SAFETY TIPS

If you can't see the driver they can't see you

Use extra caution when passing trucks, buses, or approaching an intersection alongside a large vehicle.

Be seen to avoid collision

Use a white headlight and red taillight at night.

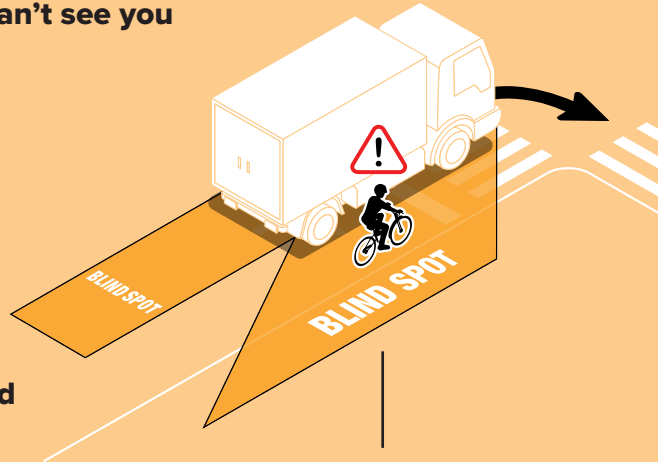

Be sure to be seen when stopped

At red lights, stop to avoid the driver's blind spot – slightly ahead of a waiting vehicle.

Be aware of your surroundings

Do not wear more than one earphone while riding. Check behind you, especially changing lanes.

Do not pass large turning vehicles. They cannot see you!
