NOTE: BOC analysis is based on the housing areas for confirmed COVID-19 patients, symptomatic patients, and likely exposed but asymptomatic units reported by DOC on 3/9/2022 at 4:30 pm, the DOC Inmates in Custody File on 3/10/2022, which is automated pull from the DOC Inmate Information System (IIS) at 11:00 am, and the Cross-Section file on 3/10/2022. **Individuals housed in confirmed and symptomatic units may include people who have refused testing, and those who are housed in the Communicable Disease Units (CDUs) for non-COVID reasons. People housed in CDUs share no communal space. The total number of people in custody with confirmed active infections can be found in CHS's COVID-19 Data Snapshots, which are posted on the [CHS homepage](#).**

¹ Data reported by CHS reflects data from the prior day.

² This metric includes hospitalized as well as recovered patients. Due to a technical issue, CHS did not report the total number of current patients ever confirmed positive for COVID-19 while in custody on March 11, 2022.

³ This metric is sourced from the "CHS COVID-19 Data Snapshot." As of August 21st, 2020, this snapshot has been posted on the [CHS homepage](#) Monday through Friday.

⁴ The number of COVID patient deaths reported by CHS does not include all patients who may have been diagnosed and treated while in custody and died post-release.

⁵ This metric reflects staff newly placed in quarantine/isolation and not the total number of CHS staff currently in quarantine/isolation.

II. CHS and DOC Updates to BOC: CHS Vaccination Reporting, March 5 – March 11, 2022

| Correctional Health Services (CHS) Vaccination Reporting | | | | | | | |

¹ Data reported by CHS reflects data from the prior day.

² Counts of CHS-administered vaccine doses were added to the “CHS COVID-19 Data Snapshot” on April 5th, 2021. This snapshot is posted on the [CHS homepage](#) Monday through Friday.

³ CHS previously reported the total number of patients ever in custody who received the first vaccination dose by CHS and the total number of patients ever in custody who completed vaccination by CHS. Going forward, CHS will only report the total number of patients ever in custody who received at least one vaccination dose by CHS because patients in custody are increasingly receiving one dose of a two-dose regimen from a source external to CHS.

⁴ This rate was added to the “CHS COVID-19 Data Snapshot” on April 20th, 2021. This snapshot is posted on the [CHS homepage](#) Monday through Friday.

⁵ This rate was added to the “CHS COVID-19 Data Snapshot” on April 28th, 2021. This snapshot is posted on the [CHS homepage](#) Monday through Friday.

⁶ This rate was added to the “CHS COVID-19 Data Snapshot” on January 20th, 2022. This snapshot is posted on the [CHS homepage](#) Monday through Friday.

II. CHS and DOC Updates to BOC: People in Custody by COVID-19 Status¹

**Number and Percent of Patients Ever Confirmed Positive for COVID-19 While in Custody
March 5 – March 10, 2022²**

¹ The figure above reflects the number of confirmed COVID-19 patients who were incarcerated as of each data. These numbers include confirmed patients who have recovered from COVID-19. The total number of people in custody with confirmed active infections can be found in CHS's COVID-19 Data Snapshots, which are posted on the [CHS homepage](#).

² Due to a technical issue, CHS did not report the total number of current patients ever confirmed positive for COVID-19 while in custody on March 11, 2022.

II. CHS and DOC Updates to BOC: Currently Incarcerated Patients Ever Confirmed Positive for COVID-19¹

**Number of Incarcerated Patients Ever Confirmed Positive for COVID-19 While in Custody
March 17, 2020 – March 10, 2022²**

¹ The figure above reflects the number of confirmed COVID-19 patients who were incarcerated as of each date. These numbers include confirmed patients who have recovered from COVID-19. The total number of people in custody with confirmed active infections can be found in CHS's COVID-19 Data Snapshots, which are posted on the [CHS homepage](#).

² Due to a technical issue, CHS did not report the total number of current patients ever confirmed positive for COVID-19 while in custody on March 11, 2022.

II. CHS and DOC Updates to BOC: Staff with Confirmed COVID-19 (cumulative)¹

Staff with Confirmed COVID-19
March 17, 2020 – March 11, 2022

¹ CHS and DOC report the cumulative total staff members who have tested positive for COVID-19 in their daily updates to the Board. CHS does not report the cumulative total number of incarcerated people who have tested positive for COVID-19 in its daily updates to the Board but does report this metric in weekly Local Law 59 reports published on the [CHS website](#). It would be inappropriate to compare cumulative staff totals to the number of currently incarcerated patients with COVID-19- reported in slide 15.

| Total Housing Areas for Likely Exposed but Asymptomatic Individuals³ | 1 | 1 | 1 | 1 | 1 | 1 | 2 |

¹ BOC analysis is based on the housing areas for likely exposed but asymptomatic individuals, confirmed COVID-19 patients, and symptomatic patients reported by DOC for the previous day as of 4:30 pm.

² Confirmed and symptomatic units on these dates were in Communicable Disease Units (CDUs) at West Facility and in a RMSC unit. **Individuals housed in confirmed and symptomatic housing may include people who have refused testing, and those who are housed in the Communicable Disease Units (CDUs) for non-COVID reasons. People housed in CDUs share no communal space. The total number of people in custody with confirmed active infections can be found in CHS's COVID-19 Data Snapshots, which are posted on the [CHS homepage](#).**

³ Likely exposed but asymptomatic units on these dates were in AMKC and RNDC.

**Number and Percent of Open Housing Areas with a COVID-19 Designation
March 5 – March 11, 2022**

■ Likely Exposed but Asymptomatic Housing ■ Confirmed COVID-19 or Symptomatic Housing

¹ DOC uses three COVID-19-related housing designations: (1) one for likely exposed but asymptomatic individuals, (2) one for exposed and symptomatic individuals, and (3) one for confirmed COVID-19 patients. **Individuals housed in confirmed and symptomatic housing may include people who have refused testing, and those who are housed in the Communicable Disease Units (CDUs) for non-COVID reasons. People housed in CDUs share no communal space. The total number of people in custody with confirmed active infections can be found in CHS’s COVID-19 Data Snapshots, which are posted on the [CHS homepage](#).**

NOTES:

- 1) **Designed capacity reflects the maximum number of beds each housing area was designed to accommodate. DOC believes this metric serves as the best available proxy for housing area size. Accordingly, the capacity figures presented above are calculated by dividing housing area census by housing area designed capacity.**
- 2) Dorm count includes modular dorm units in AMKC, RMSC, and RNDC.
- 3) This analysis excludes Contagious Disease Units (CDUs) (where people in custody share no communal space), intake areas (where the census changes throughout the day), and hospital prison wards.

IV. Housing Area Capacity

Number and Percent of Open Units Above and Below 50% Capacity by Housing Category
March 10, 2022

NOTES:

- 1) **Designed capacity reflects the maximum number of beds each housing area was designed to accommodate. DOC believes this metric serves as the best available proxy for housing area size. Accordingly, the capacity figures presented above are calculated by dividing housing area census by housing area designed capacity.**
- 2) General Population units have fewer staffing needs than more specialized housing units such as PACE or MO units and present an opportunity to lower housing density to facilitate social distancing.
- 3) This analysis excludes Contagious Disease Units (CDUs) (where people in custody share no communal space), intake areas (where the census changes throughout the day), and hospital prison wards.

¹ The values above exclude counts of Contagious Disease Units (CDUs) (where people in custody share no communal space), intake areas (where the census changes throughout the day), and hospital prison wards.

² Designed capacity reflects the maximum number of beds each housing area was designed to accommodate. DOC believes this metric serves as the best available proxy for housing area size. Accordingly, the capacity figures presented above are calculated by dividing housing area census by housing area designed capacity.

³ DOC uses three COVID-19-related housing designations: (1) one for likely exposed but asymptomatic individuals, (2) one for exposed and symptomatic individuals, and (3) one for confirmed COVID-19 patients. **Individuals housed in confirmed and symptomatic housing may include people who have refused testing, and those who are housed in the Communicable Disease Units (CDU) for non-COVID reasons. People housed in CDUs share no communal space. The total number of people in custody with confirmed active infections can be found in CHS's COVID-19 Data Snapshots, which are posted on the [CHS homepage](#).**

⁴ The weekly total represents the total number of unique housing areas that surpassed 50% capacity at any point in the report week. A housing area's COVID-designation may change throughout the week.
