Introduction

The New York City Department of Transportation (NYC DOT) is committed to enhancing street safety for children throughout the five boroughs. Section 19-199 of the NYC Administrative Code as enacted by Local Law 241 of 2017 requires NYC DOT to develop strategies for enhancing safety within one half mile of at least 50 schools by March 30, 2018 and every two years thereafter until 2024, and report on their implementation. NYC DOT currently implements over 100 street redesign projects annually which span across the city and collectively fall within a half mile radius of hundreds of schools. In addition, each year NYC DOT installs at least 250 speed humps, at least 50 School Slow Zones, multiple raised crosswalks, daylighting at hundreds of intersections, 200 turn calming treatments, and hundreds of traffic signal projects. NYC DOT also sponsors dozens of safety-related capital projects.

The following report is a sampling of street redesign projects installed within one quarter of a mile of 100 schools around the city, a tighter radius than required in the local law. This list includes projects that added pedestrian islands, turn lanes, bicycle lanes, and left turn traffic signals— all proven traffic safety techniques. Details on these projects are available in the hyperlinks provided in the following table.
