

Using Integrated Data to Catalyze Transportation Safety Efforts

NJ Safety and Health Outcomes (NJ-SHO) Data Warehouse

Allison E. Curry, PhD, MPH

Recent Safety Strategies Emphasize Importance of Data Integration

LINC S
Linking Information for Nonfatal Crash Surveillance
A guide for integrating motor vehicle crash data to help keep Americans safe on the road

Vision for Initial Development of NJ-SHO

Data Sources

Innovative Features that Enable Critical Research

Vision for Future

Just before crash

Crash

Just after crash

Time period:

minutes

Licensing history
Prior adverse events
Individual/group factors
Medical conditions

Crash

Injury, disability & mortality
Subsequent crash events
Short- & long-term care

Time period:
decades

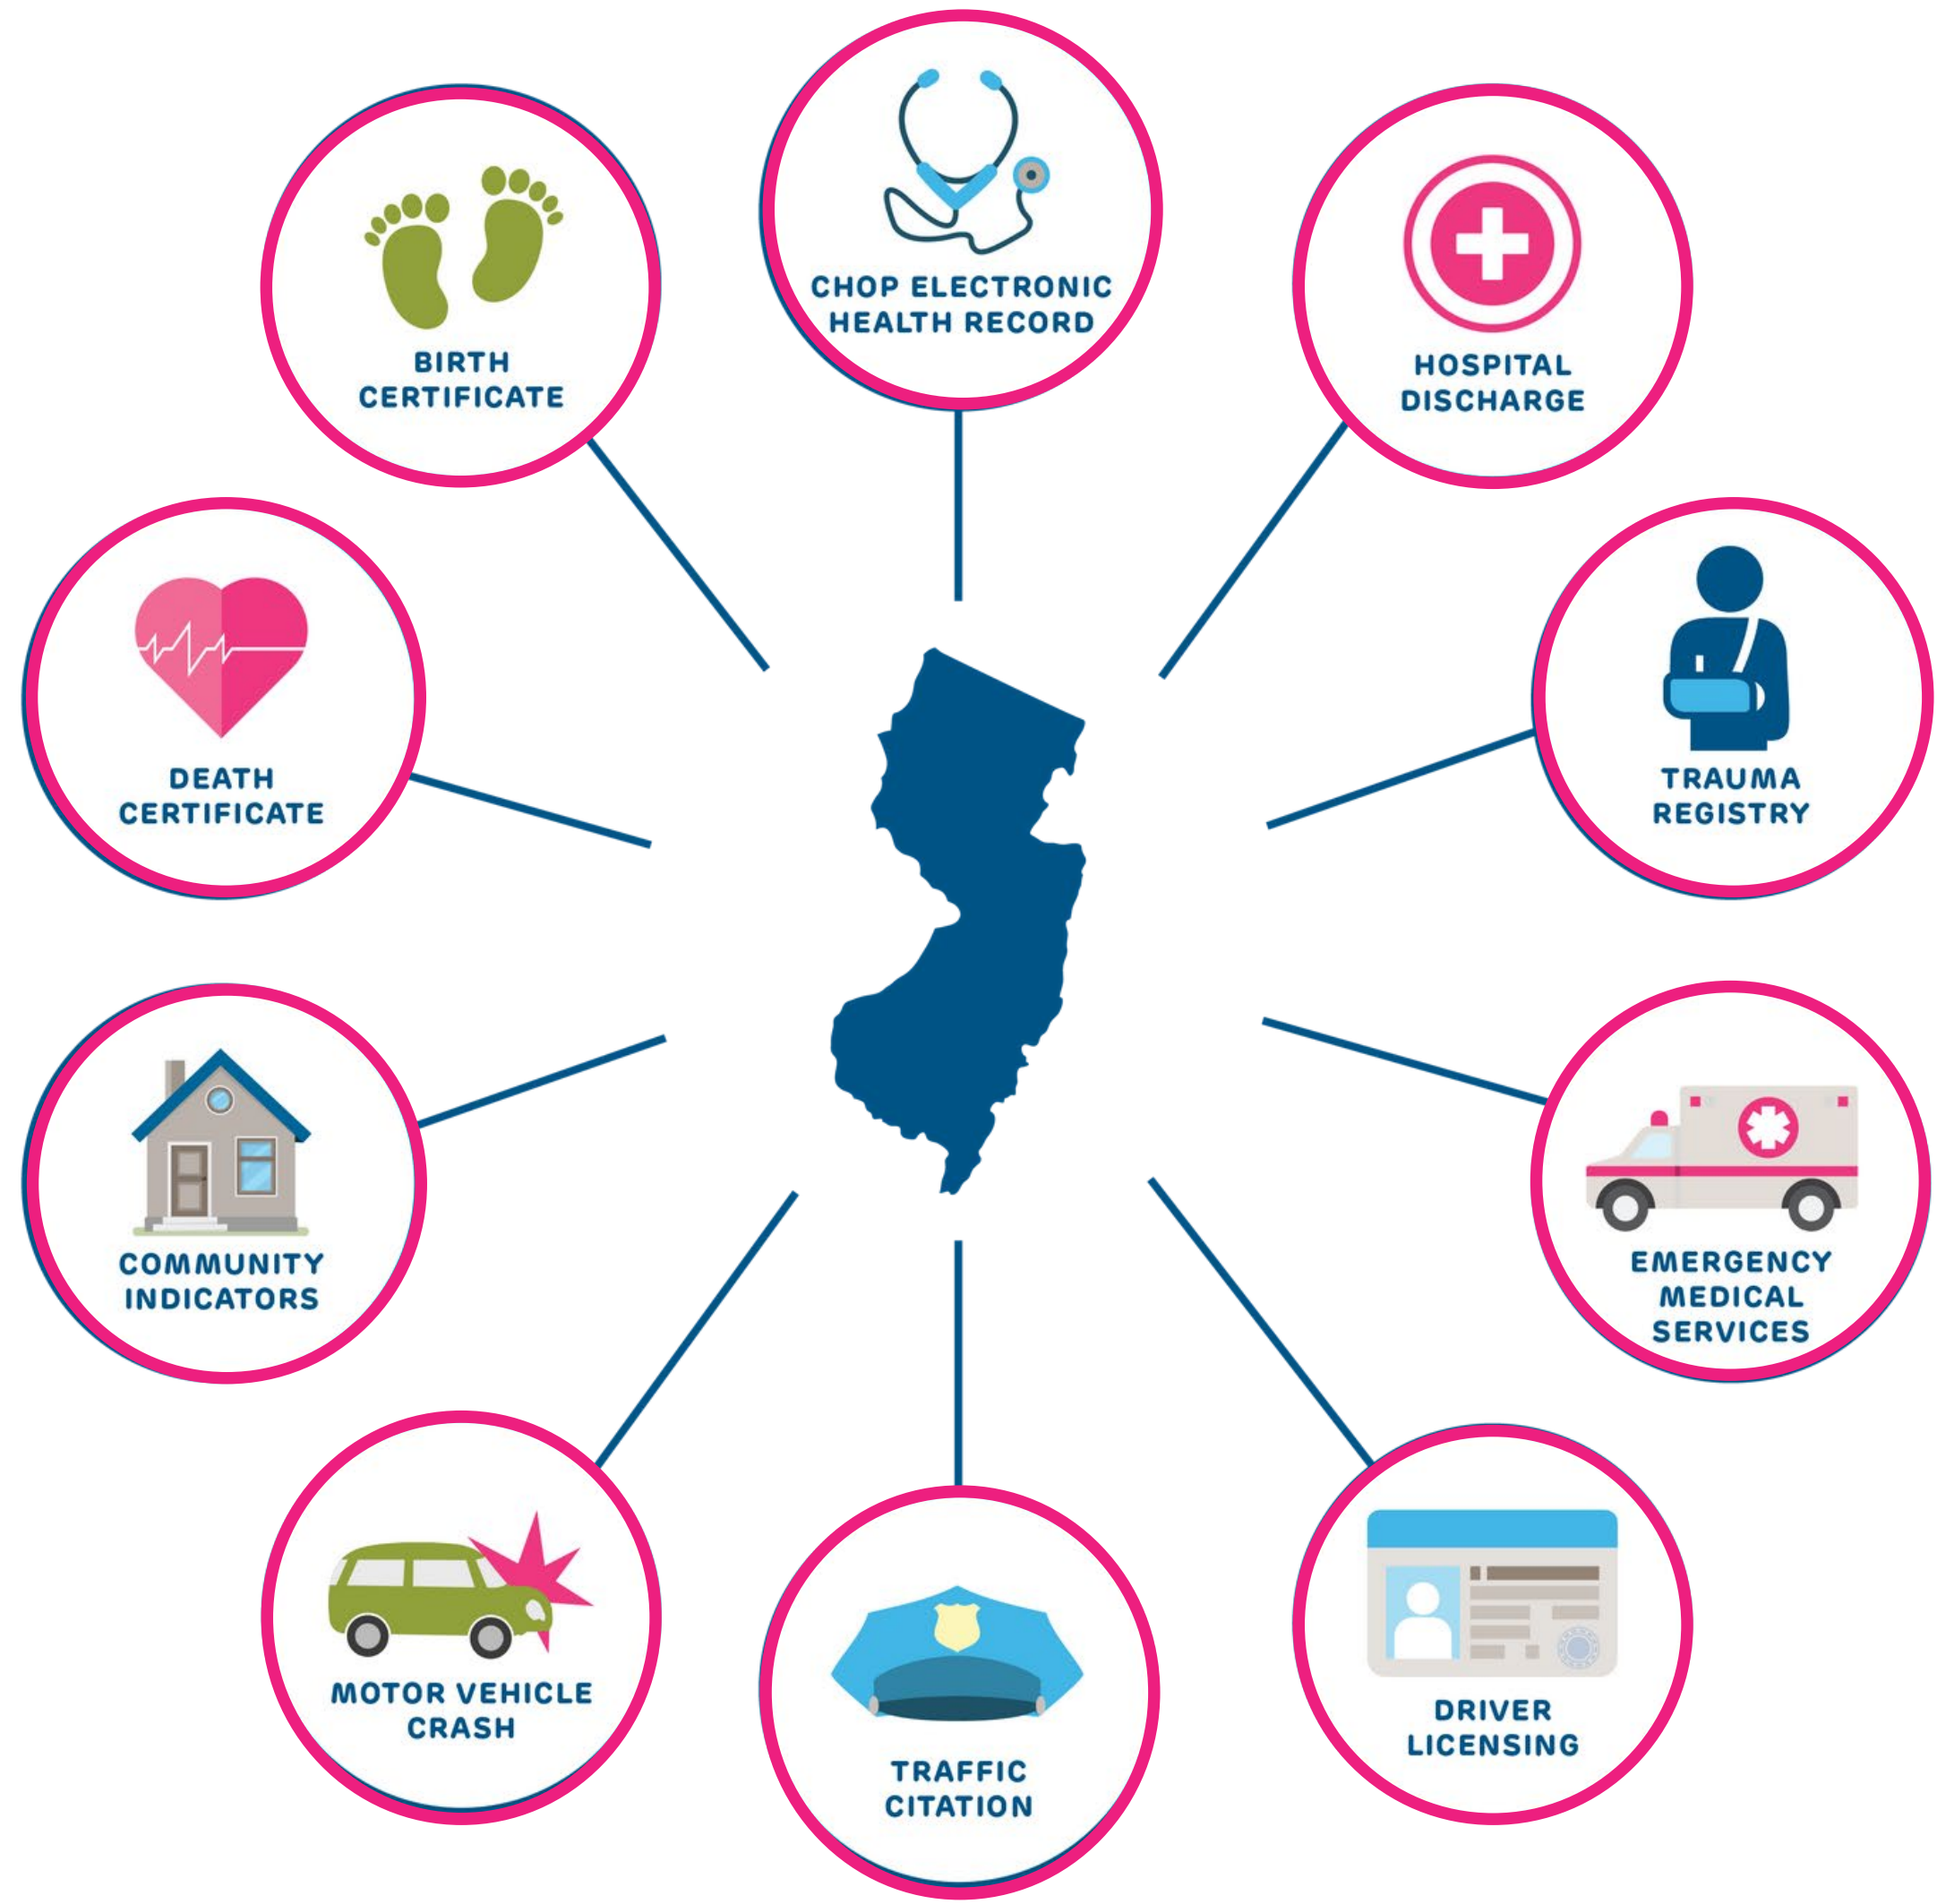

NJ-SHO Warehouse

Currently covers 2004-2019

NJ-SHO Warehouse

Currently covers 2004-2019

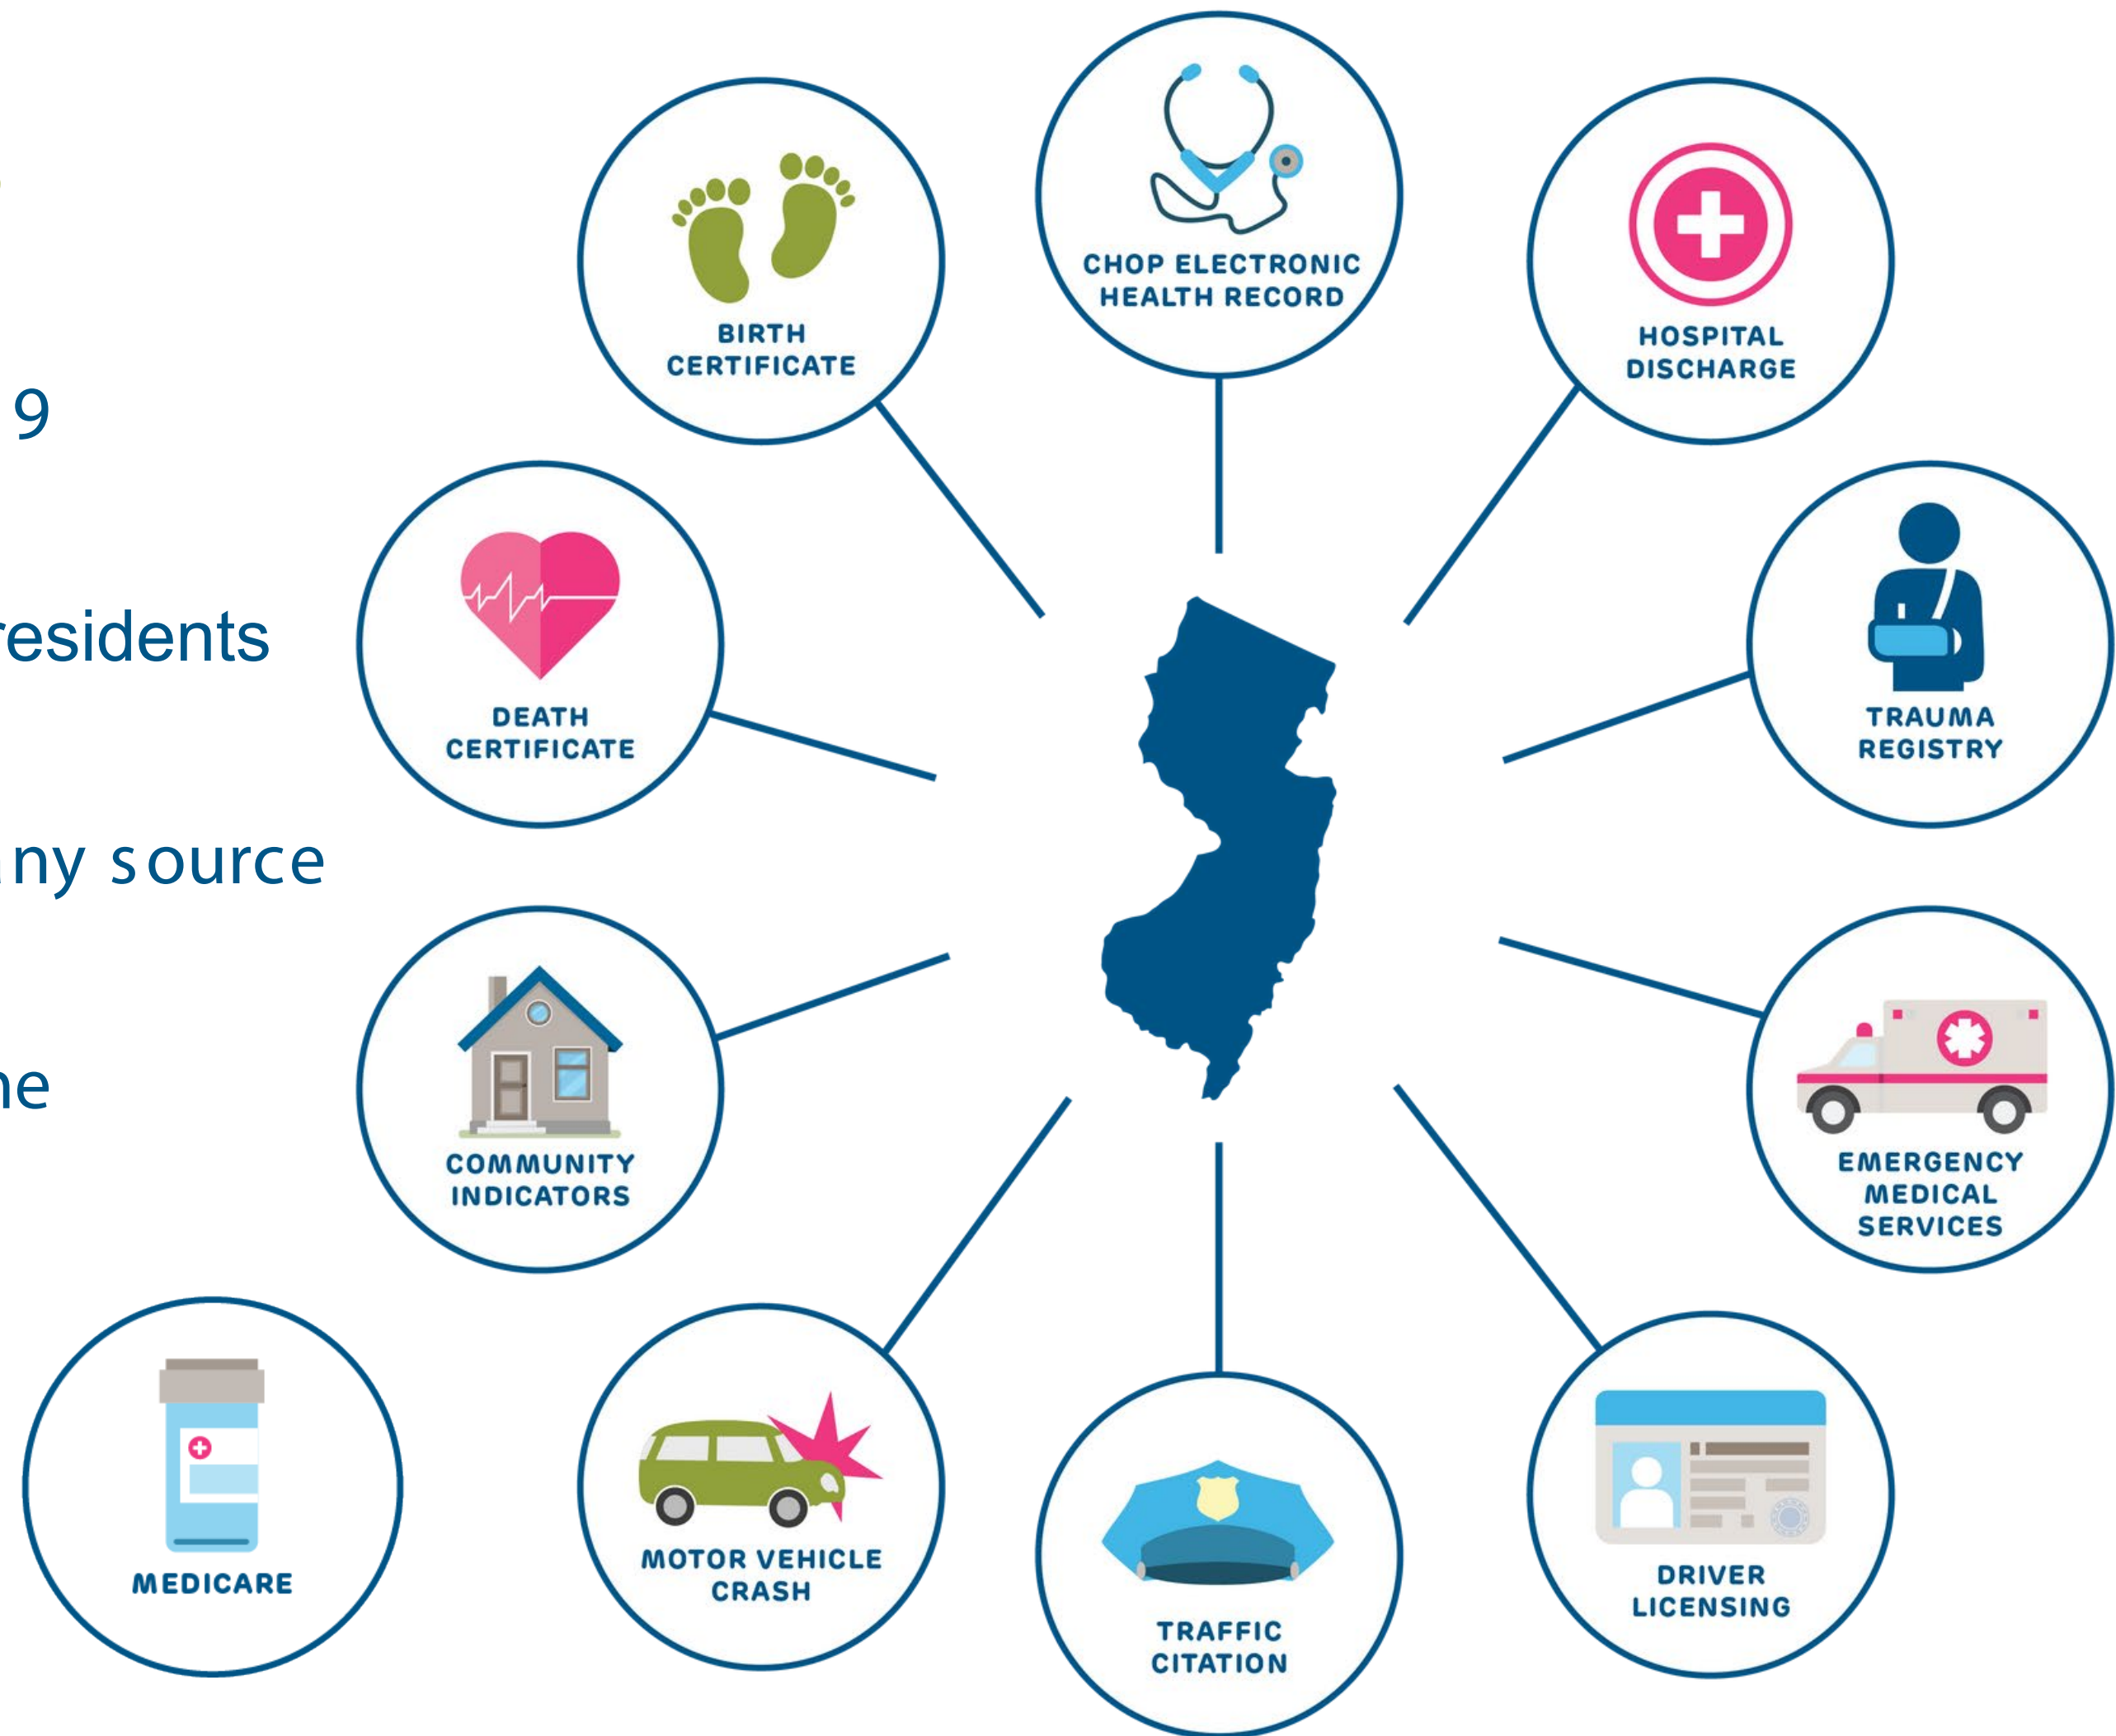

NJ-SHO Warehouse

Currently covers 2004-2019

125M+ records on 24M NJ residents

Individuals who appear in any source

Follows individuals over time

Integrated traffic safety data is critical...

for accurate capture of traffic injuries

NJ Crash Data Misses One-Third of All Crash Injuries

NJ Crash Data Misses One-Third of All Crash Injuries

And 59% of Bicyclist Injuries

Development of the integrated New Jersey Safety and Health Outcomes (NJ-SHO) data warehouse: catalysing advancements in injury prevention research

Allison E Curry ^{1,2} Melissa R Pfeiffer,¹ Kristina B Metzger,¹ Meghan E Carey,^{1,3} Lawrence J Cook⁴

Innovative Feature: Longitudinal Perspective

Comprehensive Policy Evaluation: NJ's 2010 GDL Decal Provision

Goal: Evaluate effect of decal provision on intermediate drivers

Licensing

Crashes

Citations

Enforcement of GDL night and passenger provisions

Compliance with GDL night and passenger provisions

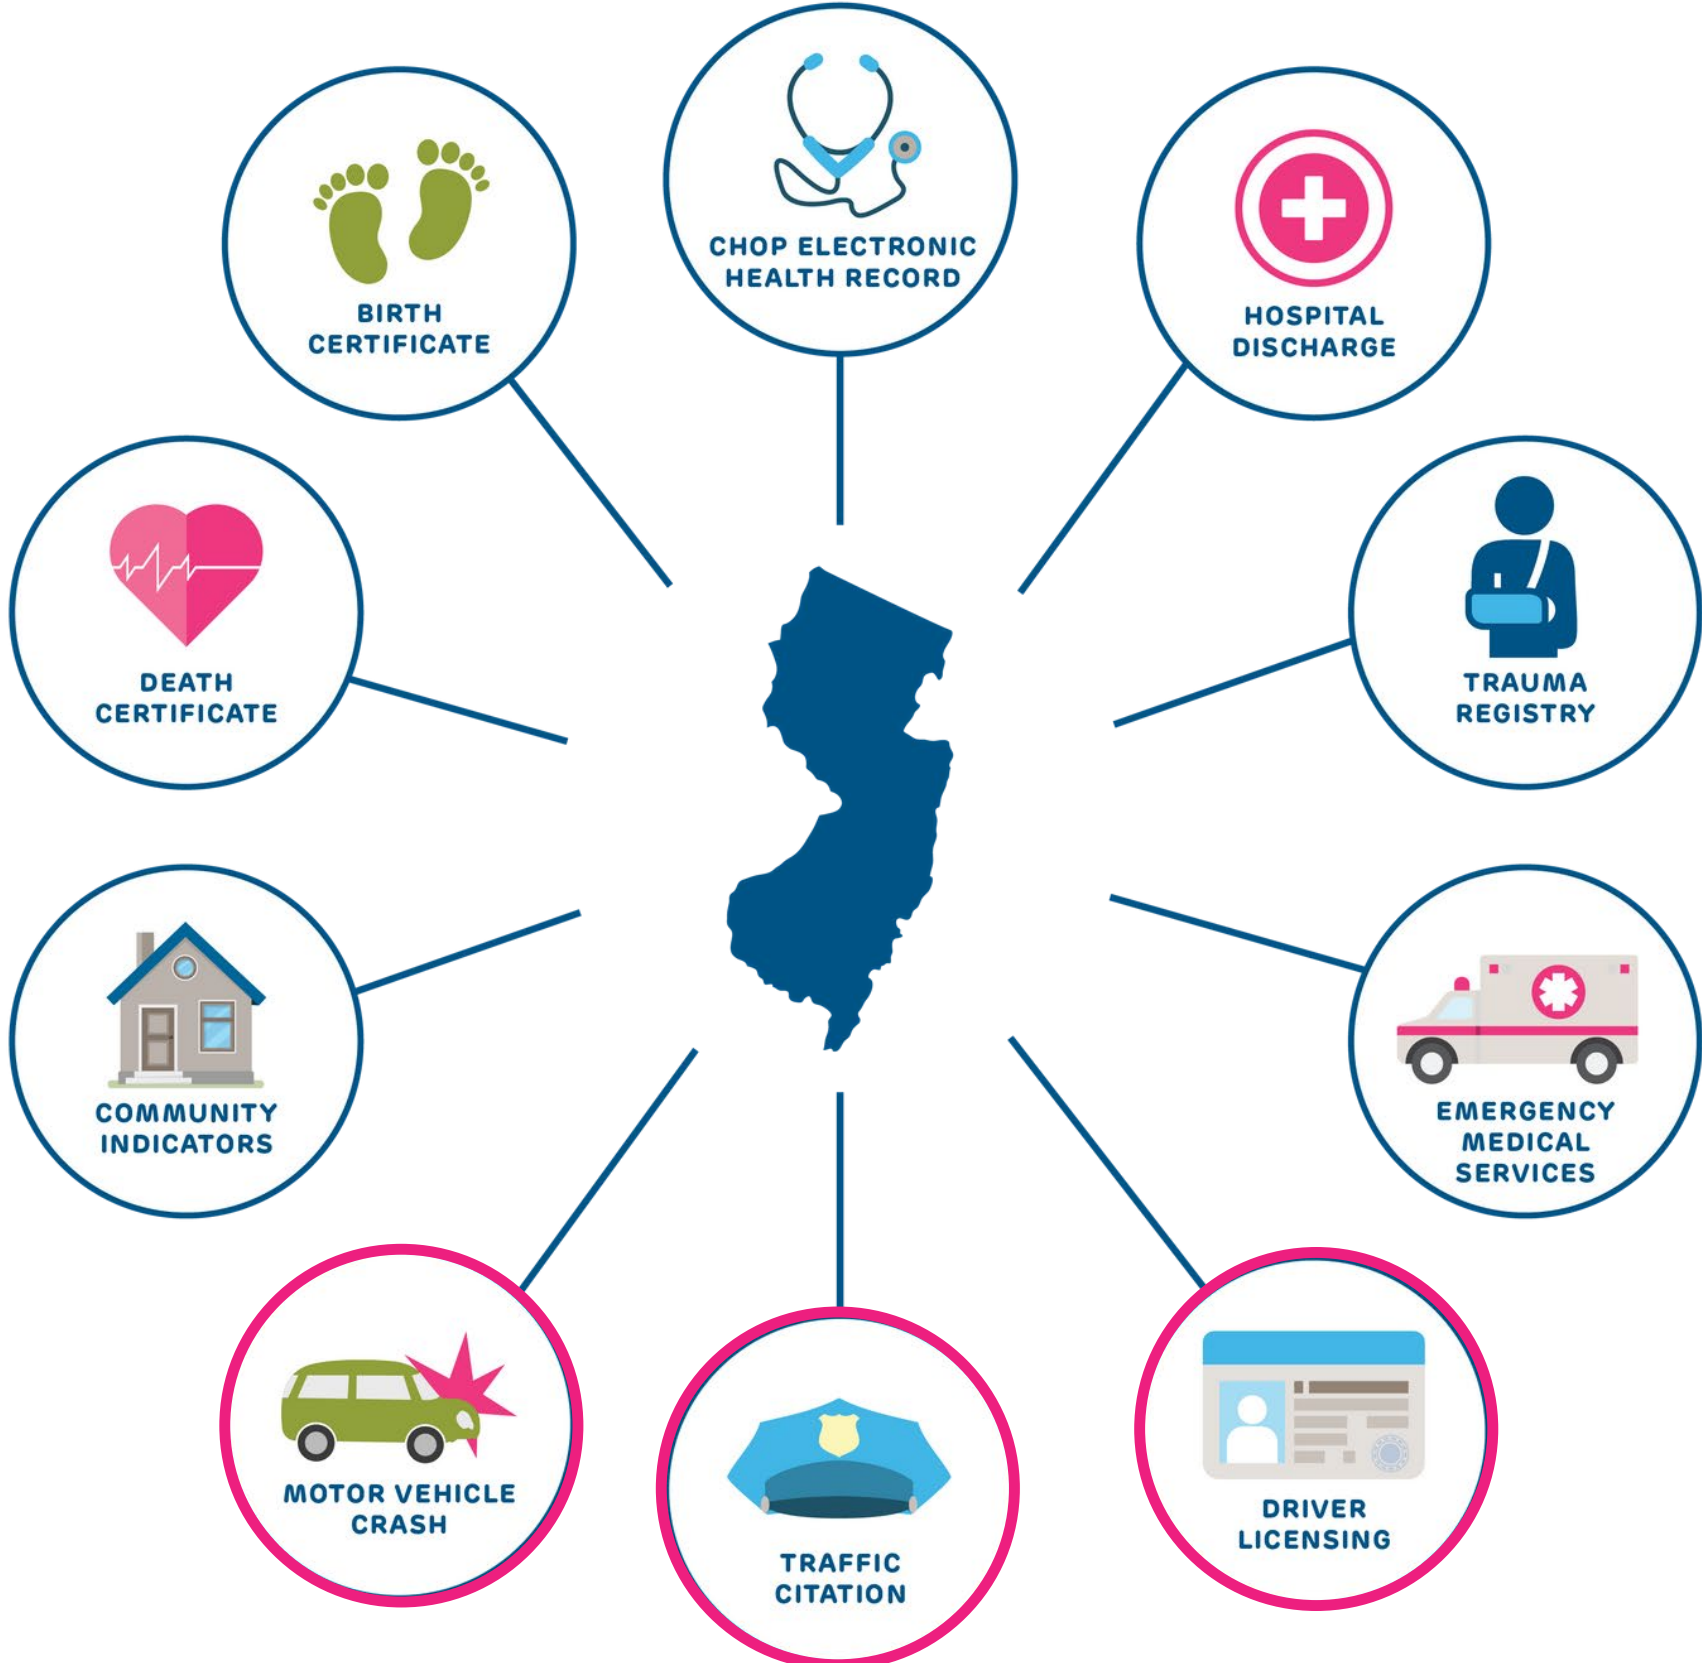

Required us to:

Identify intermediate drivers

Account for changes in underlying licensing rates

Comprehensive Policy Evaluation: NJ's 2010 GDL Decal Provision

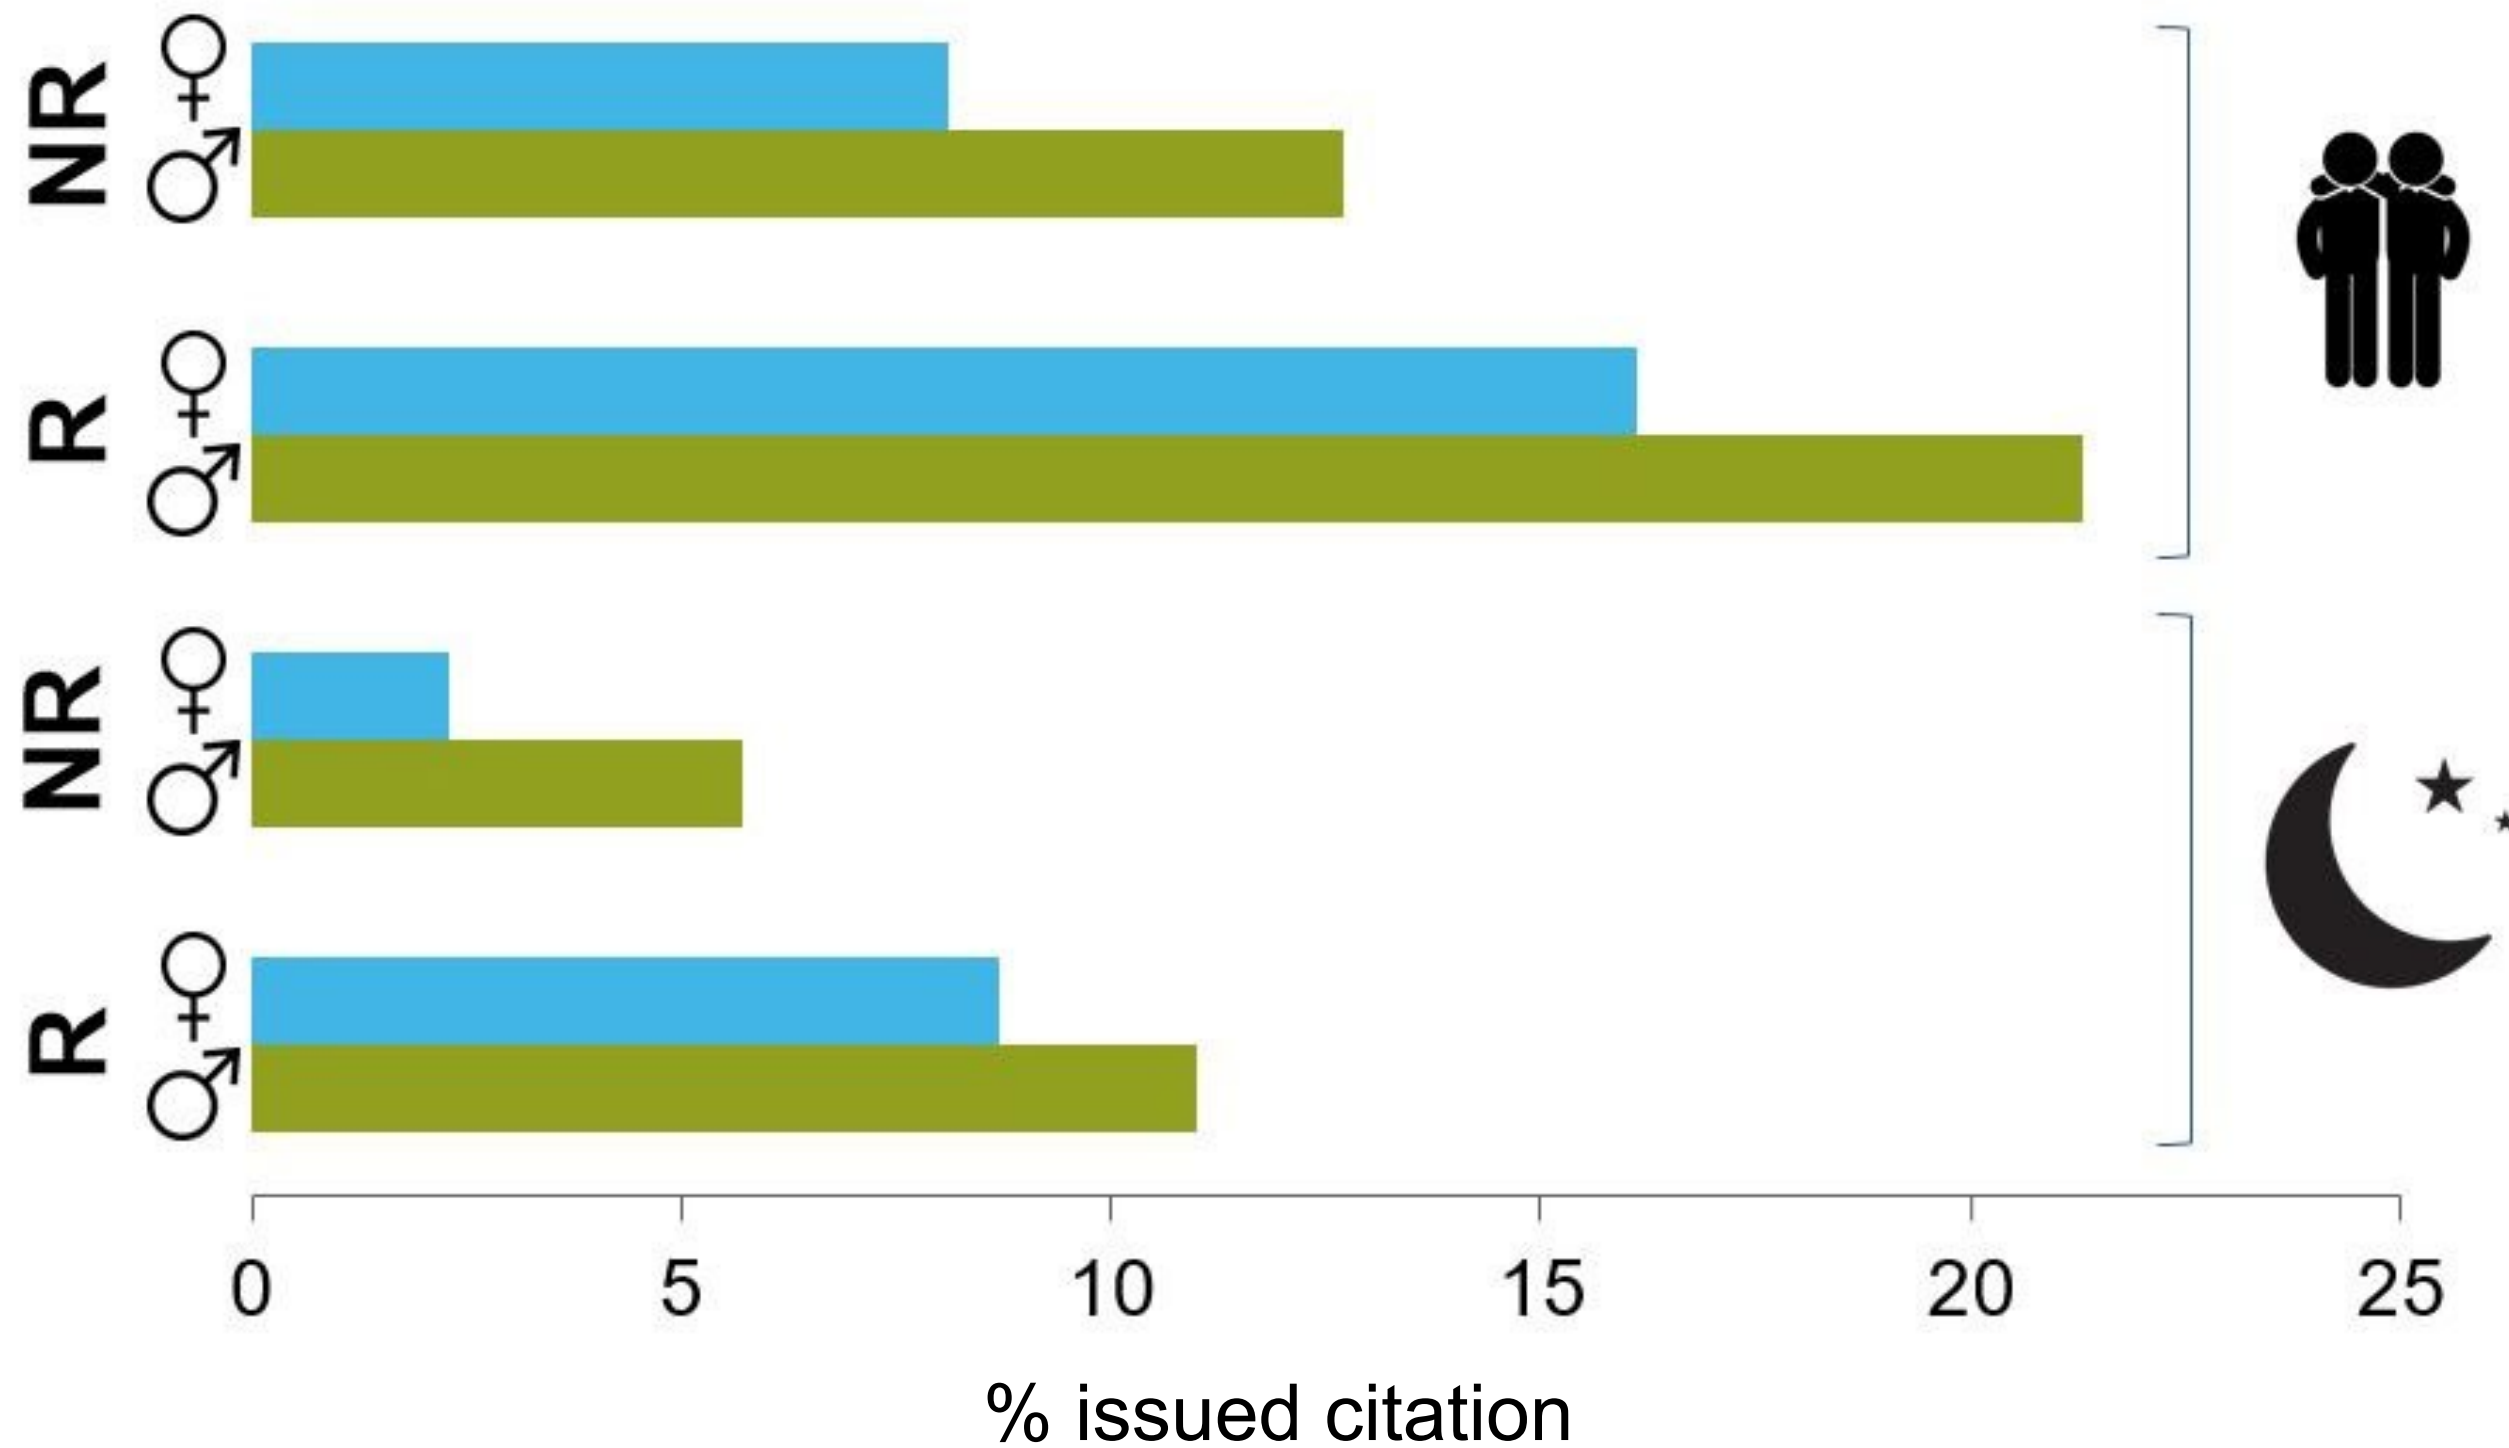

Number of Intermediate Drivers Decreased Post-Decal

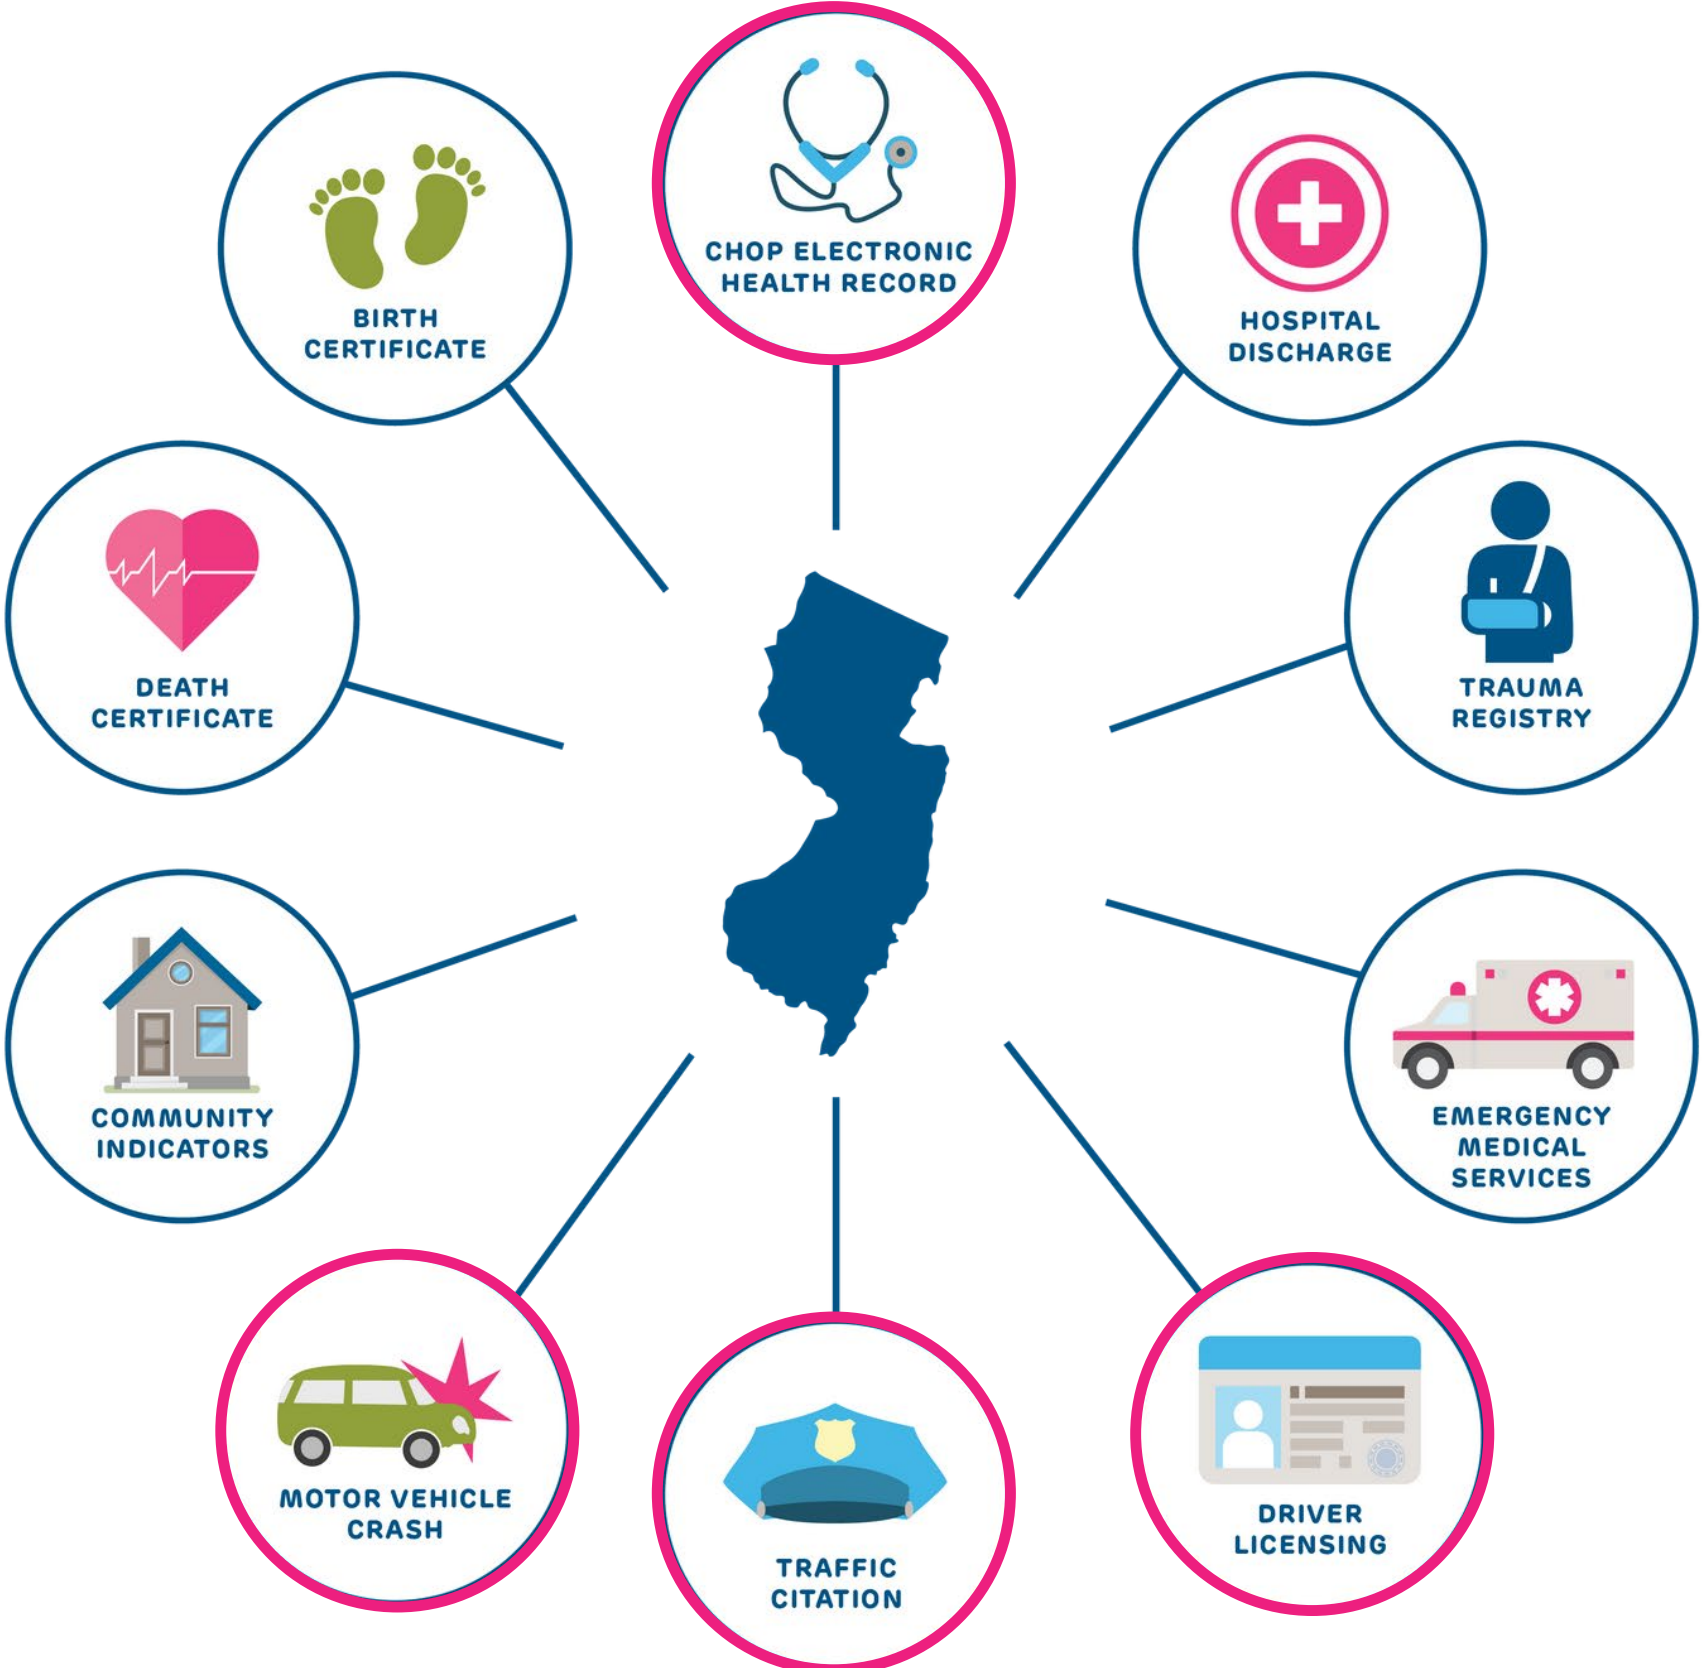

Proportion of Trips in which Intermediate Driver was Not Complying with GDL Restrictions Did Not Change

Enforcement of Non-Complying Crash-Involved Intermediate Drivers was Low and Differed Among Groups

Crash Risk Among Young Drivers with ADHD: Retrospective Cohort Study

Born 1987-1997;
NJ resident;
Primary care patient
(n=18,595)

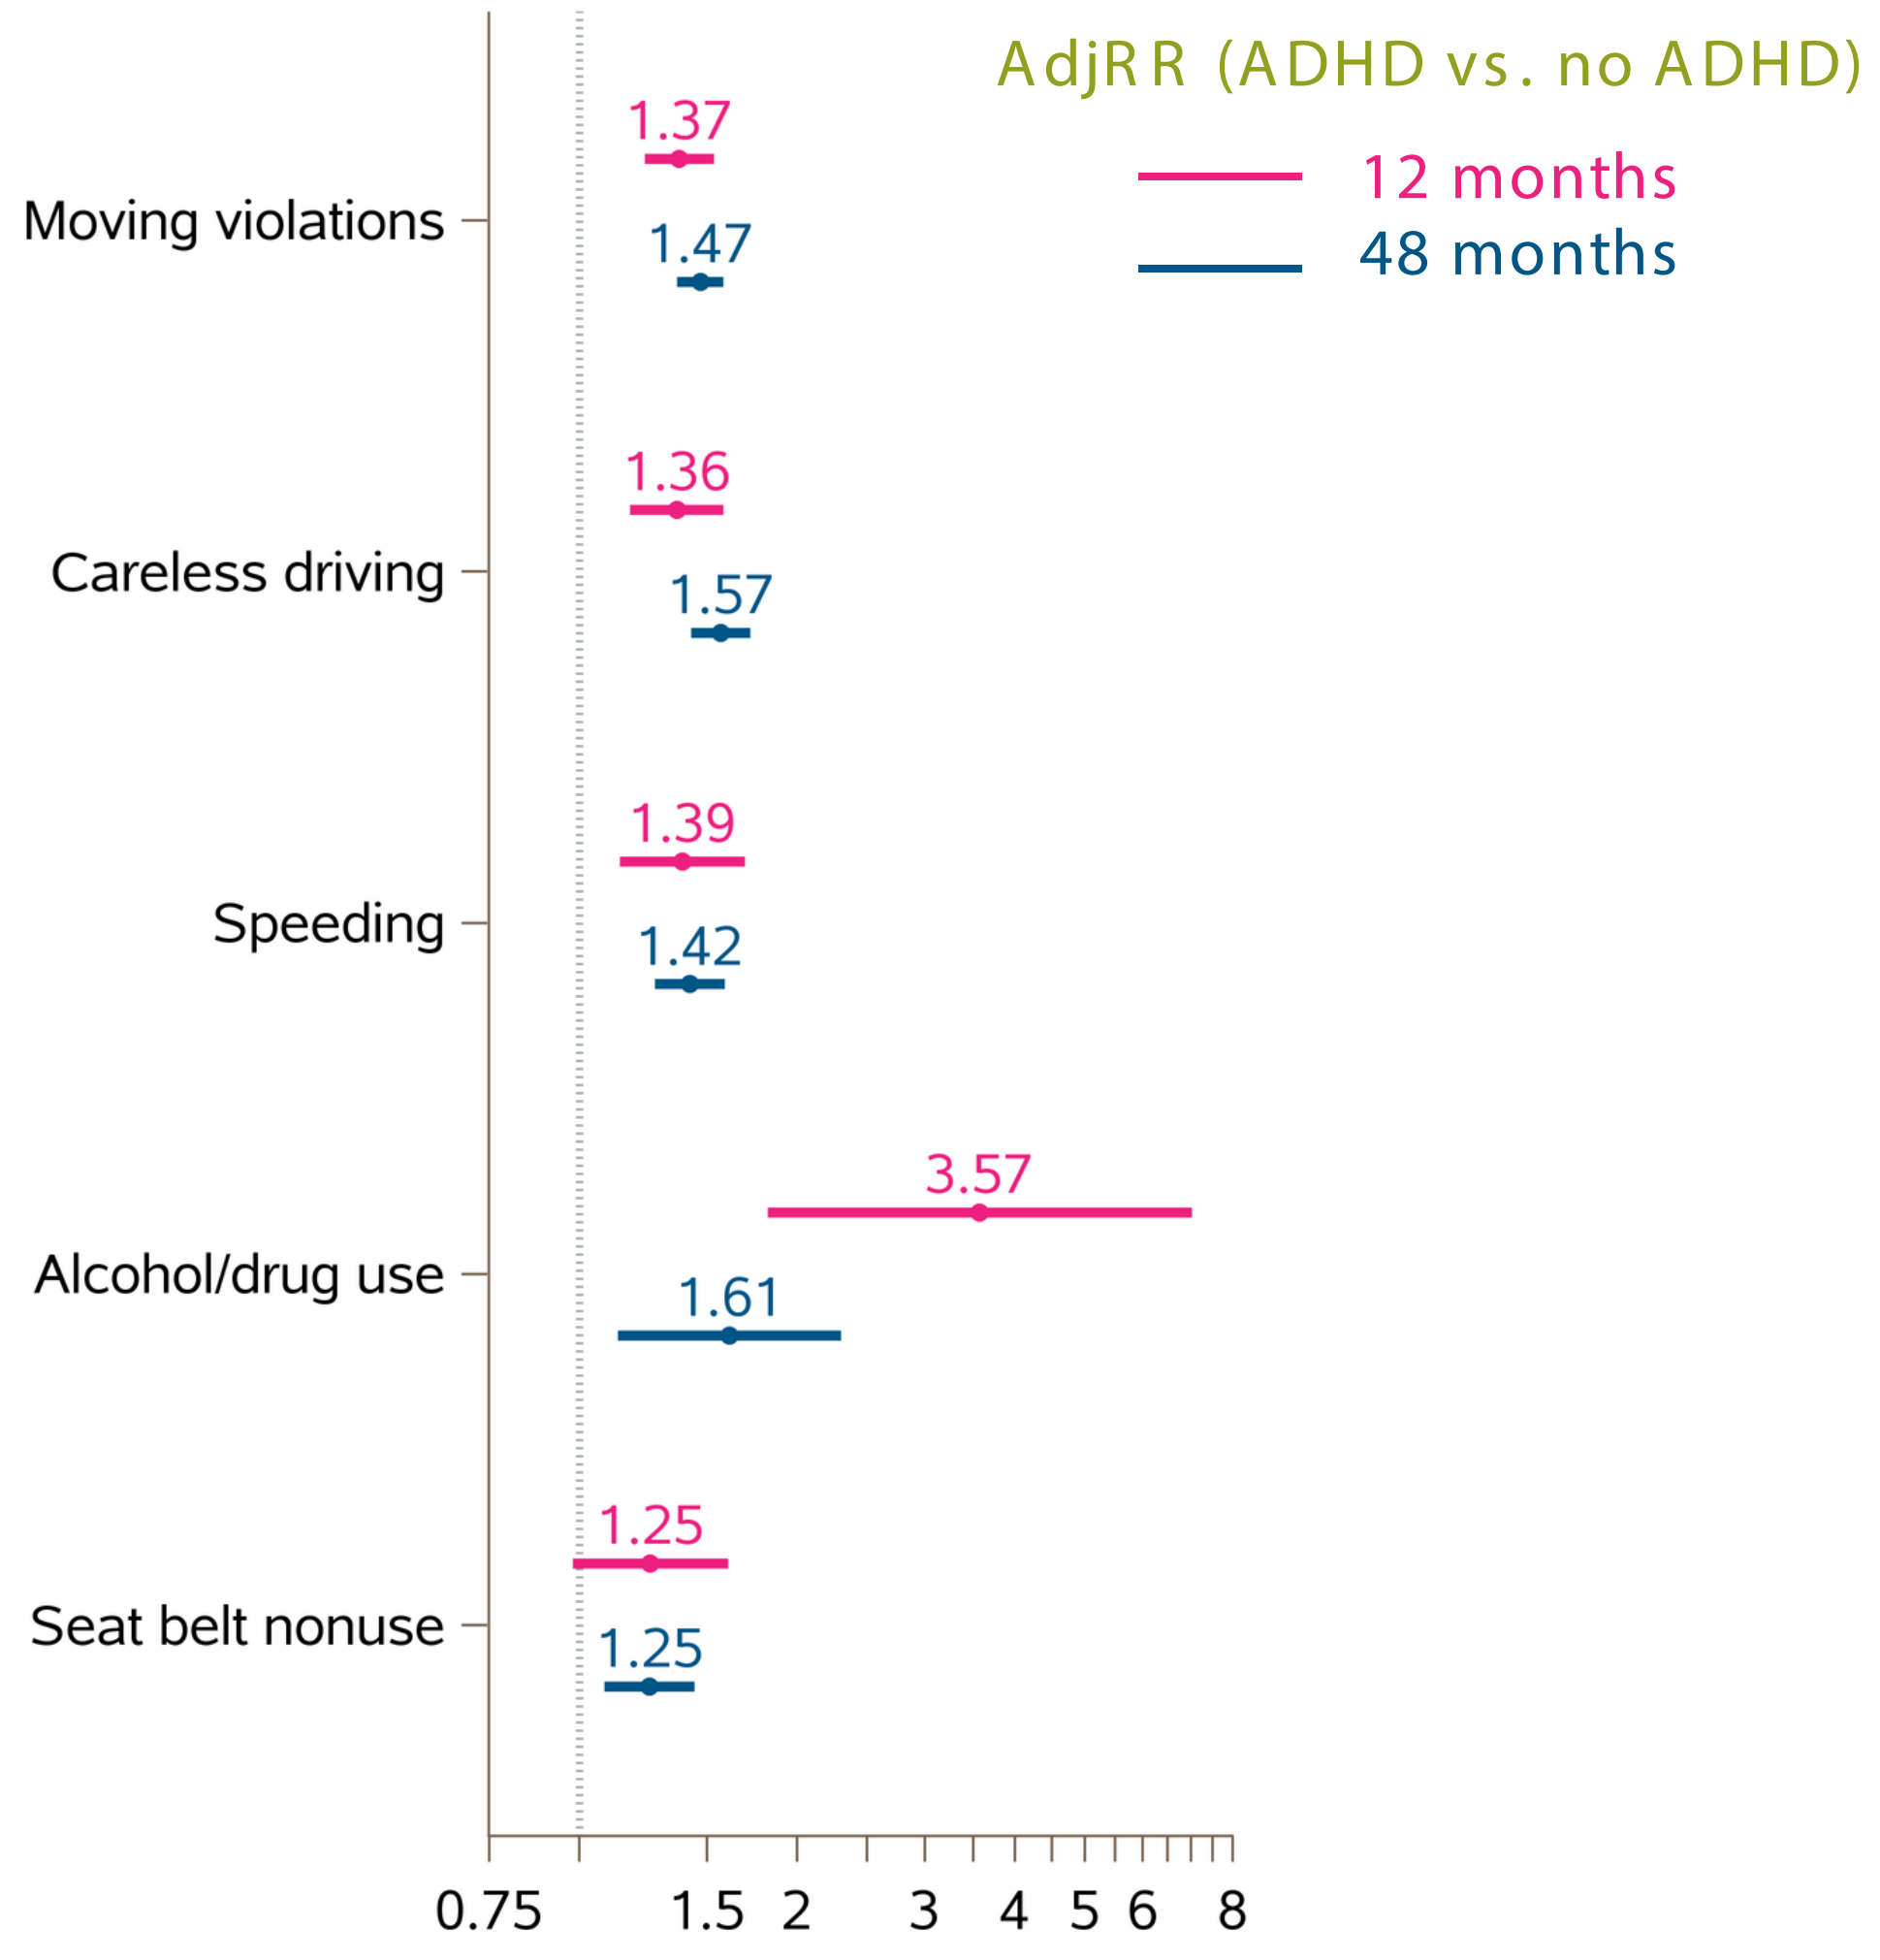

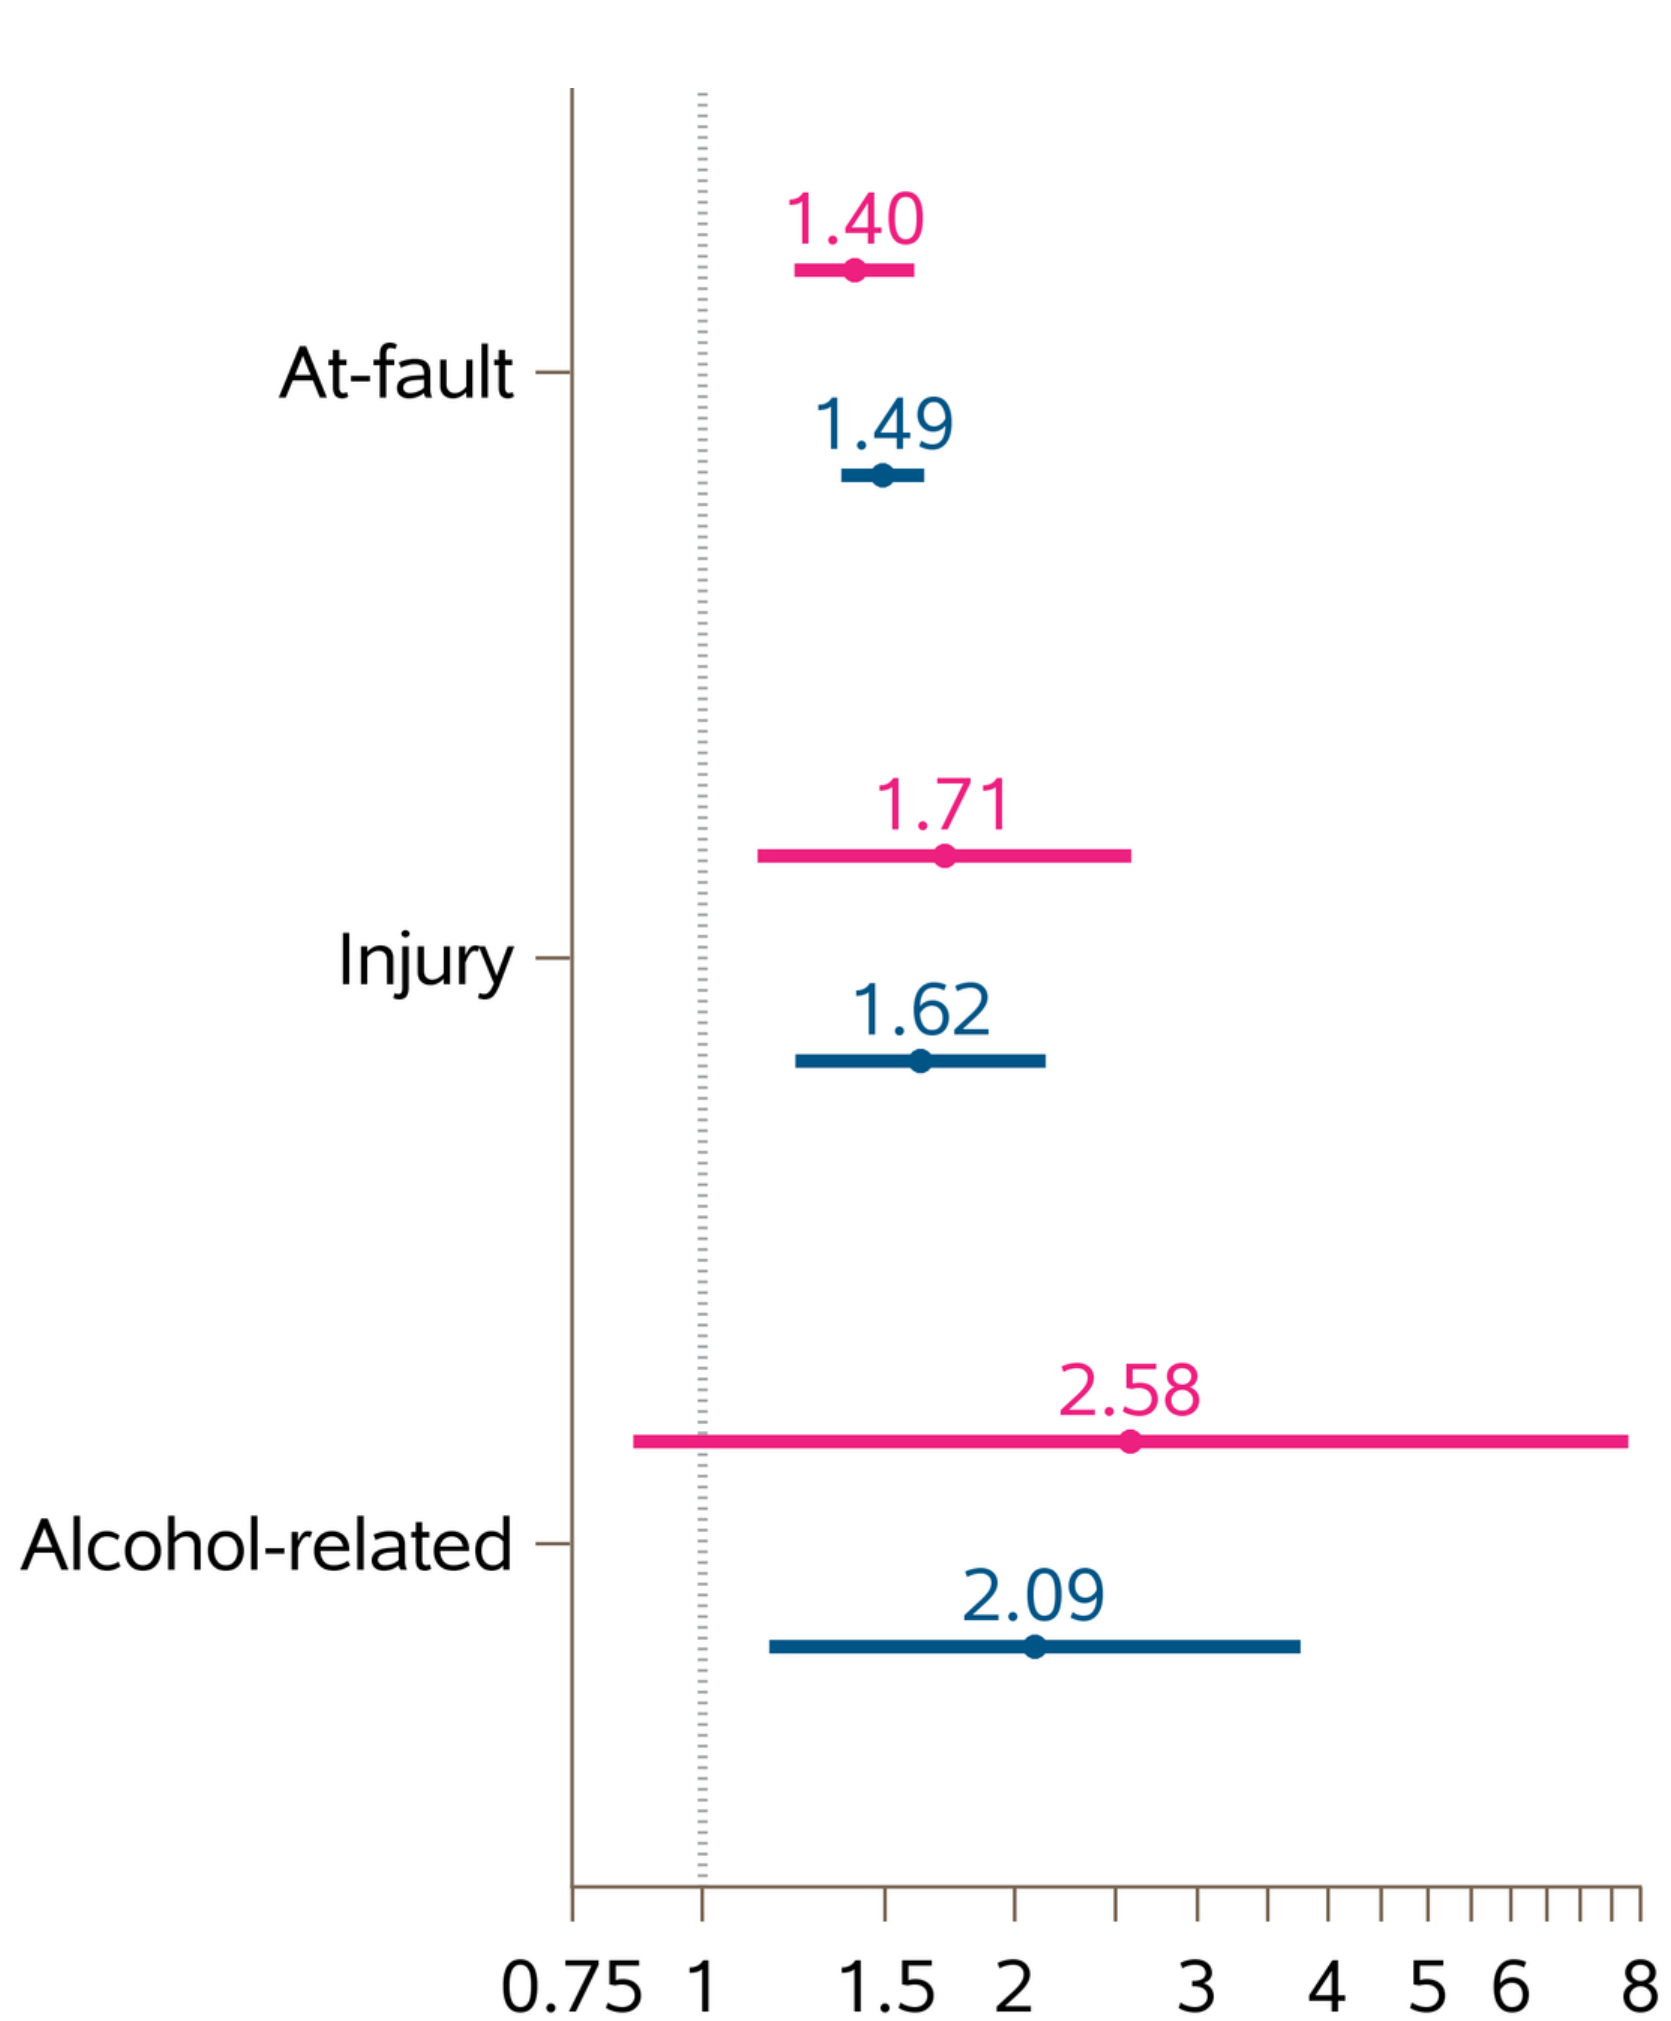

Without intellectual
disability
(n=18,344)

ADHD
n = 2,479

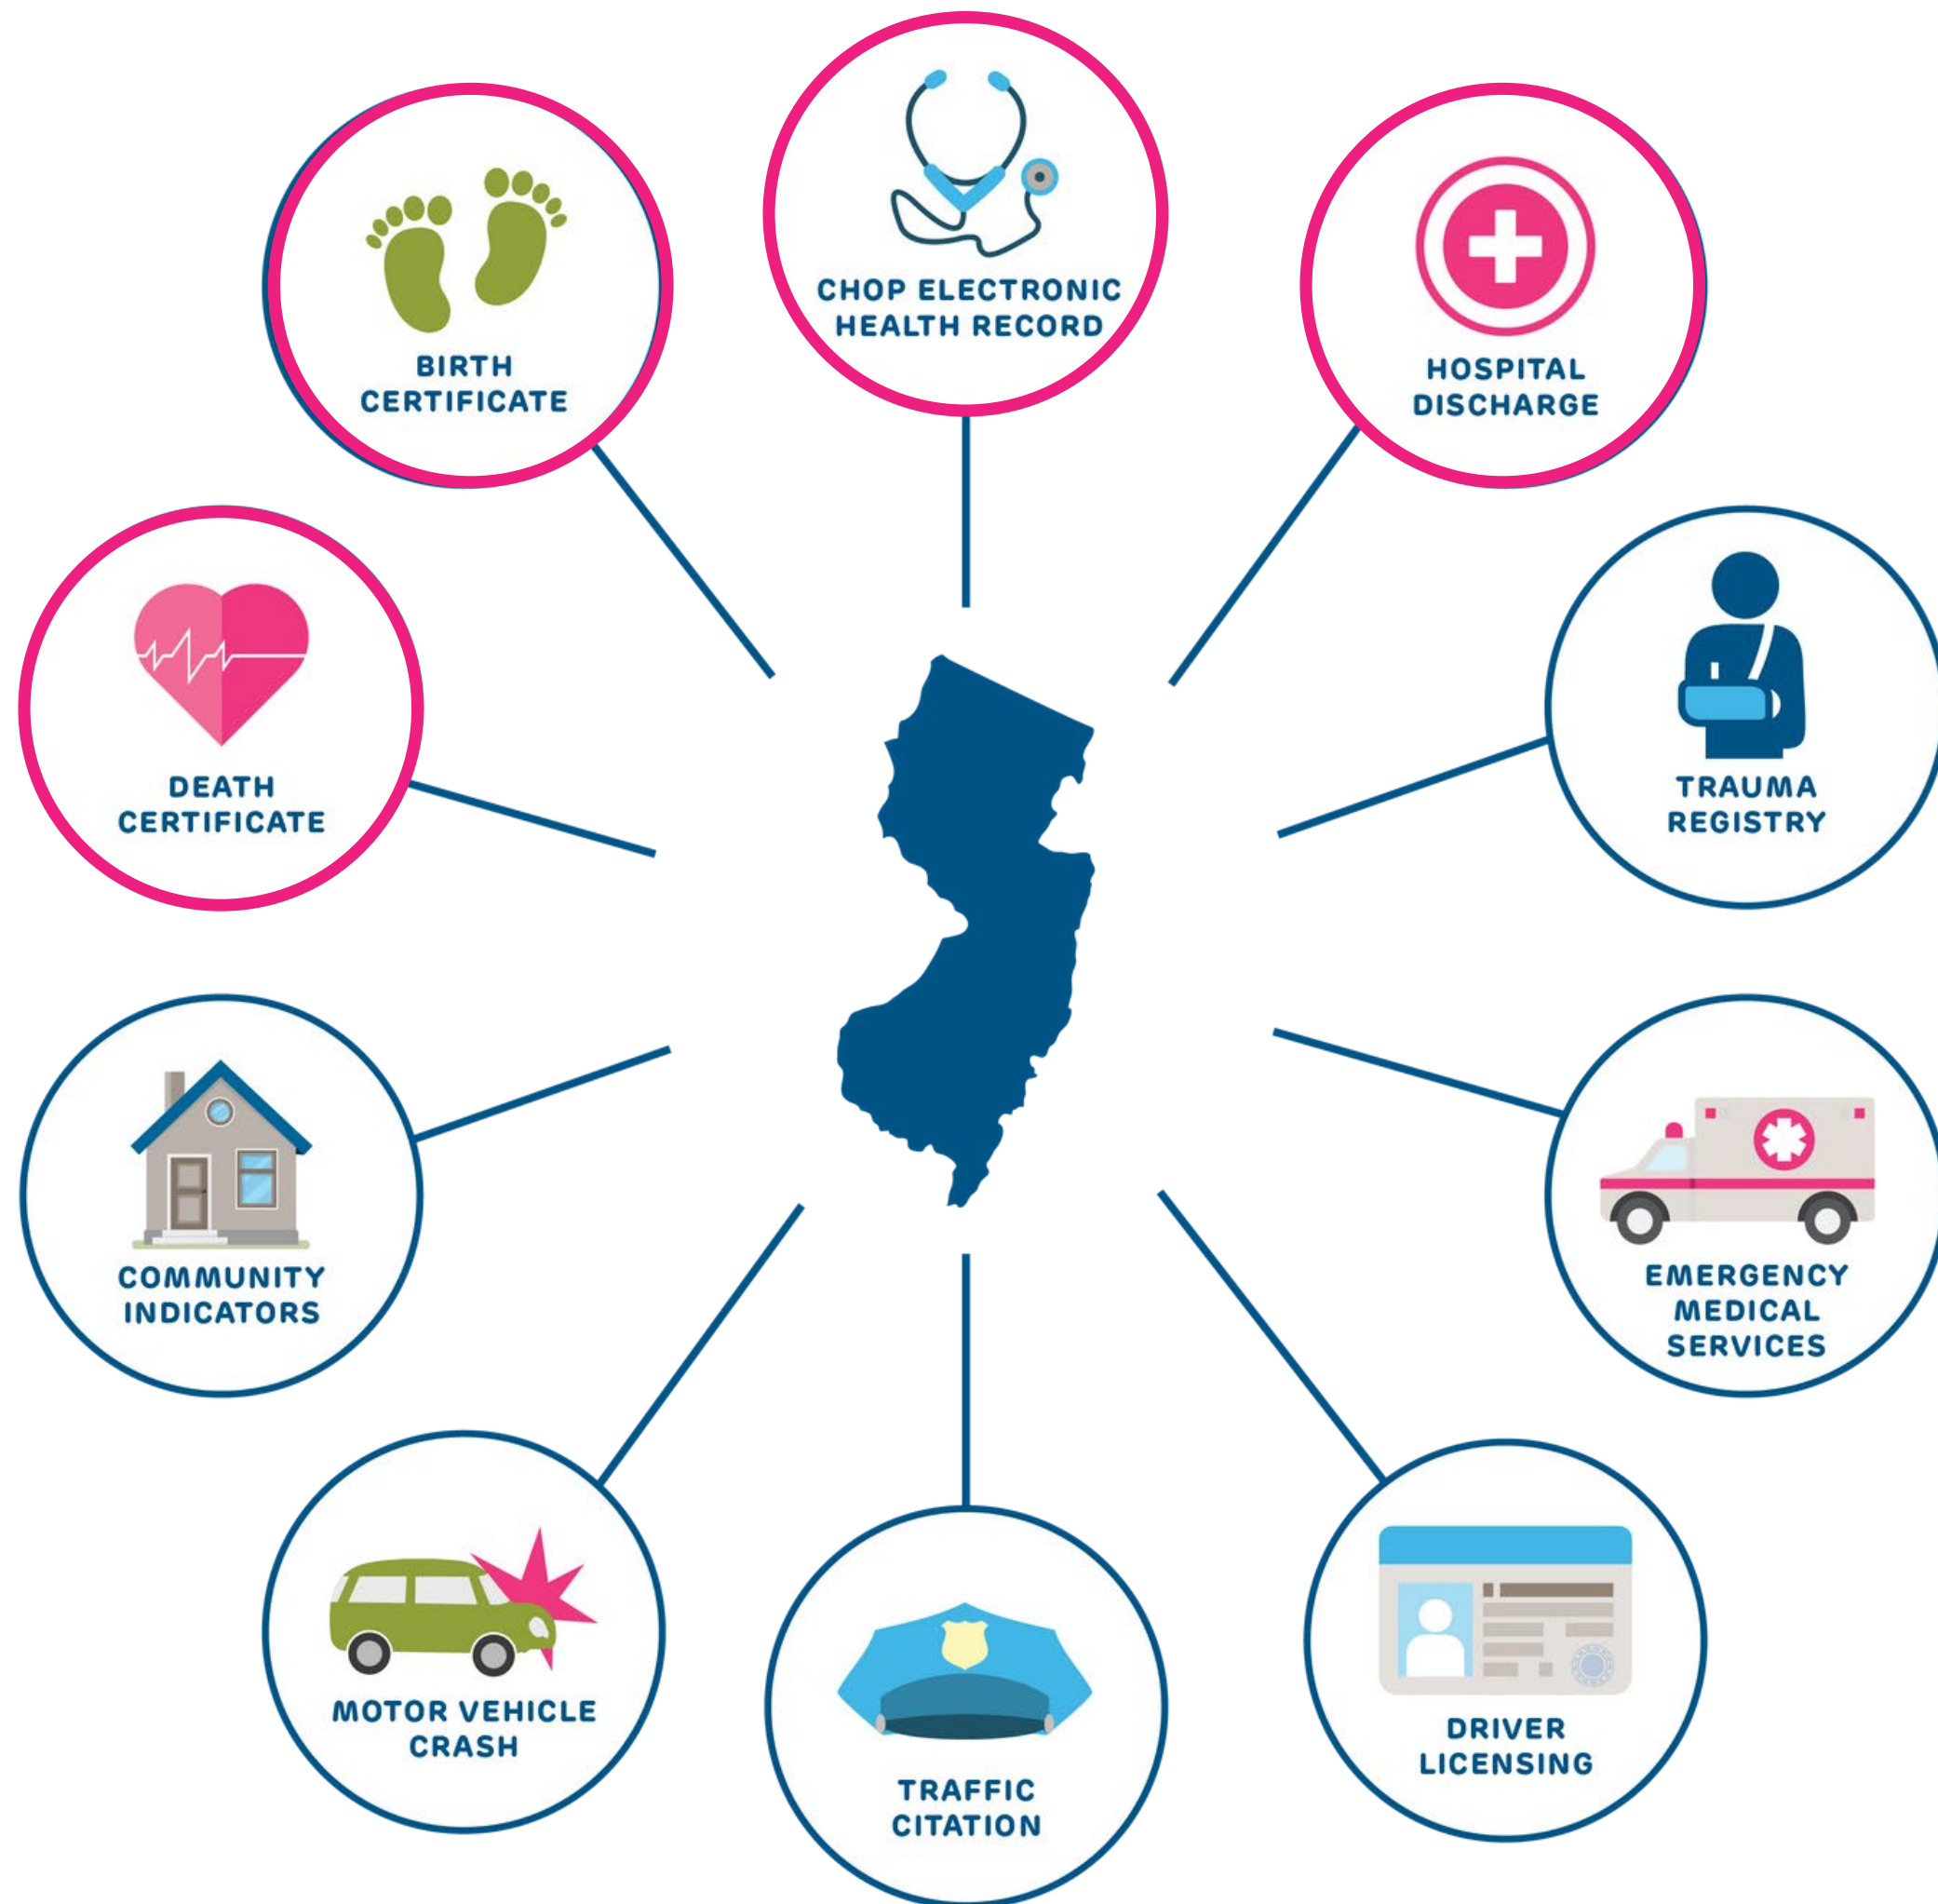

No ADHD
n = 15,865

Innovative Feature:

Incorporation of Individual and Community-level Equity Data

Race/ethnicity data: not collected in
NJ crash or licensing data

Classifying Race and Ethnicity Among NJ Drivers

Licensed Drivers in
2017, Ages 17-99
6,369,101

Reported R/E
77.3%

Bayesian Improved Surname Geocoding

Uses Census Data to Assign Each Individual 6 Probabilities

White

Hispanic

Black

Asian/Pacific
Islander

Multiracial

American
Indian/Alaskan
Native

$$P(\text{White}) + P(\text{Hisp}) + P(\text{Black}) + P(\text{API}) + P(\text{Multi}) + P(\text{AIAN}) = 1$$

Classifying R/E Among NJ Drivers

Race/ethnicity data: not collected in
NJ crash or licensing data

Geocoded residential addresses & crash location

Two Ways to Characterize Communities of Interest

Where do crashes occur?

Urban planning lens

Who do crashes occur to?

Where do crash-affected individuals live?

Where to devote educational efforts?

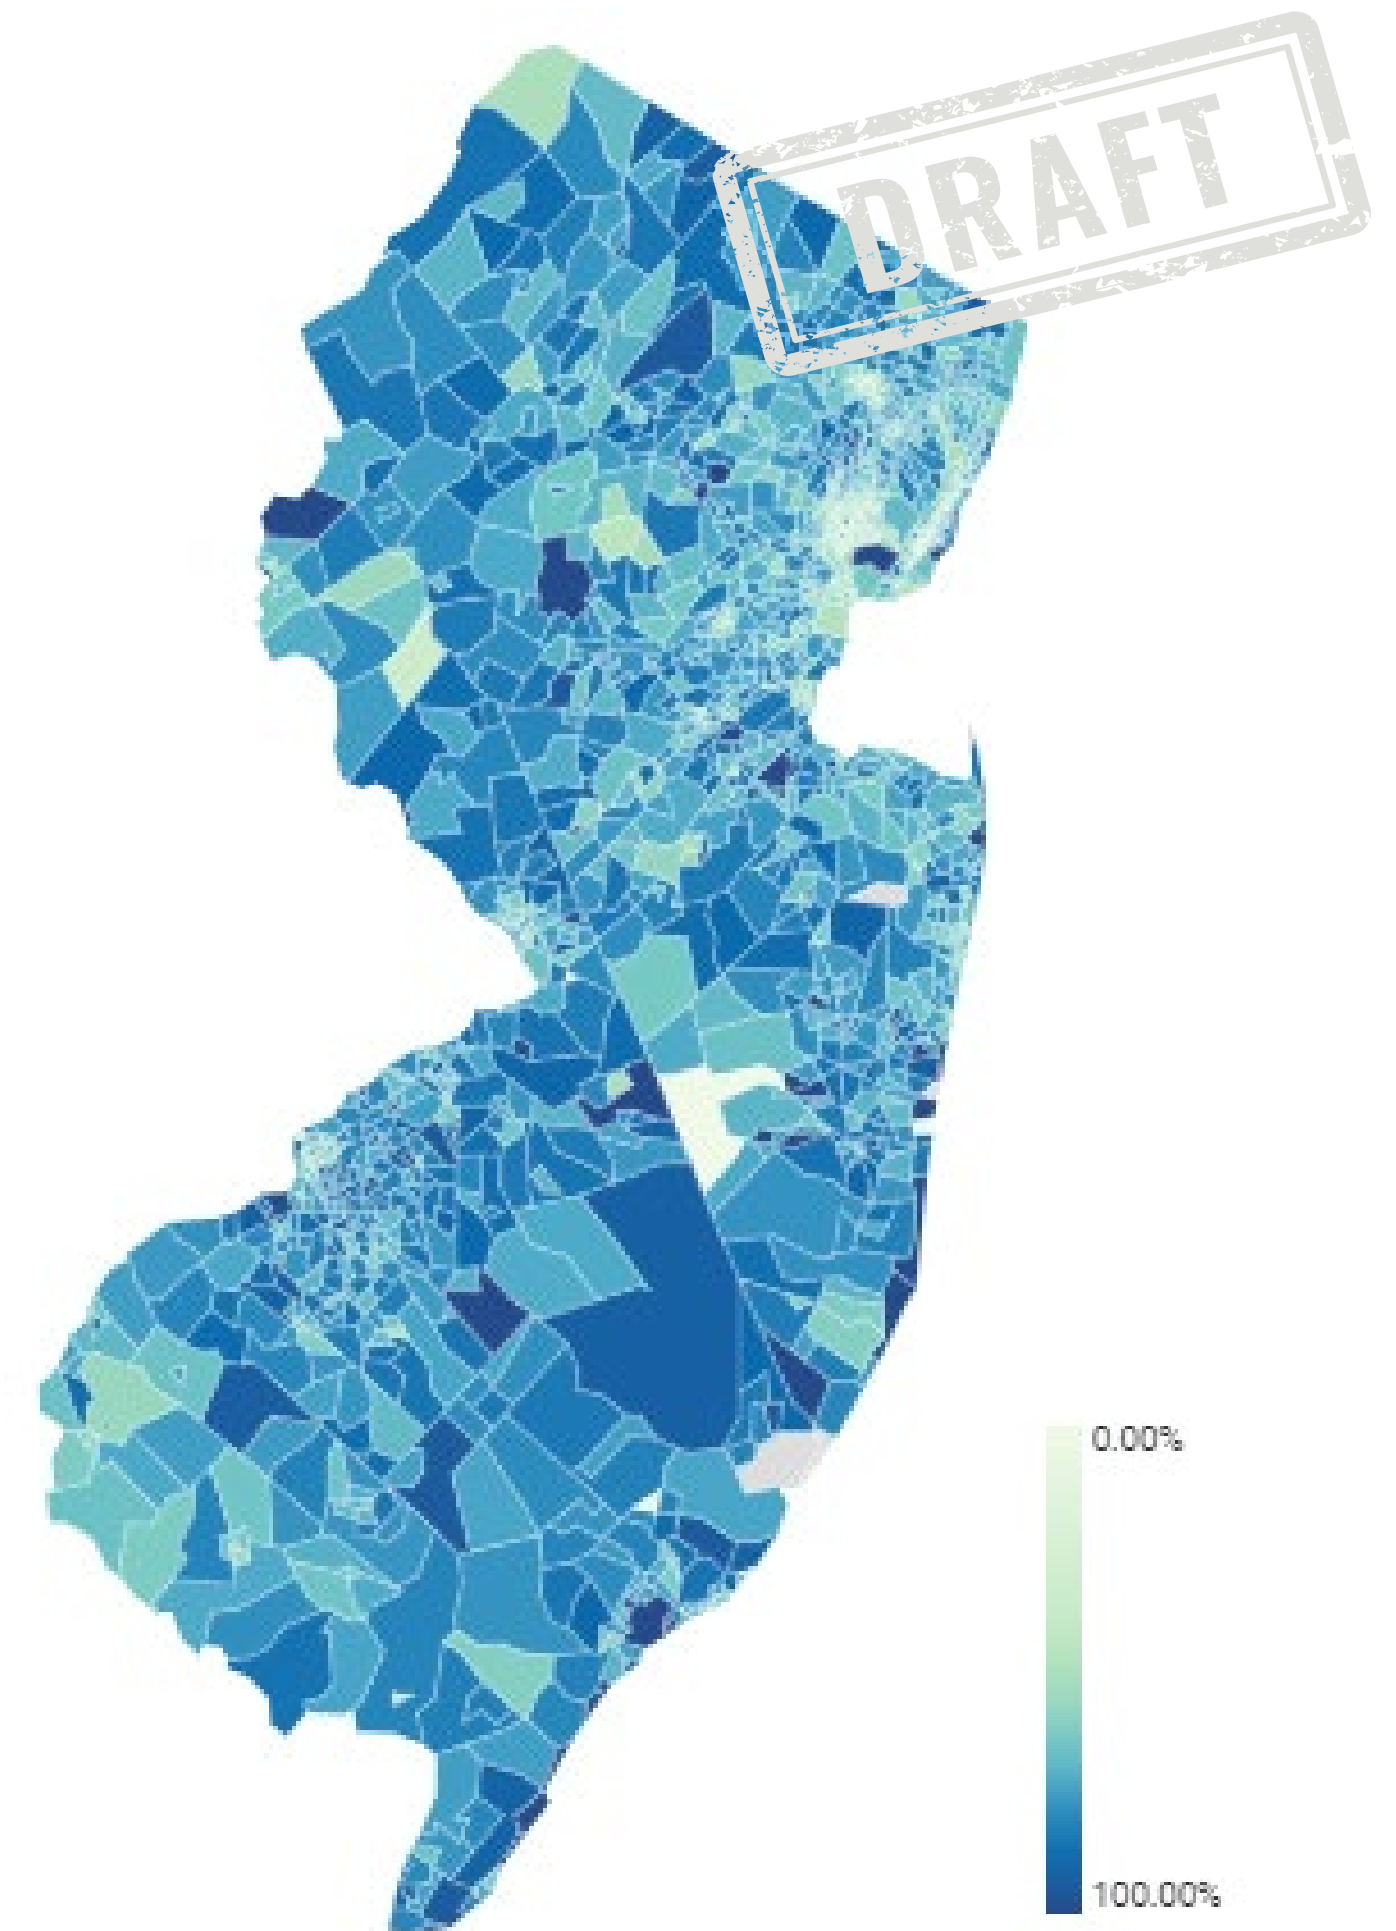

Public health lens

Rates of Drivers in Alcohol-Involved Crashes (per 10,000 Licensed Drivers Living in Essex County)

In 2014-2017, a total of **58,781** NJ drivers with children < age 8 were involved in a crash.

Overall, **72%** of drivers had all child occupants restrained in CRS

Disparities Beyond Crashes....

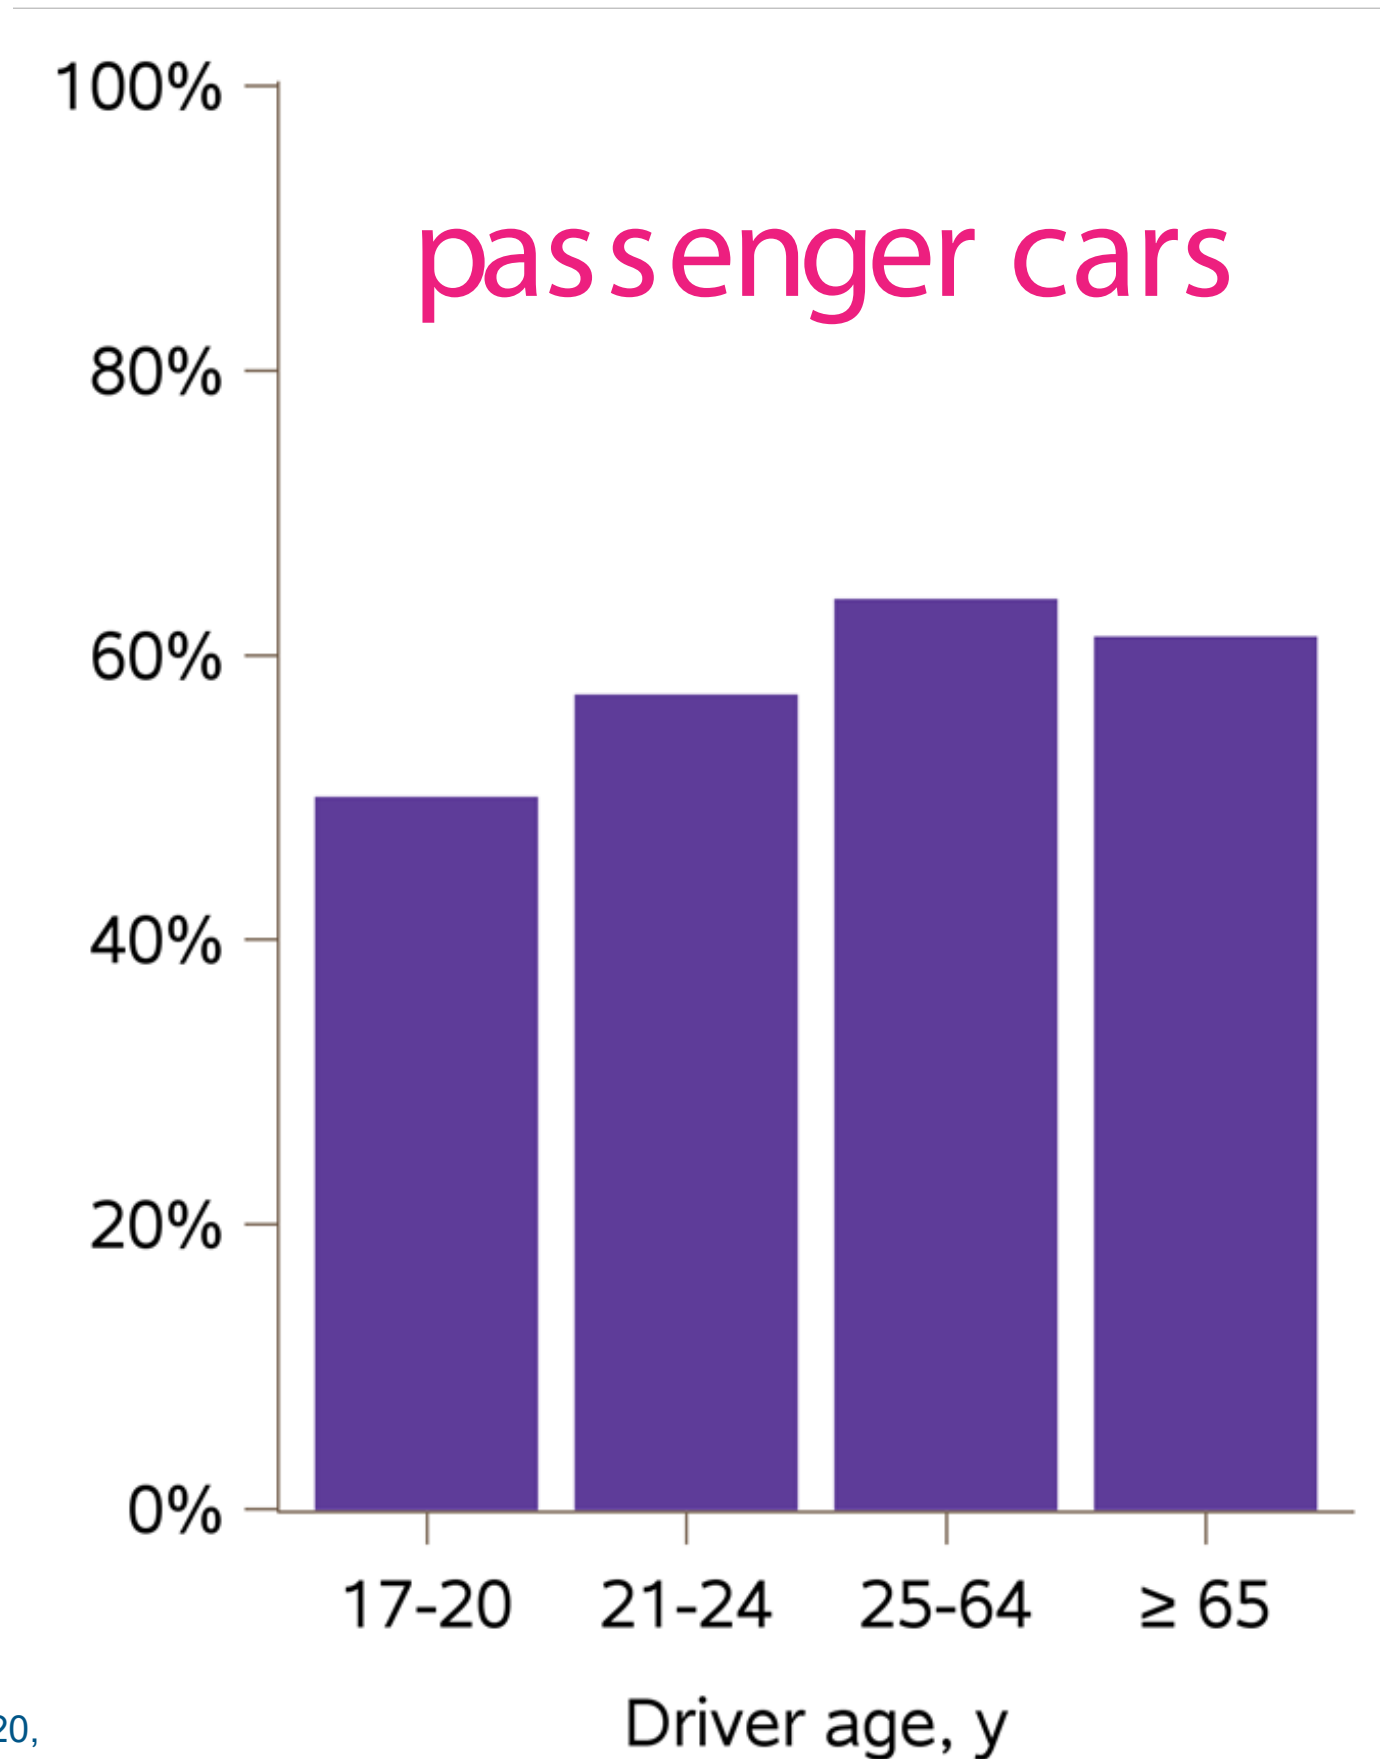

Percent of Unbelted Trips Among NJ Drivers

Innovative Features: Detailed Vehicle and Injury Data

Vehicle Identification Number: Make/model, vehicle age,
presence of adaptive driver assistance systems

Vehicles of Younger Drivers were Less Likely to Have Side Air Bags

Vehicle Identification Number: Make/model, vehicle age,
presence of adaptive driver assistance systems

Crash Injury Severity: Mapped ICD-9/10 diagnostic codes
to injury severity (AIS, ISS) codes

Location of AIS 2+ Injuries Among Hospitalized Child Passengers

Future Research & Collaborations

Vulnerable road users

Spatial distribution of crashes

Link between crash characteristics & injury

Post-crash care (EMS data, triage to trauma centers)

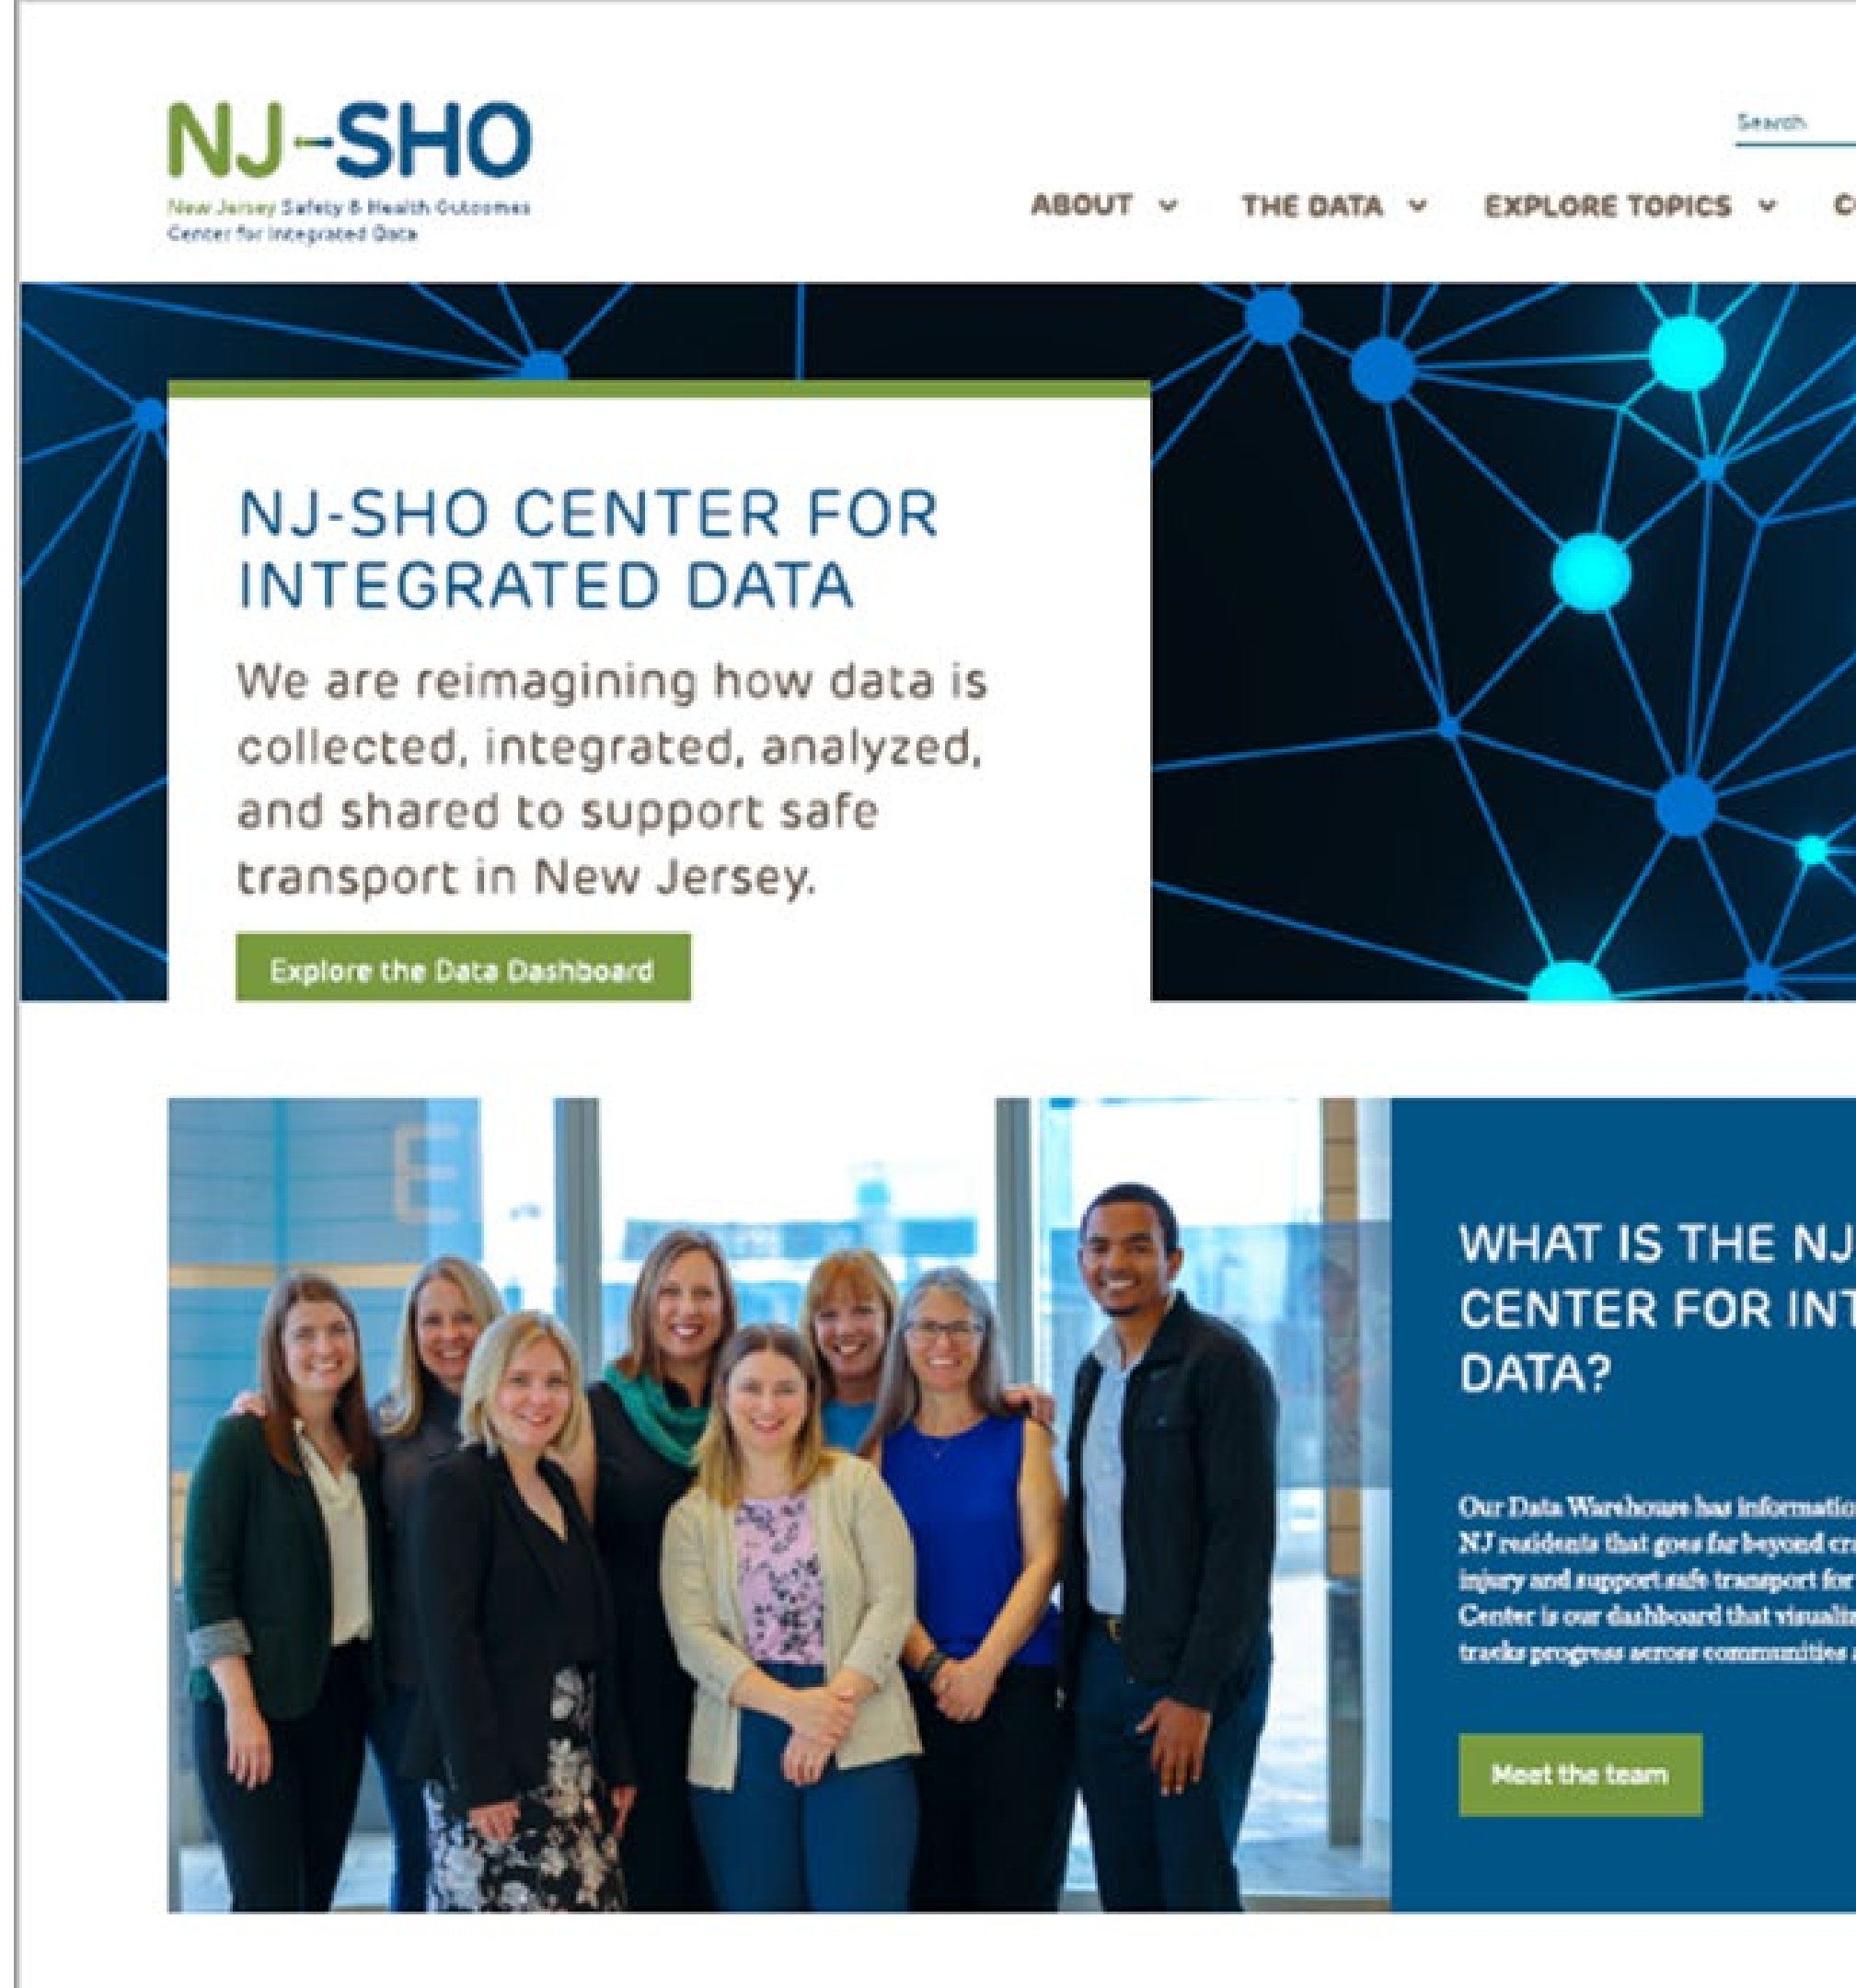

Integrated traffic safety data is critical...

but out of reach of injury professionals

Coming in Summer 2024
