Not every Mayor is represented, and not all records from every Mayor are represented. The records of the earliest Mayors in this group are spotty, while the strength of this collection is with the papers of the later Mayors. These records are materials created in the service of the daily business of the Mayor's Office including: correspondence, reports, drafts, ephemera, and other materials. Other material includes official documentation of the City of New York that required the Mayor's approval, including: warrants, affidavits, applications for licenses, licenses issued, oaths of office, and petitions, among other material. The series entitled Unknown contains material produced by the Mayor's Office but is unable to be attributed to any specific Mayor. An archivist devised the folder titles from the materials contained within. Correspondence folders in particular contain materials that deal with a variety of different subjects.

Mayors, for which the Municipal Archives hold records, who served for multiple non-consecutive terms will have more than one series.

Within these series, a staff archivist arranged materials by subject or department and then chronologically within those groupings. Researchers can assume that very little of the material retains any original arrangement. Materials within folders were arranged by a staff archivist in chronological order, except where doing so would interfere with any remnant of the original order of the material. Within most series, the folders are arranged alphabetically by subject and then chronologically within those subjects.:
