

BEFORE YOU BUY, VERIFY!

Purchasing an e-bike, moped, or e-scooter that is certified by an Accredited Testing Laboratory is one of the easiest ways to prevent battery fires.

Look for a certification marker or sticker!

Low-quality and untested batteries pose a significantly greater fire risk to their users than their certified counterparts.

As you shop, lease, or swap e-bikes, mopeds, or e-scooters and their batteries, look for a certification marker or sticker on **both** the device and its battery.

The following symbols signify that a device or battery has been tested to the latest safety standards by an accredited laboratory:

UL LLC

ACT Lab LLC

CSA Group Testing & Certification Inc.

Intertek Testing Services NA, Inc.

SGS North America, Inc.

TUV Rheinland of North America, Inc.

Shenzhen ZKT Technology, Ltd.
