² Counts of CHS-administered vaccine doses were added to the “CHS COVID-19 Data Snapshot” on April 5th, 2021. This snapshot is posted on the [CHS homepage](#) Monday through Friday.

³ CHS previously reported the total number of patients ever in custody who received the first vaccination dose by CHS and the total number of patients ever in custody who completed vaccination by CHS. Going forward, CHS will only report the total number of patients ever in custody who received at least one vaccination dose by CHS because patients in custody are increasingly receiving one dose of a two-dose regimen from a source external to CHS.

⁴ This rate was added to the “CHS COVID-19 Data Snapshot” on April 20th, 2021. This snapshot is posted on the [CHS homepage](#) Monday through Friday.

⁵ This rate was added to the “CHS COVID-19 Data Snapshot” on April 28th, 2021. This snapshot is posted on the [CHS homepage](#) Monday through Friday.

¹ The figure above reflects the number of confirmed COVID-19 patients who were incarcerated as of each date (excluding people in Bedford Hills Correctional Facility). These numbers include confirmed patients who have recovered from COVID-19. The total number of people in custody with confirmed active infections can be found in CHS's COVID-19 Data Snapshots, which are posted on the [CHS homepage](#).

II. CHS and DOC Updates to BOC: Staff with Confirmed COVID-19 (cumulative)¹

¹ CHS and DOC report the cumulative total staff members who have tested positive for COVID-19 in their daily updates to the Board. CHS does not report the cumulative total number of incarcerated people who have tested positive for COVID-19 in its daily updates to the Board but does report this metric in weekly Local Law 59 reports published on the [CHS website](#). It would be inappropriate to compare cumulative staff totals to the number of currently incarcerated patients with COVID-19- reported in slide 15.

IV. Housing Area Capacity

February 26 – March 4, 2022

IV. Housing Area Capacity

Number and Percent of Open Cell and Dorm Units Above and Below 50% Capacity
March 3, 2022

NOTES:

- 1) **Designed capacity reflects the maximum number of beds each housing area was designed to accommodate. DOC believes this metric serves as the best available proxy for housing area size. Accordingly, the capacity figures presented above are calculated by dividing housing area census by housing area designed capacity.**
- 2) Dorm count includes modular dorm units in AMKC, RMSC, and RNDC.
- 3) This analysis excludes Contagious Disease Units (CDUs) (where people in custody share no communal space), intake areas (where the census changes throughout the day), hospital prison wards, and housing areas in Bedford Hills Correctional Facility.

IV. Housing Area Capacity

Number and Percent of Open Units Above and Below 50% Capacity by Housing Category
March 3, 2022

NOTES:

- 1) **Designed capacity reflects the maximum number of beds each housing area was designed to accommodate. DOC believes this metric serves as the best available proxy for housing area size. Accordingly, the capacity figures presented above are calculated by dividing housing area census by housing area designed capacity.**
- 2) General Population units have fewer staffing needs than more specialized housing units such as PACE or MO units and present an opportunity to lower housing density to facilitate social distancing.
- 3) This analysis excludes Contagious Disease Units (CDUs) (where people in custody share no communal space), intake areas (where the census changes throughout the day), hospital prison wards, and housing areas in Bedford Hills Correctional Facility.

¹ The values above exclude counts of Contagious Disease Units (CDUs) (where people in custody share no communal space), intake areas (where the census changes throughout the day), hospital prison wards, and Bedford Hills Correctional Facility housing areas.

² Designed capacity reflects the maximum number of beds each housing area was designed to accommodate. DOC believes this metric serves as the best available proxy for housing area size. Accordingly, the capacity figures presented above are calculated by dividing housing area census by housing area designed capacity.

³ DOC uses three COVID-19-related housing designations: (1) one for likely exposed but asymptomatic individuals, (2) one for exposed and symptomatic individuals, and (3) one for confirmed COVID-19 patients. **Individuals housed in confirmed and symptomatic housing may include people who have refused testing, and those who are housed in the Communicable Disease Units (CDU) for non-COVID reasons. People housed in CDUs share no communal space. The total number of people in custody with confirmed active infections can be found in CHS's COVID-19 Data Snapshots, which are posted on the [CHS homepage](#).**

⁴ The weekly total represents the total number of unique housing areas that surpassed 50% capacity at any point in the report week. A housing area's COVID-designation may change throughout the week.
