³ This metric is sourced from the “CHS COVID-19 Data Snapshot.” As of August 21st, 2020 this snapshot has been posted on the [CHS homepage](#) Monday through Friday.

⁴ Vaccination metrics were added to the “CHS COVID-19 Data Snapshot” on April 5th, 2021. This snapshot is posted on the [CHS homepage](#) Monday through Friday.

⁵ The number of CHS patient deaths does not include patients who may have been diagnosed and treated while in custody and died post-release.

⁶ This metric reflects staff newly placed in quarantine/isolation and not the total number of CHS staff currently in quarantine/isolation.

II. CHS and DOC Updates to BOC: People in Custody by COVID-19 Status¹

Number and Percent of Patients with Confirmed COVID-19
April 17 – April 23, 2021

¹ The figure above reflects the number of confirmed COVID-19 patients who were currently incarcerated as of each date. These numbers include confirmed patients who have recovered from COVID-19. The total number of people in custody with confirmed active infections can be found in CHS's COVID-19 Data Snapshots, which are posted on the [CHS homepage](#).

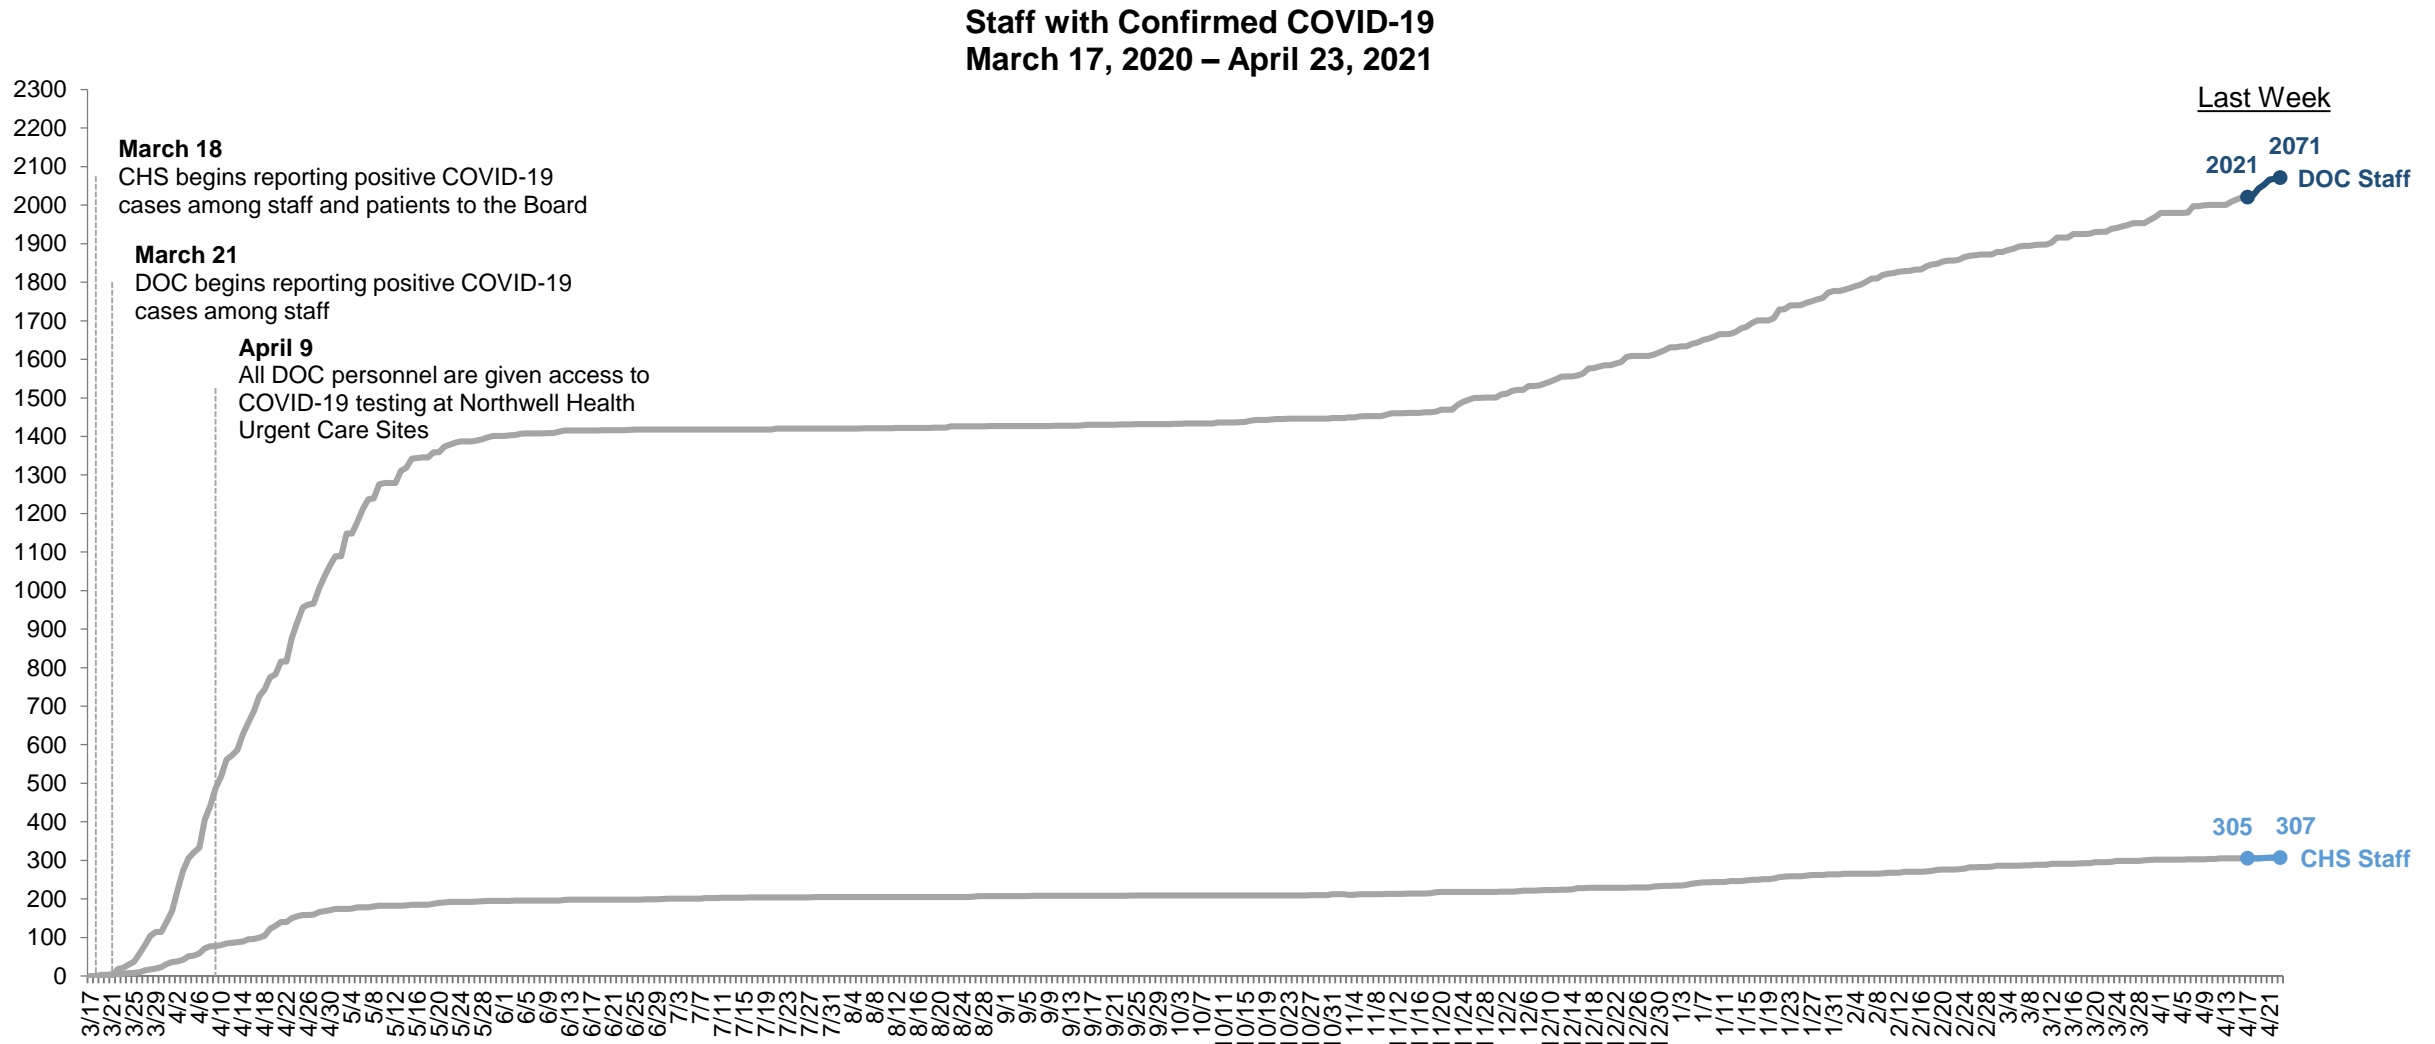

II. CHS and DOC Updates to BOC: Currently Incarcerated Patients with Confirmed COVID-19¹

Number of Currently Incarcerated Patients with Confirmed COVID-19
March 17, 2020 – April 23, 2021

¹ The figure above reflects the number of confirmed COVID-19 patients who were currently incarcerated as of each date. These numbers include confirmed patients who have recovered from COVID-19. The total number of people in custody with confirmed active infections can be found in CHS's COVID-19 Data Snapshots, which are posted on the [CHS homepage](#).

II. CHS and DOC Updates to BOC: Staff with Confirmed COVID-19 (cumulative)¹

¹ CHS and DOC report the cumulative total staff members who have tested positive for COVID-19 in their daily updates to the Board. CHS does not report the cumulative total number of incarcerated people who have tested positive for COVID-19 in its daily updates to the Board but does report this metric in weekly Local Law 59 reports published on the [CHS website](#). It would be inappropriate to compare cumulative staff totals to the number of currently incarcerated patients with COVID-19- reported in slide 15.

April 17 – April 23, 2021

IV. Housing Area Capacity

Number and Percent of Open Cell and Dorm Units Above and Below 50% Capacity
April 22, 2021

NOTES:

- 1) **Designed capacity reflects the maximum number of beds each housing area was designed to accommodate. DOC believes this metric serves as the best available proxy for housing area size. Accordingly, the capacity figures presented above are calculated by dividing housing area census by housing area designed capacity.**
- 2) Dorm count includes modular dorm units in AMKC, RMSC, and RNDC.
- 3) This analysis excludes Contagious Disease Units (CDUs) (where people in custody share no communal space), intake areas (where the census changes throughout the day), and the Bellevue Hospital Prison Ward (BHPW).

IV. Housing Area Capacity

Number and Percent of Open Units Above and Below 50% Capacity by Housing Category

Accordingly, the capacity figures presented above are calculated by dividing housing area census by housing area designed capacity.**
- 2) General Population units have fewer staffing needs than more specialized housing units such as PACE or MO units and present an opportunity to lower housing density to facilitate social distancing.
- 3) This analysis excludes Contagious Disease Units (CDUs) (where people in custody share no communal space), intake areas (where the census changes throughout the day), and the Bellevue Hospital Prison Ward (BHPW).

¹ The values above exclude counts of Contagious Disease Units (CDUs) (where people in custody share no communal space), intake areas (where the census changes throughout the day), and the Bellevue Hospital Prison Ward (BHPW).

² Designed capacity reflects the maximum number of beds each housing area was designed to accommodate. DOC believes this metric serves as the best available proxy for housing area size. Accordingly, the capacity figures presented above are calculated by dividing housing area census by housing area designed capacity.

³ DOC uses three COVID-19-related housing designations: (1) one for likely exposed but asymptomatic individuals, (2) one for exposed and symptomatic individuals, and (3) one for confirmed COVID-19 patients. **Individuals housed in confirmed and symptomatic housing may include people who have refused testing, and those who are housed in the Communicable Disease Units (CDU) for non-COVID reasons. People housed in CDUs share no communal space. The total number of people in custody with confirmed active infections can be found in CHS's COVID-19 Data Snapshots, which are posted on the [CHS homepage](#).**

⁴ The weekly total represents the total number of unique housing areas that surpassed 50% capacity at any point in the report week. A housing area's COVID-designation may change throughout the week.
