<sup>1</sup> Data reported by CHS reflects data from the prior day.

<sup>2</sup> This metric includes hospitalized as well as recovered patients.

<sup>3</sup> This metric is sourced from the "CHS COVID-19 Data Snapshot." As of August 21st, this snapshot has been posted on the [CHS homepage](#) Monday through Friday.

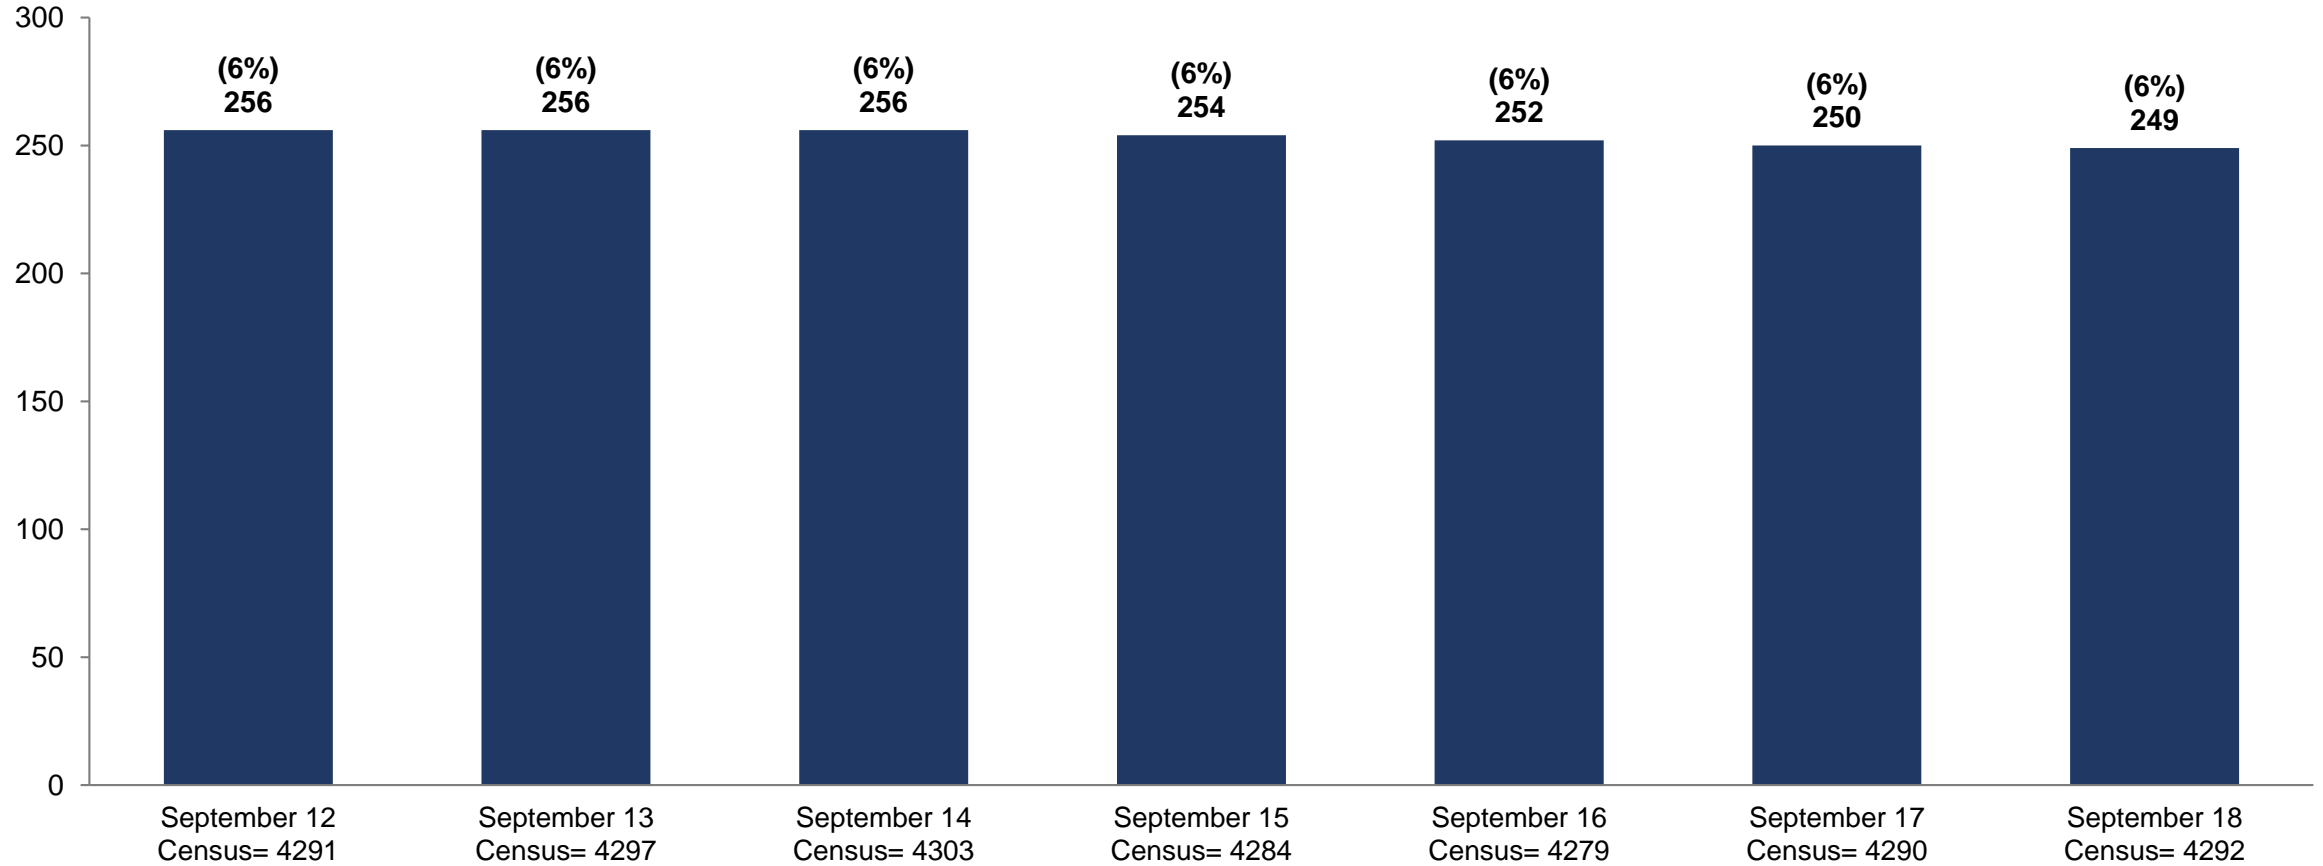

<sup>4</sup> The number of CHS patient deaths does not include patients who may have been diagnosed and treated while in custody and died post-release.

<sup>5</sup> This metric reflects staff newly placed in quarantine/isolation and not the total number of CHS staff currently in quarantine/isolation. Board reports published before November 30<sup>th</sup>, 2020 incorrectly labeled this metric as the number of CHS staff currently in isolation.

SOURCES: (1) CHS and DOC updates to BOC; (2) CHS COVID-19 Data Snapshots.

## II. CHS and DOC Updates to BOC: People in Custody by COVID-19 Status<sup>1</sup>

Number and Percent of Patients with Confirmed COVID-19  
September 12 - September 18, 2020

<sup>1</sup> The figures above reflect the number of confirmed COVID-19 patients who were currently incarcerated as of each date.

## II. CHS and DOC Updates to BOC: Currently Incarcerated Patients with Confirmed COVID-19<sup>1</sup>

**Number of Currently Incarcerated Patients with Confirmed COVID-19**  
**March 17 - September 18, 2020**

<sup>1</sup> The figures above reflect the number of confirmed COVID-19 patients who were currently incarcerated as of each date.

## II. CHS and DOC Updates to BOC: Staff with Confirmed COVID-19 (cumulative)<sup>1</sup>

<sup>1</sup> CHS and DOC report the cumulative total of staff members who have tested positive for COVID-19. CHS does not report the cumulative total of incarcerated people who have tested positive for COVID-19; therefore, it would be inappropriate to compare staff totals to the number of currently incarcerated patients with COVID-19 in slide 15.

<sup>1</sup> DOC uses three COVID-19-related housing designations: (1) one for likely exposed but asymptomatic individuals, (2) one for exposed and symptomatic individuals, and (3) one for confirmed COVID-19 patients. **Individuals housed in confirmed and symptomatic housing may include people who have refused testing, and those who are housed in the Communicable Disease Units (CDU) for non-COVID reasons. People housed in CDUs share no communal space. The total number of people in custody with confirmed active infections can be found in CHS’s COVID-19 Data Snapshots, which are posted on the [CHS homepage](#).**

### III. Housing: Housing Density

Number and Percent of Open Cell and Dorm Units Above and Below 50% Capacity  
September 17, 2020

NOTES:

- 1) On Thursday December 17th, DOC provided the Board with data on the designed capacity of jail housing areas. Designed capacity reflects the maximum number of beds each housing area was designed to accommodate. DOC believes this metric serves as the best available proxy for housing area size. Accordingly, the capacity figures presented above are calculated by dividing housing area census by housing area designed capacity.
- 2) Dorm count includes modular dorm units in AMKC, RMSC, and RNDC.
- 3) This analysis excludes Contagious Disease Units (CDUs) (where people in custody share no communal space), intake areas (where the census changes throughout the day), and the Bellevue Hospital Prison Ward (BHPW).

SOURCE: BOC analysis of DOC 5am census reports and DOC designed capacity data.

### III. Housing: Housing Density

**Number and Percent of Open Units Above and Below 50% Capacity by Housing Category  
September 17, 2020**

**NOTES:**

- 1) On Thursday December 17th, DOC provided the Board with data on the designed capacity of jail housing areas. Designed capacity reflects the maximum number of beds each housing area was designed to accommodate. DOC believes this metric serves as the best available proxy for housing area size. Accordingly, the capacity figures presented above are calculated by dividing housing area census by housing area designed capacity.
- 2) General Population units have fewer staffing needs than more specialized housing units such as PACE or MO units and present an opportunity to lower housing density to facilitate social distancing.
- 3) This analysis excludes Contagious Disease Units (CDUs) (where people in custody share no communal space), intake areas (where the census changes throughout the day), and the Bellevue Hospital Prison Ward (BHPW).
