

1 Expressway connections remain

2 Three new crossings/connections to the waterfront

3 Better access to Hunts Point industrial core

Diagrammatic overview of recommended improvements

Transforming the Sheridan Expressway

Recommendations include:

- ✓ Removal of barriers to join the northern section of the Sheridan Expressway with existing service roads
- ✓ Establishing three traffic-signal-controlled crosswalks along the expressway to allow pedestrians to cross.
- ✓ Rezoning actions to foster a mix of uses along the waterfront and target growth and job opportunities along transit rich corridors

All of the recommendations, described in more detail in the final report, require additional analysis, design, and coordination.
