

# Riverside Dr and W95th St

## Pedestrian Safety Improvement and Traffic Calming

### Background

- Department of Parks and Recreation received funds from Council Member Rosenthal to rebuild the sidewalk on the west curb of Riverside Dr between 91st St and 95th St
- DPR reported community complaints about high speed turns and aggressive driving at 95th St. DOT suggested neckdown as part of project

### Location

- Park and residential land uses nearby, intersection is park entrance
- Lies within a school safety zone study area for PS 75 Emily Dickinson
- Highway offramp produces high volumes of vehicles

Before: Riverside Dr at W 95th St

### Improvements

- Parks will install new curb and hex-paver neckdown at SW corner of W95th St and Riverside Dr
- Realign markings to match corridor profile
- Relocate signal pole

### Benefits

- Reduces speeding / calms traffic
- Safer, shorter pedestrian crossing
- Increases pedestrian visibility
