– Within 4 years of entry into high school (%)
- Description: The percent of students in general education classes, including students receiving special education services in general education, who entered ninth grade public school in September of a given year and dropped out by June 30th of their fourth year. DOE requires planning interviews, beginning with the Class of 2004, for students above compulsory school age before schools are permitted to discharge them to dropout status. The interview process may delay many students from dropping out until their fifth, sixth, or seventh years, and those students will be captured when DOE calculates final 7-year statistics for the class; however, many students may remain enrolled in high school and graduate. As with prior classes, the final determination of the dropout and graduation rates for each class will not be known for an additional three years.
