# **NEW YORK CITY**

## **KNOW YOUR ZONE**

Coastal storms, including nor'easters, tropical storms and hurricanes, can and do affect New York City. It's important New Yorkers take the time to prepare. All residents should have a plan in the event they need to evacuate or ride out the storm at home.

Areas of the city that are at risk from storm surge flooding are divided into six evacuation zones (1 through 6) based on how likely they would be to evacuate. Make sure that knowing your evacuation zone is part of your plan.

- If you live in one of the City's hurricane evacuation zones, you may be ordered to evacuate if a hurricane threatens New York City. Have a plan for where you will go if an evacuation order is issued for your area.
- The City may order residents to evacuate depending on the hurricane's track and forecasted storm surge.
- Determine whether you live in an evacuation zone by using the Hurricane Evacuation Zone Finder at NYC.GOV/KNOWYOURZONE, calling 311 (212-639-9675 for Video Relay Service, or TTY: 212-504-4115), or consulting the enclosed map.

# SIGN UP FOR NOTIFY NYC TO RECEIVE EMERGENCY NOTIFICATIONS AND UPDATES VIA EMAIL, PHONE, SMS/TEXT, OR TWITTER.

- Messages are available in English, Arabic, Bengali,
   Chinese, French, Haitian Creole, Italian, Korean, Polish,
   Russian, Spanish, Urdu, Yiddish and in American Sign
   Language (ASL).
- Download the free mobile app.
- Visit NYC.GOV/NOTIFYNYC, call 311, or follow @NotifyNYC on Twitter.

## **TERMS YOU SHOULD KNOW**

### Atlantic Hurricane Season

June 1 to November 30.

The greatest potential for hurricanes in New York City is from August through October.

#### **Evacuation Zones**

The City will determine which of the six hurricane evacuation zones should be evacuated based on the characteristics of an actual storm as it is approaching the City.

#### **Flood Zones**

Flood zones are used to set flood insurance rates and building regulations. Residents should not use flood zones to determine the need to evacuate during coastal storms.

#### Hurricane

An organized, rotating, low-pressure weather system of clouds and thunderstorms that develops in the tropics with sustained winds of 74 mph or greater.

Hurricanes are classified as category 1 through 5 according to the hurricane's sustained wind speed. As the wind speed and intensity of a storm increases, the category number increases.

#### **Hurricane Watch**

An announcement that hurricane conditions are possible within a specified area.

Watches are issued 48 hours before tropical-storm-force winds are predicted to occur.

### **Hurricane Warning**

An announcement that hurricane conditions are expected within a specified area.

The warning is issued 36 hours before tropical-storm-force winds are predicted to occur and can remain in effect when dangerously high water and waves continue.

# **IF YOU MUST EVACUATE**

# IF YOU LIVE WITHIN AN EVACUATION ZONE AND THE CITY ISSUES AN EVACUATION ORDER FOR YOUR AREA, EVACUATE AS DIRECTED

The City will give specific instructions about which areas of the city should evacuate. If a mandatory evacuation is issued for your area, evacuate as directed. Use public transportation if possible, keeping in mind that public transportation may shut down hours before the storm.

For additional information about how to evacuate, including accessible transportation options, **please contact 311 (212-639-9675 for Video Relay Service, or TTY: 212-504-4115).** 

#### **KNOW WHERE YOU WILL GO**

The City strongly recommends evacuees stay with friends and family who live outside of the evacuation zones. For those who have no other shelter options, the City will open evacuation centers throughout the five boroughs.

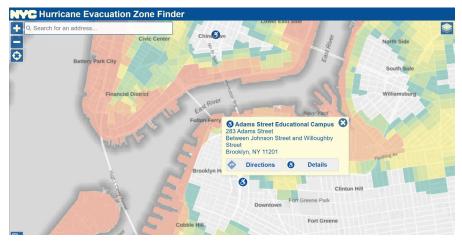

Plan now for everybody's needs, including older adults, people with disabilities, access and functional needs, children, non-English speakers, and pets and service animals. Know your zone and practice your plan with all household members.

# IF YOU ARE GOING TO AN EVACUATION CENTER, PACK LIGHTLY AND BRING

- A Go Bag for each member of the family (a full list of items can be found in the Ready NY My Emergency Plan).
- At least a week's supply of any medication (if possible).
- Medical supplies, or medical equipment you use regularly.
- Sleeping bag for each person.
- All evacuees will be accepted at any evacuation center.

  Evacuees will not be asked about their immigration status.

# **KNOW YOUR ZONE**

Visit the Hurricane Evacuation Zone Finder at https://maps.nyc.gov/hurricane/or call 311 (212-639-9675 for Video Relay Service, or TTY: 212-504-4115) to find out which hurricane evacuation zone you live in.

# IF YOU ARE NOT ORDERED TO EVACUATE

If you do not live in one of the six evacuation zones listed on this map, you may still be at risk from wind and rain.

#### **BE PREPARED TO LOSE POWER**

Make sure you have all recommended items in your emergency supply kit in case you lose power or other basic services.

#### SHELTER IN PLACE

If you do not need to evacuate, shelter in place and make use of your emergency supply kit. Stay away from windows.

# IF A STORM APPROACHES

# All residents should take the following steps to be prepared:

- Bring inside loose, lightweight objects, such as lawn furniture and garbage cans.
- Anchor objects that are unsafe to bring inside, such as gas grills or propane tanks.
- Close windows and outside doors securely.
- Move valuable items from basements to upper floors.
   (Basements are vulnerable to flooding.)
- Charge cell phone batteries.
- Top off your vehicle and generator with fuel.
- Consider moving your vehicle to higher ground if you live in an evacuation zone.
- Turn your refrigerator and freezer to a colder setting. If you lose power, items that need refrigeration will stay cooler longer.
- Fill your bathtub and other large containers with water you may lose water service if the power goes out.
- Don't wait until the last minute to refill prescription medications.
- Take out extra cash, including small bills.

## **HAVE THE RIGHT INSURANCE**

Whether you rent or own your home, flood and wind damage are not covered by basic policies.

- For more information about flood insurance visit: https://www.floodsmart.gov
- For more information about flood zones visit: NYC.GOV/FLOODMAPS or www.floodhelpny.org

#### **HOMEOWNERS**

Most homeowner's insurances do not cover flood damage.

- Homeowners need to buy a separate policy to protect their home in the case of flooding.
- Flood Insurance is required for some homeowners.

#### **RENTERS**

It's likely your landlord has flood insurance that covers the building, but not the contents of a renter's apartment.

The National Flood Insurance Program offers contents-only flood insurance to help renters protect the items inside of their apartment.

# FOR PEOPLE WITH DISABILITIES, ACCESS, OR FUNCTIONAL NEEDS

Make sure your plan addresses how your needs may affect your ability to evacuate, use elevators in your building, shelter in place, or communicate with emergency workers.

- Use your emergency support network to arrange for help from family, friends, building staff, or service providers if you will need assistance.
- If you are unable to evacuate on your own ahead of a storm, call or text 311 for assistance.
- If you depend on power for life-sustaining equipment, plan to evacuate. Ask your utility company if your medical equipment qualifies you to be listed as a life-sustaining equipment customer.
- Allow additional travel time and consider your transportation, dietary, and medical needs.
- Bring all medications with you and have contact information for your health providers written down. Evacuation centers include accessible facilities and accommodations for people with disabilities, access and functional needs. For information about accessibility features of a particular facility, consult the Hurricane Evacuation Zone finder at NYC.GOV/KNOWYOURZONE or contact 311.

# **KNOW THE HAZARDS**

#### **STORM SURGE FLOODING**

Storm surge is a dome of ocean water that is pushed ashore by the strength of the oncoming hurricane's winds.

- Storm surge accounts for the largest number of hurricane fatalities.
- A major hurricane could push more than 30 feet of storm surge (the height of a three-story building) onto the coastline of New York City and flooding from storm surge can travel several miles inland.
- Storm surge flooding and large battering waves can endanger lives, destroy buildings, erode beaches and dunes, and damage roads and bridges.

#### **RAIN**

Heavy rain from hurricanes can cause flash flooding. Low-lying and poor drainage areas are especially vulnerable to flooding.

#### WIND

With sustained winds of 74 mph or greater, hurricanes may damage buildings, topple trees, and turn loose objects into deadly projectiles.

#### **BASEMENT APARTMENTS**

- Basement residents may face additional risks from hurricanes even if they live outside of evacuation zones. Many areas of the City can experience significant rainfall flooding during a hurricane, which can pose significant danger to people in basement apartments.
- If you live in a basement apartment, heed all storm warnings, and make sure your emergency plan includes how you would take shelter above ground.
- If you live in a basement in an evacuation zone, heed all storm warnings and evacuation orders.

#### **HIGH-RISE BUILDINGS**

- Residents of high-rise apartment buildings may face additional risks from hurricanes even if they live outside of evacuation zones.
- If you live in a high-rise building, make sure your windows are closed, and stay away from windows in case they break or shatter.
- If you live in a high-rise building located in an evacuation zone, heed all storm warnings and evacuation orders.

**6** Accessible evacuation centers

### **HURRICANE EVACUATION ZONES**

When a coastal storm is approaching, the City may order the evacuation of neighborhoods in danger of flooding from storm surge, starting with Zone 1 and adding more zones as needed.

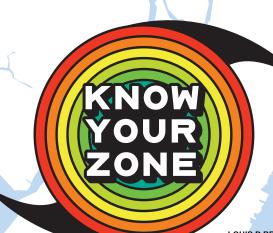

Zones will be evacuated depending on life safety-related threats from a hurricane's forecasted strength, track, and storm surge.

Use the enclosed map, visit NYC.GOV/KNOWYOURZONE, or **call 311** to find out if you live in a hurricane evacuation zone
