police commissioner to specify the manner in which such records are maintained. This proposed rules amendment was not included in the NYPD's regulatory agenda because the NYPD did not publish a regulatory agenda for Fiscal Year

Where can I find NYPD's rules? The NYPD's rules are found in Title 38 of the Rules of the City of New York.

What laws govern the rulemaking process? The NYPD must meet the requirements of section 1043 of the New York City Charter when creating, changing rules or repealing rules. This notice is made in accordance with the requirements of section 1043 of the New York City Charter.

STATEMENT OF BASIS AND PURPOSE OF PROPOSED RULES

Under Chapter 21 of Title 34 of the Rules of the City of New York, dealers in second-hand articles are required to create electronic records of certain transactions and to upload said records to a web-based electronic data transfer service. The purchase of automobile catalytic converters is not covered by this requirement.

Catalytic converters contain amounts of three precious metals, rhodium, palladium and platinum. In recent years, the values of each of these metals has sharply increased to as much as \$29,800 for rhodium, \$3,440 for palladium, and \$1,300 for platinum per ounce. Thefts of catalytic converters involve an individual going under the vehicle and simply using power tools to cut away the relevant portion of the exhaust system. This entire process is completed in minutes, or sometimes under a minute. Because of the rise of the values of these metals, there has been a corresponding increase in catalytic converter thefts. In 2018, there were 1,298 reported thefts of catalytic converters in the United States. In 2019, there were 3,389. In 2020, the number jumped to 14,433, and in 2021, there were more than 52,000 such thefts. That is more than a 3,900% increase nationwide between 2018 and 2021. In New York City, in 2018, 198 catalytic converters were stolen, in 2019 it was 211, in 2020 it was 802, in 2021 it was 3,705, and in 2022 it was 8,576, a 4,231% increase from 2018. Some individuals who steal the catalytic converters may then attempt to sell them to second-hand dealers

The growth in catalytic converter thefts led the New York City Council to enact Local Law 123 of 2022, codified at § 20-268.7 of the Administrative Code of the City of New York, which requires secondhand dealers to maintain and upload such electronic records for transactions involving second-hand catalytic converters. This proposed rule change involving the addition of the purchase of catalytic converters among those second-hand goods that are covered by the recordkeeping requirement is necessary to conform with Local Law 123 of 2022. Such recordkeeping would discourage the purchase of stolen catalytic converters and would assist the NYPD in conducting investigations related to such thefts.

City of Yes for Carbon Neutrality

Statement of No Significant Effect

Pursuant to Executive Order 91 of 1977, as amended, and the Rules of Procedure for City Environmental Quality Review, found at Title 62, Chapter 5 of the Rules of the City of New York and 6 NYCRR, Part 617, State Environmental Quality Review, the Department of City Planning acting on behalf of the City Planning Commission assumed the role of lead agency for the environmental review of the proposed actions. Based on a review of information about the project contained in this environmental assessment statement (EAS) and any attachments hereto, which are incorporated by reference herein, the lead agency has determined that the proposed actions would not have a significant adverse impact on the environment.

Reasons Supporting this Determination

The above determination is based on information contained in this EAS, which finds the proposed actions sought before the City Planning Commission would not have a significant adverse impact on the environment. Reasons supporting this determination are noted below.

Land Use, Zoning, and Public Policy

An analysis of land use, zoning, and public policy is included in the EAS. The New York City Department of City Planning seeks a zoning text amendment to the New York City Zoning Resolution (ZR) to implement changes that would expand opportunities for decarbonization projects within all zoning districts and across all 59 of New York City's Community Districts. The proposed zoning changes would remove impediments to high-performance building retrofits, decarbonization retrofit projects, solar energy, electric vehicle charging, and energy storage systems, as well as other measures that are needed to help achieve the City's ambitious climate goals, falling broadly into four key categories: Energy, Buildings, Transportation, and Waste. Specifically, the Proposed Action includes amendments to the ZR's use regulations, permitted obstruction regulations, floor area regulations, parking regulations, and urban design requirements. The Proposed Action would not increase the allowable floor area ratio (FAR) in any zoning district, nor would it modify (increase or decrease) the parking requirements applicable within any zoning district. The Proposed Action would also create two new discretionary actions; a CPC Action would also create two new discretionary actions; a CPC Authorization to allow CPC to authorize wind turbines to be considered as permitted obstructions beyond the permitted building height and setback, as well as permitted obstructions within the required yards and other required open space; and a Board of Standards and Appeals (BSA) Special Permit for BSA to consider rooftop solar panels to be permitted obstructions beyond the allowances of existing zoning. The Proposed Action would not induce any new development or affect development trends. Due to the broad applicability of the Proposed Action, there are no known or projected development sites associated with this action. To produce a reasonable analysis of the likely effects of the Proposed Action, representative prototypical sites were identified for analysis purposes. Although the Proposed Action would allow developments to waive certain bulk, parking and use regulations, the overall amount, type, and general location of development is not anticipated to change. The land use, zoning, and public policy analysis notes that the Proposed Action would not generate new land uses that would be incompatible with surrounding uses; and currently established land use trends and conditions in the study areas would continue in the future with the Proposed Action. Additionally, the Proposed Action would not conflict with any established public policies. Therefore, the Proposed Action does not have the potential to result in

significant adverse impacts with respect to land use, zoning, and public policy. The WRP number for the Proposed Action is #23-037

Shadows

A detailed analysis of shadows is included in this EAS. The Proposed Action is a generic action and because of its Citywide applicability, there are no known or projected development sites associated with this action. To produce a reasonable analysis of the likely effects of the Proposed Action, a representative prototypical site was identified for shadows analysis purposes. The shadows analysis finds the Proposed Action would generate limited incremental shadows on portions of sunlight-sensitive resources, such as historic resources and/or open space. Analysis concluded that all affected resources would continue to receive substantial direct sunlight throughout the representative analysis days and would not adversely affect public utilization or enjoyment of the resources' sunlight-sensitive features. Any vegetation in the affected resources would continue to receive adequate daylight, which is a minimum of four-to-six hours during the growing season. Therefore, the Proposed Action does not have the potential to result in significant adverse impacts related to shadows.

Statement of Basis and Purpose of Proposed Rule

This proposed Procurement Policy Board Rule (PPB) amendment would update the provisions of the PPB Rules relating to subscription purchasing to account for modern technologies and changes in industry practices.

The PPB is proposing an amendment to PPB Rule \S 1-02(f)(5) that would streamline the process for agencies to purchase physical and electronic subscriptions, by clarifying and broadening the definition of subscriptions, thereby allowing agencies to purchase necessary books,

periodicals, training, and training materials outside of the procedures set forth in the PPB Rules.

The PPB's authority to promulgate these rules is found in section 311 of the New York City Charter. On April 27, 2023, the PPB voted to initiate the rulemaking process under the Citywide Administrative Procedure Act for this rule amendment.

"Shall" and "must" denote mandatory requirements and may be used interchangeably in the rules of this department, unless otherwise specified or unless the context clearly indicates otherwise.

SECTION 1. PARAGRAPH (5) OF SUBDIVISION (f) OF SECTION 1-02 OF TITLE 9 OF THE RULES OF THE CITY OF NEW YORK IS AMENDED TO READ AS FOLLOWS:

(5) subscriptions[, including] to research databases; paper or electronic subscriptions[,] for magazines, [and] newspapers, other periodicals, [orders for] or books [and "]; off-the-shelf["] training [videotapes,] materials including, but not limited to, webcasts, courses, programs, videos, and assessments; and attendance at standard commercially-available training seminars or subscriptions to organizations providing such seminars.
